Another man is more scrupulous, and not only sees that his cow has a pasture full of the best of grasses-good, sweet, pure water, and convenient shade-but also treats her to a mess of shorts, and a handful of salt eccasionally, and other nutritives to match. As a matter of course, this last man's cow will do much better than that of the former, even if she should not be naturally better.

AN INTERESTING DECISION.-The Supreme Court of Pennsylvania has decided that a debtor intending to claim the \$300 exempt from sale by execution out of his real estate, under the act of April, 1849, must give notice of his intention, before the inquisition and sale, or he can not come in for the money at the distribution. The act contemplates the debtor shall get the \$300 exempt property at an appraisement, where practicable; and the right to demand money out of proceeds of sale is only a last resort, when the property does not admit of a division. The failure to give notice of the claim to the Sheriff, who is the agent of the judgment creditors, before the sale of the realty, will bar the claim of the debtor to the fund. This is a very interesting decision to debtors in this State, and they should bear it in mind.

Whig State Convention.

This body met at Lancaster on Tuesday the 24th ult .- John H. Ewing, of Washington county, President.

Gov. Johnston was re-nominated for Governor, by acclamation.

The following resolutions were introdu-

ed and adopted amidst much enthusiasm Resolved, 1. That in the enactment of Revenue Laws by the National Govern ment, fair and adequate protection to Am-erican interests should be carefully afforded; that the Whig party, now as heretofore, maintaining and declaring its devoted attachment to that American system of international exchanges which secures to the workingman fair wages, to the farmer emunerating prices for his produc tions, and to the mechanic and manufactu rer a just reward for his skill, labor and

2. That the Tariff act of 1646 is unjust and unequal in its operations, and auti American in its tendencies; that it is equally destructive of the vital interests of Pennsylvania, in the prostration of the iron and other manufactories of her citizens ; in the depression and partial ruin of her whole operations; in the consequent decrease of revenue from her public works, and i parts of the State the great decline in the

value of property.
3. That the Whig party has at all time and under all circumstances faithfully con-tended against that policy in our national affairs, which favors and protects the labor of other nations, at the sacrifice of

4. That the the importation of millions of dollars worth of railroad iron, by which our people have been robbed of employment and large balances of trade produced against us, is conclusive evidence of the blasting and destructive effects of the tariff

5. That the government and people of feverish unsettled condition, and a crisis Pennsylvania are loval to the National Constitution, und are ready at all hazards to carry its provisions in effect; to assert otherwise is a libel upon the lair tame of the citizens of the Commonwealth.

6. That the adjustment measures of the last Congress shall be faithfully observed

and respected by the Whiga.
7. That an unalterable determination to maintain the supremacy of the Constitution and Laws has been, and is now, one of our cardinal doctrines, and that while others have faltered the history of the Whig party demonstrates that, in the storms of adversity or in the sunshine of prosperity, this guiding star of our country's hope has never been dimmed by its action or coun

8. That the opinions of our worthy State Executive on this subject, as expressed in his last annual message, meets the cordial approval of this Convention, and expresses the views of our constituents.

9. That it is our duty to accustom our selves to think and speak of the National Union as the main pillar in the edifice of our political safety, and prosperity essential to our collective and individual happiness, and for which we cherish an atachment discountenancing whatever may suggest even a suspicion that it can in any event be abandoned.

10. That the National Administration, under the guidance of our Whig President, Millard Fillmore, has the unbounded confidence of the Whigs of Pennsylvania, that in our domestic policy its manly advocacy of protection to native industry, the improvement of rivers and harbors, the refuction of postage, and the strict account ability and economy of public officers, its energetic, republican, truthful and dignified management of our foreign affairs have secured for it the gratitude of this and

the respect of other nations.

11. That Wm. F. Johnston, Pennsyl vania's Whig Governor, deserves and will receive the gratitude of her tax-paying thousands for his untiring zeal and devo tion to secure and further their interests by perfecting a sinking fund system that must ultimately pay that oppressive State debt, which has been fastened upon them by the profligacy and extravagance of our opponents, and for his efforts to complete and bring into successful operation the unfinished public works, without increased taxation, thus proving how well he has watched over and guarded every interest, devised every means and directed all that the welfare of the whole people should be

12. That the history of Governor John ston's administration furnishes the safest guaranty that on all subjects submitted for his consideration, his action therein will be governed, influenced and directed by a faithful regard to truth, justice and the re-

quirements of the Constitution. 13. That the Whig party, and all such members of other parties as feel a common interest in the prosperity and good name of Pennsylvania, entertain a just pride in our executive officer, who firmly maintained her honor and faith at home and abroad. and who has defined with ability her principles and policy, whenever and wherever

14. That Gen. Winfield Scott is beyond question the choice of the Whigs of Penn sylvania as their candidate for the Presidency in 1852, and that we earnestly recommend him to the Whigs of the Union as the most deserving and available candidate for that high office.

The Whig Nominees for the Supreme Bench.

Mr. MEREDITH was Secretary of the Treasury under President Taylor, and is the acknowledged head of the Philadelphia Bar. But he is not popular with the mass of people either in or out of the city; and even if he should get a large vote at home. on account of the existing dissatisfaction in the Democratic ranks, it would doubtless, be fully met by a falling off in the interior of the State. In politics he is a Whig of the ultra conservative school, and exceedingly distrustful of the Democratic progress of the age.

Judge CHAMBERS is an upright man, of udgment and ripe experience; but pos essing little personal popularity, and extremely conservative in his political views. In the Reform Convention he was the earnest advocate of the life tenure for Judicial officers.

