HUSSEY'S GRAIN REAPER and Mowing Machine.

Great Improvements for 1852!

THIS Machine obtained the AWARD of the Judges specially appointed by the Cleveland (England) Agricultural Society to compare this Reaper with M'Cormick's. They pronounced it superior in every respect—(see Official Report, below.)

This Machine, invented by Mr. Hussey, is achieving a series of triumphs in England, which are rapidly obtaining for it that pre-eminent position which its intrinsic merit has already secured for it in the land of its origin.

Award of the Judges.

REPORT of the Jury appointed by the Committee of the Cleveland Agricultural Society, on the comparative merits of the Reaping Machines of Mr. M'CORMICK and Mr. O. HUSSEY. Tried and Tested before the Jury on Thursday and Saturday, Sept. 25th and 27th, 51.

The Jury report most exceedingly the unfavorable state of the weather, on the days of trial, a perfect hurricane ranging the whole of the first day, and their consequent inability to make so full and satisfactory trial as they would have wished.

Two Machines were tested on a crop of Wheat, some acres, at 22 inches per sweep, very much laid, and on the very ground. Under these circumstances, very short in the straw, and of poor quality than the Oats.

The Jury, taking the different points submitted to their consideration, do award the Silver Medal to

1st. Their unanimous opinion that Mr. Hussey's Machine, as exhibited by Messrs. Wm. Percy & Co., cut the Wheat in the best manner, especially as regards ripper and fingers, and when the machine was working on the down draw the Wheat laid.

2d. By a majority of eleven to one that Mr. Hussey's Machine is the least severe.

3d. Taking the breadth of the two machines into consideration, that Mr. Hussey's did most work.

4th. That Mr. Hussey's Machine casts the cut Wheat in the best order for gathering and binding. The question as to the cutting of the Oats was not considered, on the ground, and decided by them, as above, by a majority of 6 to 4.

5th. Their unanimous opinion that Mr. Hussey's Machine is the best adapted for ridge and furrow.

6th. This question was referred by the Jury to Mr. Robinson, to report to Mr. Wellesley, and York, a practical mechanic of acknowledged ability, whose report is appended below.

7th. That Mr. Hussey's Machine was the first Machine prize.

8th. 9th. The Jury decline to express a decided opinion on these points, in consequence of the state of the weather.

The trials took Place on the Farms of Robert Fascin, of Ormesby, near Middlesboro' on Tees, who in the most liberal and disinterested spirit allowed his crops to be trodden down and damaged to a very great extent, especially on the 27th, when in spite of the storm an immense crowd assembled to witness the trials.

The Jury can not conclude their Report without expressing the great pleasure they have derived from seeing two machines brought into competition that were able to do such very good work, and also at witnessing the friendly, straightforward, and honorable way in which the Exhibitors of the respective machines met on the occasion.

Signed on behalf of the Jury,
W. F. WHARTON, Foreman.

MR. ROBINSON'S REPORT ON QUESTION 6.

Having carefully examined both machines, and given the subject due consideration, I am of the opinion that Mr. Cormick's Reaping Machine, is not so practicable, is most liable to get out of order.
(Signed) THOMAS ROBINSON.

Read the following Testimonials.

Messrs. Gibson & Mason—GENTLEMEN: We need a Reaper manufactured, by Mr. Hussey, of Baltimore. So cutting our harvest in 1851. It consisted of between 30 and 40 acres of Wheat. A part of it stood well, but a considerable portion was much tangled and laid. The Machine operated equally as well in both cases—cutting the standing Wheat clean, and depositing it in sheaves of suitable size, straight, and in good order for binding, and taking off the grain cleaner, and leaving it in much better order for binding, than it is generally done by the cradle. When the grain is much lodged, or in very low, in order to make good work it is necessary to run the machine against the slope of the grain. We are well pleased with the operation of the machine, and a large number of intelligent farmers who witnessed its performance during the harvest, entertained the same opinion in relation to it.

