Important to Farmers and Housekeepers! HICKOK'S PATENT CIDER MILL. In all former times it was supposed that a large quantity of cider could be made only by using a ponderous machine, that slowly crushed the apples without grinding them fine. They were made into a massive churn on a straw, and a heavy stone was used to press the juice out...

This Machine has been invented and the statement of a few facts may prove that it is not only the Best Machine of the kind in existence, but that it is the most profitable that a man can have on his farm. The apples used by this machine are put into a fine pulp, so that it requires but a compressed light pressure, and that but a minute or two, to extract all the juice, it being ascertained by practical experiment that One Fourth more can be obtained than by the old process. Besides this it requires only two hands to grind and make up into cider a large quantity of apples than can be possibly made on the old-fashioned machine. On this press, owing to the compactness of the machine in the tub and the complete manner in which it is ground, a pressure of three to five tons—which can be easily obtained—will produce a more favorable result than one hundred tons pressure on the ordinary cider press, even if the apples were ground as finely as on the improved Mill; and if the apples were merely crushed on the old machine, it would require a pressure of two hundred tons to produce the result accomplished by this Patent Mill. The following are added as decided advantages of this machine:

First—It makes more cider than any other press with a given quantity of apples, in a given time, and with much less labor and expense. Second—It makes cleaner and sweeter Cider than any other machine. Third—You can make your Cider as you like it, and when you want it—in quantities from one gallon to six or twenty barrels. Fourth—With it you can press Currants, Cherries, Berries, Currants, Butter, Lard and Tallow. Fifth—With it you can press ONE FOURTH of your time in making Apple Butter. Sixth—With it you can grind or chop your Apples, Potatoes, Turnips, Beets, Carrots, or Pumpkins, for Cattle. Seventh—By its use you can at all times have FRESH and SWEET Cider. The price of the Cider Mill, with right to use the same on any one farm, is \$35. Price of the Ross Cutting Cylinder, \$5. The size of this Machine is about 3 by 4 feet and weighs about 200 pounds. It may readily be taken to the cellar, door-yard kitchen, barn-floor, or orchard, as may be most convenient. For State, County or Township rights, or for Grants to make machines in certain territory for stated periods, address W. O. HICKOK, Harrisburg, Pa.

Persons in Union and the upper part of Northumberland counties and in Pennsylvania and Brush valleys, Center county, can procure the above Machines on application to H. C. HICKOK, Lewisburg, July 9, 1852.
