"CHARGE IT TO FATHER."-A dry goods dealer, well known in the vicinity of Broadway, and somewhat prominent for his various shakes and jerks when he promenades the streets, was on a foraging expedition a few days since in the Centre the distance, he approached her, seized her hand, and exclaimed with much warmth:

"How do you do, my dear young friend? bow is your father and mother; when did you leave home? Ah! excuse me,I have forgotten your name, but I stayed all night at your father's home a year ago. (Her father had been dead for ten years.) Perhaps don't recollect me. My name's my store is on Broadway; call on me. I shall be happy to sell you some bargains" -and leaving his card in her hand, our man of tape departed.

Not long afterwards appeared the not very green young lady, who selected goods to the amount of about twenty dollars, and picking them up, was about leaving, when the polite shopkeeper and friend of the family exclaimed :

"Excuse me, miss, you have forgotten the bill."

"Oh no," replied Miss Sucker, "please charge it to father."

Utterly confounded, our long friend suffered verdancy in muslin to leave with the bill upaid .- [St. Louis Reveille.

Too Good to BE Lost .- A few days since, a good old lady of this village, meeting a farmer in the street, on a load of hay, inquired of him if it was for sale; on being answered in the affirmative, she requested him to turn his team around and drive to her husband's barn-yard, some quarter of a mile distant. Her request was complied with; and after the barn-yard was reached, the old lady informed the teamster that she wanted a cent's worth of hay for hen's nests, and that while he was throwing it off, she would step into the house and get the change! The driver was ungallant enough to abuse the old lady and her hens, and refused to retail his hay.

roast beef in about two hours, out of the stomach Digestion is chiefly performed in the stomach by the aid of a fluid which freely exudes from the inner coat of that organ, when in a state of health, called the gastric juice. This fluid is the great solvent of the food—the purifying preserving and stimulating agent of the stomach and in the stomach and the stomach a

condition of the whole digestive apparatus.

Pepsin is the chief element or great dige ing principle of the gastric juice. It is found in great abundance in the solid parts of the human stomach after death, and sometimes causes the stomach to digest or eat itself up. It is also found in the stomach of animals, as the ox, calf, &c. It is the material used by farmers in making cheese styled Rennet, the effect of which has long been the special wonder of the dairy. Curdling of milk is the first process of digestion. A calt's stomach can curdle nearly one thousand times its own weight of milk. Baron Liebig states, "one part of Pepsin dissolved in sixty thousand parts of water, digests meat and other food." Diseased stomachs produce no good Gastric Juice, Rennet or Pepsin.