Respectfully yours,
WM. NESBIT,
JOS. M. NESBIT.

Chilesquaque, Northd Co, March 22, 1852.

IRY VALLEY, March 23, 1852.

TO THE PUBLIC.—I do hereby certify that I used Hussey's Grain Reaper in taking off my crop last harvest, and the best order it was ever my fortune to see, and more than met my most sanguine expectations. It cut about 14 acres per day of very heavy Wheat, and even then we stopped to shock the grain not before evening. It takes the grain very clean from the ground. It cut lodged grain remarkably well, and, in fact, a farmer having a well stocked off farm, and not too much stony ground, can not add a more useful or labor-saving machine to his stock of utensils. Yours, BENJ. CAWLEY.
DAVID BEITTLYOUN.

THIS IS TO CERTIFY, that we have used Hussey's Reaping Machine, and have found it in every respect to answer the purpose designed, and consider it an article that will pay a farmer as well as any other farming implement that he can add to his stock of farming utensils, and take pleasure in recommending it to the farming community.

RICHMOND, Kane Co., Ill., Aug 6, 1849.

We, the undersigned, having seen Mr. Hussey's Reaper work at cutting grass and grain, think it preferable to M'Cormick's or any other machine that we have seen. It cut Wheat that could not be cut with M'Cormick's Reaper, or Cradle. We are well acquainted with M'Cormick's machine.

SETH SHIREWOOD,	ELISHA WRIGHT.

CARROLTON, Greene Co., Ill., Dec. 27, 1850.

I procured one of Mr. Hussey's Reaping and Mowing Machines, from Baltimore, last Spring; I cut eighty acres of oats and fifty acres of Timothy with it, to my entire satisfaction; after which I cut sixty acres of Clovereed with it less than five days. I could not not have saved the Clovereed without the machine, as I remember I have saved the whole cost of the machine, in the saving of my Clovereed alone. SAMUEL THOMAS.

A number of certificates from others could be given, but we deem it unnecessary, as the Reaper on a fair trial will recommend itself. The subscribers have the exclusive right to sell in the following Counties, Union, Northumberland, Montour, Luzerne, Perry, Columbia, Lycoming and Clinton. Farmers and others are cautioned against purchasing of any persons except ourselves or our authorized Agents.

ROSS' GRAIN DRILL.

This is will known to the Farming community and only needs a fair trial to give it a decided preference over any other Drill in the market.

Grain Reapers, Grain Drills, and all kinds of Castings made to order and kept constantly on hand and for sale at the Lewisburg Foundry. All orders promptly attended to by

J. H & CO

Lightning Rods.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S

Patent Magnetic Lightning Rods,

and in this alone. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in

Vine St. 3 doors above 12th. Philadelphia.

where all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

These rods have been purchased and successfully used by the following individuals, companies and corporations, whose names are cheerfully submitted:

In and near Philadelphia—A. & S. Roberts, George Santzinger, Judge Bonnier, Judge Conrad, J. Mulford, John Hilmes, Col. Gamble, Colonial Hotel, Joseph Ingersol, The Blockley Almshouse, Anderson & Brothers, Rev. J. L. Grant, John Notman, Thos. Graver, Bate & Boone, A. E. Gibbons, H. Simmons, Thos. Nott & Co., Mr. Downing, J. F. Gregg, J. W. Watson, C. Humphreys, J. Ripley & Co., J. Nyman, Dr. Bartol, J. Worstall, G. Pugh, Mr. Sharpless, Mr. Martin, S. Doubley, J. Brinkler, Mr. Davison, Dr. Paul, S. B. Powers & Co., J. Winspenny, H. Miller, the Real Estate Bank, the U. S. Arsenal, the Spring Garden Commissioners Hall.

In Del. State—Gov. Cannon, George Crispin, Judge M'Call, Judge Ingram, John Netman, Dr. H. M'Murtie, Benj. Roberts, Mr. J. Downing.

