

DEMOCRATIC FLAG.

FOR PRESIDENT, GEN. FRANKLIN PIERCE, of N. Hamp. FOR VICE PRESIDENT, COL. WM. R. KING, of Alabama.

We this week open out in behalf of the principles and candidates of the Democratic Party. We are a little behind our next column neighbor in the start, but that is no serious cause of apprehension or uneasiness, for it often happens that the "last shall be first," in the long run; and such we imagine will be the ultimate result in the present instance.

Below the reader will find a letter from Lieut. R. C. Drum to Hon. Charles Shaler, of Pittsburg, Pa., again refuting the absurd charge of cowardice made by the more reckless of the whigs against Gen. Pierce.

More Testimony. Below the reader will find a letter from Lieut. R. C. Drum to Hon. Charles Shaler, of Pittsburg, Pa., again refuting the absurd charge of cowardice made by the more reckless of the whigs against Gen. Pierce.

Center County. The Democracy of this steadfast county have nominated Col. HENRY S. GROSS for Congress, and appointed Thomas Yearick and J. T. Hoover, Congressional Conferees.

The last Union Times says: "We regret to see so respectable a portion of our Democratic fellow-citizens of Lewisburg and White Deer committed in favor of the \$200,000 subscription."

At the recent commencement of Lafayette College, Easton, Pa., the Honorary degree of LL. D. was conferred on Hon. JEREMIAH S. BLACK, Chief Justice of Pennsylvania—a fitting and seasonable compliment to his eminent position and capacity, and profound legal attainments.

The Fountain, the organ of the Temperance party in Connecticut, holds the following strong language in reference to Gen. Pierce, as a man: "The Hon. Franklin Pierce, of New Hampshire, is the Democratic candidate for President of the United States."

well calculated to dampen the spirits of the most enthusiastic friend of SCOTT and GRAHAM, and lead him to doubt the availability as well as the invincibility of his favorite candidate. To the democracy it is equally encouraging, much better indeed than we had dared to hope for; it shows us that military glory is not to decide the present contest, but that the people are awake to the true issues, and disposed to decide them intelligently, which is all we ask to ensure our success.

In the glorious galaxy of States, in which those victories are to be achieved shall the name of Pennsylvania shine brightly as the Keystone of the Democratic Arch or be wanting altogether?—It is for you democrats of the Old Keystone to answer; never let it be said that in the advocacy of democratic principles, the support of democratic candidates, the Keystone faltered while the old North State stood firm.—KEYSTONE.

Below the reader will find a letter from Lieut. R. C. Drum to Hon. Charles Shaler, of Pittsburg, Pa., again refuting the absurd charge of cowardice made by the more reckless of the whigs against Gen. Pierce.

THE LEWISBURG WHIG.

FOR PRESIDENT, GEN. WINFIELD SCOTT, of New Jersey. FOR VICE PRESIDENT, GOV. WM. A. GRAHAM, of North Carolina.

A friend was recently in company with a number of gentlemen of the Pierce party, when the ruin of an Ironmaster who had until recently struggled to live under the Tariff of '46, was commented upon. One of the gentlemen remarked, "your county ought to give 100 more Democratic majority, now that Mr. — is down."

The incident struck us as one worthy of thought. The ruin of a man past middle age, who had invested in an honorable enterprise all the earnings of himself and his family, during a laborious and economical life, is commented upon as a party blessing. The scattering abroad of a large number of laboring men who had derived their support from an iron establishment, is considered as "good for 100 more Democratic majority."

Look at the silent Forges and Foundries over this State! Inquire for the miners who once wrought at Turtleville, on Montour Ridge, &c. &c. You will find half or three-fourths of the smaller iron works suspended totally. Only those establishments, which, having broken down the builders, are obtained for next to nothing, or the larger establishments, where a great amount of capital and peculiar advantages protect them, are now in operation, and many of those at a loss for, with the large capital invested, they can only go on—sacrificing, and hoping for better times—as the only means of avoiding a greater loss.

We never hear our people rejoicing over the destruction of farmers, or merchants, or mechanics; why is this fenshish exultation over the ruin of iron manufacturers? "What evil have they done?" The great wealth of Pennsylvania lies in her iron—one pound of which, worth a few pennies in a crude state, by manufacturing may be valued at thousands of dollars! To transform the raw material into the manufactured fabric—to convert poverty into wealth—is the business of the Ironmaster. What class of persons, or what branch of industry, does he injure? None—but he benefits the farmer, the mechanic, the day-laborer, the merchant, and all those engaged in other manufactures. No department of domestic industry is of more advantage to our country than the iron manufacture.