Judge JESSUP, has for some years been an efficient President in the Common Pleas, but his connection with the defunct Susquehanna County Bank will seriously lamage his prospects in his own section of country. He is said to be an ultra

Mr. Comly is perhaps twenty years younger than either of the other nominees, but it is no more than justice to state that he possesses a fine legal mind, and attainments.

Judge Coulter's learning and accomdishments have justly placed him in the front rank of his profession. He holds his present seat in the Supreme Court by a nomination from Gov. Shunk, and was one of the best appointments of his administration. He professes allegiance to the Whig party, but as a Judge of the Supreme Court, he has been more truly and uniformly Democratic and impartial than most of his brethren on the Bench, showing no more favor in any espect, to the most powerful corporation. than he would to the poorest and humblest citizen in the Commonwealth. He seems to have a truer appreciation of popular rights, and more regard for them in practice, than most of the material that has found its way on to the Supreme Bench. He received 23 votes in the Harrisburg Convention, mostly delegates from radically Democratic districts, and was better entitled to a nomination at the hands of Demcrats who have really any regard for principle, than some of his successful competwill receive our vote.

Prof. Taylor

Has resigned his post of Professor of Mathematics and Natural Philosophy in the University at this place, to take effect at the end of the present session; and has accepted the Presidency of Madison University, at Hamilton, N. Y. He has been the main spring of the Lewisburg University, and leaves it, after five years of arduous and persevering toil, in a highly prosperous condition. We do not know that we can better express our estimate of his eminent professional qualifications and high moral worth, than to copy and endorse the following extracts from some of our exchanges.

We learn from Rev. Dr. Eaton, that the Presidency of Madison University has been tendered to Prof. STEPHEN W. TAY-LOR, of the University of Lewisburg, and has been formally accepted by him. We regard this as the most fortunate acquisition for the Institution which could have been made. It is, in itself, an endowment. of more worth than can be measured by dollars and cents.

Of the sterling merit of Prof. Taylor this community needs not to be informed. His unbounded popularity with the students, his thorough and judicious method of discipline, and his rare abilities as a teacher are here known and appreciated.

President Taylor will assume his office at the commencement of the next term. He will return to warm friends whose best wishes and earnest efforts for his success will attend him .- Hamilton (N. Y.) Jour-

STEPHEN W. TAYLOR, formerly Prof. Mathematics and Natural Philosophy in Madison University, and late Prof. in the University at Lewisburg, has accepted the Presidency of Madison University at Hamilton. This will be joyful news to the oldest men do not agree. Let us live the friends of our beloved Institution, for and learn—hear, and be wise. Probably Prof. Taylor is, unquestionably, one of none of us too well understand our studies the best instructions of youth in our denomination, and the Baptists of this State have great confidence in him as a man, a scholar, and a Christian. And the fact that Prof. Taylor, after looking carefully can it be doubted that female society is far at the condition and prospects of Madison University, has left the head of a flourishing University in Pennsylvania, and cast in his lot with the former, will greatly confirm the hopes of Baptists in relation to our Institution at Hamilton .- N. Y. Weekly Chronicle.

The Utica Register brings us the intel-ligence that Prof. Taylor, of the University of Lewisburg, has accepted the Presidency of Madison University, where he was formerly Professor for several years. Th friends of Madison may well congratulate themselves on the acquisition of Prof. Tay-lor as their President, for he is a popular teacher and an accomplished disciplinarian. The corporations, the students, and patrons of the University, will hold him in grateful remembrance for his valuable instructions and influence there, and follow him to his responsible position with their prayers and best wishes for his future prosperity.— Phila. Christian Chronicle.

Prof. Taylor's resignation was handed in at the last meeting of the Board in Lewisburg, and immediate and ample measures partment-and also to select a President of the Institution.

A Word in Friendship.

I am sometimes induced to think that the evils of our elective system are much greater than they need be, were we a little more considerate. Were we what voters should be, we should need no excitements annually to teach us how to vote, or to induce us to attend at the polls. Or, if our cause indeed require some artificial stimulus-or, if there be gross ignorance which requires the illumination of partizan radiance, still methinks our patriots might be content to save their country once in four years (instead of every year) if they only thought so. We would seriously advise our young

friends, of whatever party, to pause before

rushing with their native ardor into the arena of party strife. There are far better ways of spending time and money, than on the boisterous waves of politics. Never have we known a pure and ingenuous youth escape some defilement upon coming in contact with the leaders in partizan warfare. Any one who has observed, can but regret the bickerings among friendsthe divisions among brethren-the marrings of intellect and character-which early initiation into politics soon reveals. To avoid this, let the young abstain for a few years from active participation in elections. To judge correctly of men and of measures, requires some years, and more and other purposes. knowledge of history and of politics in its true and higher sense, than most young men are privileged to possess; and modes ty would advise them not to be forward in expounding doctrines concerning which the oldest men do not agree. Let us live or our business, or pay too much attention to the cultivation of our manners. These more useful in implanting and strengthening virtuous principles, than the company and evil associations of electioneering demagogues.

One word more: All the efforts of the ntagonistic clubs, will avail nothing. One counteracts the other-and thus both are dead losses. And when their friends shall have expended, (with time and money) a vast amount of valuable eloquence-when many very large fish stories shall have been told, and truth and decency become outraged by many in the contest-when assions shall have been inflamed, and wounds inflicted which it will require years to heal why, Bigler and Johnston will be voted for or against, just as they would have been had all these worse than useless efforts not been put forth .- Such at least is the conviction of one who never fails to vote, but who bows to no partizan and served his country faithfully through behests.