☞ The only authorized Agent for the Counties of Union, Juniata, Mifflin, Clinton, Lycoming, Northumberland, Montour, Columbia, Luzerne, is

SAMUEL HOOVER.

Hartleton, Union county, Penn.

Orders and letters addressed (post paid) to Mr. Hoover, will be promptly attended to. He has put up a number of these Rods in Union county, some of which may be seen as follows:

IN UNION COUNTY.

Hartley Tp—Mark Halfpenny, Wm. Foster, John Hass, Michael Peters, Jacob Smith, David Fillman, Reuben Mench, George Kleckner. *New Berlin*—Court House, and Commissioners' Office. *Limestone Tp*—John Reber. *Union Tp*—Dr. Charles Wilson. *Washington Tp*—John Kunzz, Simon Kunzz. *Penn Tp*—Isaac Condron. *White Deer Tp*.—Michael Hoffman.

RECOMMENDATIONS.

PHILADA., Aug. 12, 1847.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erected by Mr. Thomas Armitage, on Bellevue House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

D. M'MURTRIE.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample commendation of their utility and superiority. TRACY E. WALLER, M. D.
Rising Sun, Philad. Co., April 10, 1852.

TREES—TREES!

A NEW LOT of Ornamental Trees, Fruit Trees, Evergreens, Roses, Grape Vines, Raspberries, Strawberries, &c., for sale at the Lewisburg Nursery and Botanic Garden. The varieties of Fruit are all warranted.

Farmers, Attention!

M'CORMICK'S

Reaping and Mowing Machine.

A REAPING MACHINE being now almost universally regarded as a necessary implement to the Farmer (and not much less so than the *Plough* because of the high price of labor at the season of harvest and the great importance of the work to be done in a short time) he should investigate carefully the principles of different machines and *points of difference* as well as the right of the Manufacturer to sell the same.

My machine operates with a [illegible] and not cut and lay it with a swath or wind it for the rake, so that the whole is delivered at the side of the machine and the loading can be entirely independent of the cutting.

It is simpler of light draught, and will cut one hundred and three hundred acres of grain without a second grinding and is warranted superior to every other Reaper in all kinds of grain, and grass, whether tangled and lodged or otherwise.

That the Sickle is the "main cutter," and that the Rod is independent to the essential operation of the machine for cut the harvest in longer or shorter of a blade. These facts being attested by the thousands of my machines now in use—and by myself and other Inventors on patents, while a comparatively small number of machines known as "Heavy Reapers" made on some former very antiquated and stubborn and are in use.

As additional evidence of the great superiority of this machine, I may say that in the great West and North, where Reapers have been and are still in demand for [illegible] I have been subjected to the necessity of bringing suit against a number of manufacturers for the infringement of my patents, and that against Seymour & Morgan, of Brockport, New York, I have recently obtained a verdict of $15,000 damages, and will here advise [illegible] that I have [illegible] in the Patent Office, as I intend to [illegible] so far injured, from these other [illegible] different name, as not to be [illegible] and that I have [illegible] factories, and [illegible] in the hands of the Marshal for separation for the past, and [illegible] for the future.

Also THE GREAT MEDAL OF THE WORLD'S FAIR was awarded to me and for [illegible] with Hussey's.

After a year's [illegible] and thorough experiment, and only have I at the [illegible] of 1852 the best [illegible] machine ever offered to the public—for have [illegible] the most extensive expectations in my new [illegible] of Reaping machines, and will [illegible] to [illegible] Reaping machine [illegible] and [illegible] [illegible] there will be [illegible] that a little different [illegible] for the [illegible] of small [illegible] [illegible] made the improvements required to [illegible] my Machine, which have also applied to the Reaper, and the [illegible] I exhibited it the [illegible] to [illegible] to [illegible] [illegible] [illegible]
