### A Model Candidate.

The Philadelphia Sun informs us that Col. John W. Forney, late editor of the Penusylva-nian, is about to be nominated by his friends for the Presidency. We suggest Col. Wallace of the Sun, as a suitable candidate for Vice.—

With all humility we accept, and lay down our platform :

- 1. No Taxation 2. No Duties on Imports!
- 3. Congress to raise all the money !
- 4. We the People of our Party to spend it ! 5. No more Compromises, for there can be no such thing as splitting the difference between right and wrong.
- 6. A Hastening of the Good Time Coming. 7. Free Postage for the Pennsylvanian and the Philadelphia Sun; all other papers to be excluded from the mails as useless.
- 8. The Best offices for our best friendsto have 50 per cent. of their salaries.
- 9. The annexation of Iceland during sum mer, and all about the Equator in winter.
- 10. Roast beef and Ten Dollars a day.
- 11. Free Trade to and from Africa. 12. Down with white Slavery.
- 13. A fair Division of the property of the United States among the faithful of our Party.

With these planks of our platform we can carry the thirteen original States, and then pledge ourselves to build all the railroads, canals, turnpikes, and bridges, the new ones want. We are now in the field, and shall answer no letters unless they are post paid, and contain remonerating enclosures.

N. B.-We shall continue our old business of editing the Sun. WE SHALL NOT BESIGN, despite of denunciations here or elsewhere .-We never eat our soup hastily, remembering

"—the man of Norwich, Who burned his mouth eating cold porrich."

We never fainted in our life; never lost a battle, or gained one, therefore must be equally acceptable to the friends of war and peace; we have given pennies innumerable to little boys to buy sticks of candies; we are for religious and all kinds of liberty; are in favor of the Constitution, and a law-abiding citizen; never challenged De WITT GLINTON, nor refused to fight Gen. JACKSON; have been a Democrat, and have voted with the Whigs, and now go for Americanism; were born in a free State, and married in a slave State; have been engaged at Lundy's Lane, New Orleans, Yorktown, and Trenton, where we did good service in the commissary department; have reached the age of discretion; believe in the federalism of WASHINGTON, and the democracy of JEFFERsow; gave our first political vote for old Hickory, and our last for ourself at a delegate election; have never been defeated before the people; have never been guilty of any felony; have thus far escaped the penitentiary, and never having been up for office before, have enjoyed an irreproachable character. Upon this assertion, however, we take no credit, as no man knows what a consummate rascal he has been, until his public services and virtues induce any portion of his fellow citizens to honor him with an important nomination. We honor him with an important nomination. We on the public road leading from Lewisburg to are beginning to turn grey, are over six feet high, and can write while persons are conversing about us-an invaluable faculty for the presiding officer of the United States Senate. We are poor and want a good salary; Col. FORNEY may be short-lived, and we may accidentally succeed him in the White House; to seek or refuse an honor such as the New York Star has conferred on us, and as we have

A lawyer at Poughkeepsie was applied to during his lifetime, by an indigent neighbor for his opinion on a question of law, in which the interests of the latter were materially involved. The lawyer gave his advice and charged the poor wretch three dollars for it --There is the money, said his client, it is all I have in the world, and my family have been a long time without pork!" 'Thank God!" replied the lawyer, 'my wife never knew the want of pork since we were married!" . Nor never will,' the countrymen rejoined, ' so long as she has such a great hog as you!' The lawyer was so pleased with the smartness of the repartee, that he forgave the poor fellow and returned the money.

given many "first-rate notices," we shall ex-

ANECDOTE.-A friend tells us the following. which we pronounce decidedly good:

One of the store keepers of this place, a few days since, purchased of an Irish woman a quantity of butter, the lumps of which, intended for pounds, he weighed in the balance and found wanting. 'Sure it's yer own fault, if they are light,' said Biddy, in reply to the complaint of the buyer, 'it's yer own fault, sirfor wasn't it a pound o' soap I bought here mesilf, that I had in the other end of the scale when I weighed 'em!'

The store keeper had nothing more to say on the subject.

A debating society out somewhere near sunset, lately discussed this question : "Is a swine when it is six months old, a pig or a hog?'-The question was argued at great length and with marked ability,' but the arguments on both sides were so near equal in point of force and ingenuity, that the President was desired to decide the question, which he did in the following words: 'It's the opinion of the chair, gentlemen, that the animal's a good sized chunk of a shoat."

. There is something for us all to do,' is the heading of a poem in the papers-a subject in it. There are exceptions, however, to this and Washhouse adjoins, and it has also a rule, for a very needy gentleman with a very large cement Cistorn, a Pump and Well of red nose told us, a day or two since, that he good water, and all the necessary outcouldn't get a thing to do. The man appeared buildings. strong, and so did his breath!

Orn Wonen shows its appreciation of the labors of most great reformers, by bestowing a super-abundance of stoxes-hurling them as missiles at the bodies of these "fanatics" while alive, and heaping then as monuments above the bones of these same fanatics after death.-(So saith, truly, the Carpet-Bag.)

