The undersigned recidents of Tacony, eight miles above Philadelphia, being well acquainted with John C. Green, and the circumstances attending his case, feet impelled by a deep sense of imperative duty, to make universally known to the public his entire recovery from the very last stages of a Pulmonary Consumption. So entirely helpless was his condition; having been but a orief period in that regidly sinking and emecined state, as to utterly preclude in the epinion of his physician and friends, who watched by his bedside, all hopes of even a temporary recovery and restoration to his present robust health. Thus the careful use of your invaluable Specific, the Pulmonic Syrup, makes it in our belief, under the circumstances of his previous prestrate, not to say dring condition, one of the most startling resultants have hele amnals of medical skill or science can produce. It descrues to be imperishably recorded to your credit, and secures to you, the great discoverer of an infallible cure for this hitherto remediless disease, a lasting monument, and a world wide reputation in the healing art that no time may either diminish or destroy. Having witnessed Mr. Green's distressing struggles and sufferings from a continual cough, superadded to the other symptoms consequent upon, or attending the last stages of a pulmonary disease; and moreover at being so generally believed by his numerous friends that no human power own of the exclusive use of your wonderful Syrup; and we should indeed rejoice if we could be made the humble instruments of relief and care to others who may be so unfortunate as to be similarly affilicted.

A NATURAL REMEDY!

PROCURED FROM A WHILL IN ALLEGHENY CO., PA., Four Hundred feet below the Earth's surface! It is put up in bottles, just as it flows from the well, without admixture of any kind. It gets its ingredients from the beds of substances which it passes over in its secret channel: they are blended together in such a form as to defy all human competition. The Introduce in most chronic chronic cases are acknowledged not only by physicians but by the community at large. These singular fluids dowing out from the earth, impregnated with medicinal substances of different properties, and holding them in such complete solution as to require the aid of Chemistry to detect them, bear ample proof to the fact that they are compounded by the master hand of Nature for the alleviation of human suffering and disease. If Petroleum is a medicine at all, it is a good one, for Nature never half does her work. It will continue to be used and applied as a Remedy, as long as man continues to be afflicted with disease. That it will cure every disease, we do not pretend; but that it will cure a great many diseases, hitherto incurable, is a fact which is proven by the evidence in its favor. Its discovery is a new era in medicine, and will enure to the health and happiness of man.
