LEWISBURG CHRONICLE & WEST BRANCH FARMER.

The Farmer.

Work to be done in Hay. THE FARM -in the car y part of th month, pastures should be attented to Do not pasture cattle until the grass ha some growth, or the yield of the season will be luss.

Clean and whitewa-h cellars, distributcharcoal dust and plaster of paris about your hog pens, stables, &c., and remove all putrescent and unwholesome substances The charcoal dust and plaster of paris will absorb deleterious games, as given off from vegetable and other matters undergoing decay.

"Plant InHan corn as soon as the leaves are as large as a mouse's car." This is an old and safe adage, but we should advise that some be planted earlier, either broad-cast or thickly in rows, for soiling cattle with the stalks. Peas, oats and buckwheat, as Indian corn, should be soak d in water and then rolled in plaster before plunting. Plant potatoes for your principal crop, if not previously done. Those planted early are less subject to be disease l. If you have land thoroughly prepared and well subsoiled, sow lucern this crop will be found very profitable for those who soil cattle, as it may be cut four times during the summer. If the soil be not deeply disintegrated, lucern can not succeed, as it is a deep-rooted plant, and fails as soon as the ends of the roots reach s cold and compact sub-soil. Attend to insects, and read our articles

on caterpillars, and modes of destroying them. If you have used six bushels of salt yer acre on year winter fallows and grass lands, but few insects will annoy you other than those which harbor in trees, &c., and where salt has been used but few weeds will be found. Cleanse the bark of your fruit trees. (See our articles on Cleansing Bark of Fruit Trees, &c.)

Secure manures from the influences sun and rain, as fast as made. Place them under cover, if practicable, and augment their quantity by admixture of muck, pond-mud, or even headlands, as during the warm weather, stable manure decomposes rapidly, and gives off large quantities of ammonia, which should be received by such materials as are capable of retaining it. When muck can not be had, cover the top of the hesps with charcoal dust o plaster of paris.

- White.

If you have hog-pen manure which i free from long stuffs, mix it with chareon dust under a shed, and by turning it occa sionally it will become pulverulent in time to sow with turnips, for which use it i equal to ground bones, and at less than one-third the cost. Dress corn and potatoes thoroughly, and if horn shavings car be had, apply them to corn in the hill; no manure is more safe and effective for this use. Should potatoes not show vigor, use guano, (Peruvian) diluted with 100 times its bulk of charcoal dust, or well decom posed peat, in the hills at the time of hoe ing or cultivating, using a small handful

ive it a limited but fair trial. If it prove recessful, acknowledge yourself, as you are, a great gainer. If it prove unsuccessal you may be the gainer still, especially

e. You may, perhaps, have evolved some w idea that in the end will not only schly feward yourself, but, if imparted to thers, add to the general stock of knowldee. Then let none despise " book farmng." But, as you would add dignity to

he profession, and gold to your purse-as con would increase the fertility of your oil, and gather knowledge for the mindtrive to be a thoughtful and diligent readr, and an active and critical thinker.

Mere speculation may, to some extent. se beneficial. It is especially so where it pens the door to new fields of thought so there is much need that he who writes, whether he speculates or detail facts, should be concise and simple, yet so full as to be clearly comprehended. -T. E. W.-Rural New Yorker.

Thorough Tilling.

J. Redmond, of York county, argues in favor of thorough tillage, which next to, and indeed equal to manure, should be mpressed upon the mind of every farmer. He justly says :

"One of the great elements of fertilization in soils, is the perfect loosening of MIFFLINBURG .- Our advertising column them, so that the different ingredients shows that the true go a-head spirit has omposing them, be thoroughly incorpora- extended to Mifflinburg, and that Goods ted, and brought to the surface, and thus are there offered at Railroad prices. Our receive the advantages of exposure to the patrons in that neighborhood are invited sun and atmosphere. None but a simple- to call.

ion would pretend to doubt the value of nanure, or assert the possibility of growng good crops for any length of time of some hundreds of individuals who have without it, but he is scarcely wiser who expressed their opinions on the subject, clieves (and manifests his belief in his the present may be set down as decidedly taily practice,) that his crops will be abun- "warm" weather, and especially agreeable lant where his tillage is meagre. Show to agriculturists, gardeners, &c. me the husbandman whose plowing is shal-

ow-whose breaking of the clods preparstory to seeding is imperfectly donewhose fields are strangers to the roller, and timely piece of service, but guess how long ook very much as though the harrow and are those unsightly piles of mud to liultivator had never been used upon them, steaming in the sun, and blockade the and I will show you poor fields-yields stores and dwellings in front of which they that will scarcly pay for the labor and ex. are deposited ? The old evil was certainly pense, much less leave any profit behind." the least if the new is to become permanent.

FATTING CALVES -"F.T." of Dauphin Io., Pa., having tried various modes of Littening calves, has adopted the following California. They were among the recent as the best : About one gallon and a ulf of the milk of the dam is daily mixed with the meal of beans, which the calf greedily consumes, and which he finds is is effectual in forming bone and muscle is the whole of the milk, amounting to

our or five gallens per day. This system s pursued for two weeks ; at the end of nesota, for a copy of annual message ; a which time he substitutes lineed for document, by the way, of rare interest to Dauphin bean-meal, on which the calf rapidly fat- all who desire to be 'booked up' with reens, and in four weeks is fit for the butch- gard to the character, resources and progr, and in the finest condition .- Ponn, ress of that flourishing young empire, the Carm Joer.
