KOSSUTH.—The Louisville Journal, in noticing Brace's work on Hungary, says: "That Kossuth has faults, no one will deny, who believes that he is a human being, but that he is one of the noblest spirits of the age we are convinced in our inmost soul. We believe that his name is intimately connected with the destinies of Europe. He may die in hopeless exile from his country—the land which has thrilled with his words may hear him no more forever; tyrants may crush beneath their feet his throbbing brain, but he will leave 'footprints on the sands of time,' which those who follow him

'Sublime shall take heart again.'

He has sown seeds which, though they may be overwhelmed with blood, and trampled and crushed by the tread of the armies of tyrants, will yet spring up laden with fruit to bless the eyes of starving millions. His thoughts, though they may now seem inactive, are still thoughts that breathe,' and his burning words will ye be found blazing up under the thrones of tyrants."

PROTECTION FROM LIGHTNING!

THE subscribers are now manufacturing in Lewisburg, their celebrated **Patent Lightning Rods,** warranted superior to any in use, and which will be put up on any description of buildings at the reduced price of 15 cents per foot. No extra charges for Points or any of the Fixtures—thus making a rod of equal length cost $6.

These superior rods are spiral twisted, ½ inch iron, in 10 feet lengths, perfectly screwed together with brass sockets, and put up through glass insulators in a most substantial mode, the whole mounted with a solid silver plated Copper Point, one of the proprietors being a practical Chemist and Electrician would assure the public that these improved Rods are manufactured and put up on the most approved principles

We would simply remark, that so great has been the demand for these celebrated Rods, that over six hundred thousand feet have been sold in one season. Our teams are traversing all parts of the country with all necessary apparatus for putting up Rods at once. We have numerous certificates from prominent Insurance Companies and from scientific committees, speaking in the highest terms of their superiority. Among others we call attention to the following:

To the Public.

WILLIAMSPORT, May 19 1852.

Being called upon by Mr. A. Cross, Agent for Reyburn & Baker to the construction and erection of Electric Rods, for a recommendation, it gives me pleasure to state that I was present at the Dickinson Seminary in this place, during the present month, when Prof. Barrett, of that institution, tested the points of the rods with a strong galvanic battery. The points tested by him were made of copper, and plated with silver. No depression was produced upon the points by the electric fluid: and so well convinced was I that they would answer the intended object, that I immediately had one erected at my new house in this place.—All the rods they have erected here have been well done and isolated with glass in a substantial manner. Rev Mr. Bowman was also present at the experiment, and I believe was fully satisfied as to the result. I therefore take pleasure in recommending the Rods.

Respectfully Yrs, A. D. WILSON.

We certify to the correctness of the above:

Lightning Rods.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S

Patent Magnetic Lightning Rods,

and in this alone This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Waller and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is at

Vine St. 3 doors above 12th. Philadelphia.

where all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.