A Judge out west has recently decided that at the old stand of S. Ammon, where one or the it is insanity to sign another man's name to a check in place of your own, but when you draw the money on the check and spend it, there is a good deal of sanity in the proceedings.

But no oil stand of S. Ammon, where one or the other may always be found ready to attend to Cutting or Making Gentlemen's Clothing, in accordance with the latest Fashions, punctually, and on the nost reasonable terms, for Cash or Country Produce. Old friends and saw are respectfully faviled to call.

The Jury, taking the different points submitted to their consideration, in order as they occur, express—
1st. Their unanimous opinion tast Mr. Hussar's Machine, as exhibited by Mesers. Wm. Dray & Co., cut the Wheat in the best manner, especially across ridgs and farrow, and when the machine was working in the direction the Wheat laid.

2d. By a majority of eleven to one, that Mr. Hussey's Machine caused the least waste.

2d. Taking the breadth of the two machines into consideration, that Mr. Hussey's did most work.

4th. That Mr. Hussey's did most work.

4th. That Mr. Hussey's Machine leaves the cut Wheat in the best order for gathering and binding. The queetlon was submitted to the laborers employed on the occasion, and decided by them, as above, by a majority of 6 to 4.

5th. Their unanimous epinion that Mr. Hussey's Machine is best adapted for ridge and furrow.

6th. This question was referred by the Jury to Mr. Robinson, foreman to Mr. Bellerby, of York, a practical mechanic of acknowledged ability, whose report is appended below.

Masses. Genera & Massil—Gentleren: We used a Reaper manufactured by Mr. Hussey, of Raltimore, for cutting our barvest, in 1851. It consisted of between 50 and 60 acres of Wheat. A part of it stood well, but a considerable portion was much tangled and laid. The Reaper operated equally as well in both cases, cutting the standing Wheat clean, and depositing it in sheaves of suitable size, straight, and in good order for binding, and taking off the grain cleaner, and leaving it in much better order for binding, than is generally done by the cradle. When the grain is much lodged, or lies very low, in order to make good work it is necessary to run the machine against the slope of the grain. We are well pleased with the operation of the machine, and a large number of in telligent farmers who witnessed its performance during

TO THE PUBLIC—I do herely certify that I used flussey's Grain Beaper in taking off my crop hast harvest, and the good order it cut my crop more than met my most sanguine expectations. It cut about 14 ocras per day of very heavy Wheat, and even then we stopped to shock the grain out before evening. It takes the grain of the cut has the control of the cut has the control of the cut has the cut has the control of the cut has t shock the grain out before evening. It takes the grain very clean from the ground. It cut lodged grain very clean from the ground. It cut lodged grain remarkably well, and, in fact, a farmer having a well cleared off farm, and not too mountainous, can not add a more useful or labor-saving machine to his stock of utensils.

## Farmers, Attention!

## M'CORMICK'S

Reaping and Mowing Machine. REAPING MACHINE being now almost A universally regarded as a necessary impli-ment to the Farmer (and not much less so than the Plough, because of the high price of labor at the Plough, because of the high price of labor at the season of harvest and the great importance of the work to be done in a short time.) he should investigate carefully the principles of different machines and points of difference as well as the right of the Manufacturer to sell the same.

My machine operates with a Sickle Edge and Rod combined with a seat or stand for the raker, so that the grain is delivered at the side of the machine, and the binding made entirely independent of the cutting.

It is simple, of light draught, and will cut one hundred to three hundred arrest of grain without a second grinding and is warranted superior to every other Reaper in all kinds of grain, and graze, whether tangled and indged or otherwise.

therwise. That the ickle is the "true cutter," and that the Reel

otherwise.
That the ickl s is the "true cutter," and that the Reel is ludispensible to the successful operation of the machine through the harrest no longer admits of a doubt. These facts being attested by the thomands of my machines now in me—sold by myself and others infringing my patents, while a comparatively small number of machines known as "Hussey's Reaper," soith a smooth and very abrapt edge and sethout a red are in use.

As additional evidence of the great superiority of this machine, I may say that in the great West and North, where Reapers have been and are still in demand by thomands, and where I have sold more than 5000 Reapers, I have been subjected to the necessity of bringing suit against a number of manufacturers for the protection of my patents, and that explust Seymour & Morgan, of Brockport, New York, I have recently obtained a vertice of \$17,300 damages, and will here advise the Farmers against purchasing my machines in an altered (and so far injured) form from others under a different name, as purchasers are equally as liable as manufacturers, and suite are now pending against several concerns in Illinois, and others will be sued unless they make fair reparation for the past, and desist for the future. The first permiums of the States of Penneylvania, New York, Michigan and Wisconsin, have been awarded to my machines, and also the first premiums of the American Institute, and Franklin Iustitute, Philadelphia.