We ask, why then this political party hatred of the iron business? and we answer:—1st—because 9 out of 10 of those engaged in it ask for and need protection against foreign pauper labor and facilities acquired by age and capital, by a proper Tariff Law; and 2d—because they remember that a good Tariff Law was wrested from them by swindlers who obtained that power by professing to be the best friends of that Tariff, and of Pennsylvania interests especially. These two facts furnish the answer of the bitterness of the hatred of the Piercers to the great interest of Pennsylvania.

Twenty-nine Furnaces have been sacrificed under the Sheriff's hammer in Clarion county alone within one year. A No. of the Clarion Register of the 14th inst. is before us, which contains not less than 79 Sheriff's sales—sales of furnaces, saw mills, and sixty acres tract of land. That is an Iron county, and gave 1069 majority for Polk, Dallas, and the Tariff of '44!"

Why should not Dallas and other manufactures be made to flourish in our State, as well as Agriculture, Commerce, and the Mechanic Arts? Experience has proven and is proving that nothing but a Protective Tariff can properly develop the Iron interest. And the election of another Tariff President, and of Tariff Congressmen from Pennsylvania, would, we doubt not, induce the self-styled Democratic party to unite with the Whigs on the platform of Jeffersonian Tariff principles, and enact laws that shall enable our iron makers not to barely live merely, but to flourish and greatly increase.

Those who Polked in '44 We'll Pierce in '52." Is the burden of a "Song" printed, but not sung, by the Democracy. Whenever we see it, we are reminded of the old proverb, "If a man cheats me once, be the shame his; if he cheats me twice, be the shame mine." The confession of having cheated the people in '44, is unnecessary; they understand it; and they have no intention of having the game repeated at their expense.

The Pennsylvania Tariff men were Polked, 'tis true; but their interests need no additional Piercing from the same party.

The haters of Slavery in Ohio and New York were Polked with Silas Wright's opinion that they would curb that evil; they have not the notion, now, of Piercing themselves with the same folly again.

Vessels on the Western Rivers and Harbors have been Polked about against snags and on sand bars and rocks, and, at present; if the people there wish the system continued, they will be Pierced through with greater sorrow—which we think they don't intend to do.

The veteran leaders of the Democracy were Polked one side in '44, and as to being now Pierced upon the wall, and there transferred as defunct specimens of Old Foggies, they won't if they are not fools.

No, no, Messrs. Polkites and Pierce-ers! your design is too transparent; the people of your party did not appropriate your system, either in '48 or in choosing the convention of '52. Your only excuse is, that, like the old maid who took a very indifferent man for a husband, saying, "a poor husband is better than none," you agreed upon Pierce, rather than have no candidate, and resolved to "go through the motions," trusting that

"Those who Polked in '44 We'll Pierce in '52." The best we wish you, is that you may fail of your very honest aim, get soundly thrashed, and become good Jeffersonian Tariff Democrats for the balance of your lives.

Brownlow, the apostate Parson of Tennessee, formerly a Whig, but who opposed Taylor, says, "Pierce is too cold blooded a Yankee for him to support," and as he has advertised Scott as a big negro with a pack on his back, it is doubtful "where he shall go."

Greely, of the Tribune, advises all people not to bet on elections—it is demoralizing, and one effort only counteracts another: but if you will bet (he says) do not bet on Pierce.

The election in Boston of Delegates to the Whig State Convention of Mass., resulted in favor of Scott over Webster candidates. This ends the last organized schism in the Whig party, which is now better united than it was for Taylor two months before his election.

Greely, of the Tribune, advises all people not to bet on elections—it is demoralizing, and one effort only counteracts another: but if you will bet (he says) do not bet on Pierce.

J. H. & CO

Lightning Rods. AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, is beyond calculation, especially when the remedy is so easy to obtain—this is found in ARMITAGE'S Patent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Waller and many others that have examined them, recommended and approved them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid which belongs to the clouds, to beyond calculation, especially when the remedy is so easy to obtain—this is found in ARMITAGE'S Patent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Waller and many others that have examined them, recommended and approved them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property.
