LEWISBURG CHRONICLE & WEST BRANCH FARMER.

The Farmer.

☞The Election being past, and "the country saved" for at least nine months to come—and the Railroad question having been decided by the People—we gladly re-open our Agricultural Department.

We solicit original or selected contributions from all friendly to our object. No one, hardly, but may contribute something to the general interest.

Keeping Apples.

Mr. Pell, of Ulster county, the celebrated exporter of apples to Europe, recommends that apples, after having been carefully hand picked in baskets, should be laid on a floor by hand, without pouring from the baskets, until they are 15 to 18 inches deep, and left to dry and season three weeks; when again carefully packed in clean barrels, they may be kept, without rotting, any reasonable length of time, and safely sent to any part of Europe or the East Indies. The plan of drying and seasoning in the air, before barreling, prevailed generally some years ago, although, now-a-days, it is mostly discontinued, and thought useless. We are disposed to think well of this process when it becomes important to keep apples safely till next spring to send to foreign countries, for we have always observed that on opening a barrel a few days after being put up, in ever so dry weather, that the moisture often stands in drops over whole surfaces, and although loose barrels will allow it mostly to evaporate, yet where they come in contact, the two surfaces retain it and cause rot.

The carrying of apples in a common wagon, either before or after barreling, is injurious—they should be moved on springs or sleds. The abrasion of the skin, or crushing of the cell of the pulp containing the juice, allows fermentation and decomposition, and the consequent decay of the whole mass.

Apples will not freeze until at a temperature of from 5 to 10 degrees below the freezing point of water, and it is beneficial to keep them as cool as possible, even down to 30 degrees. Apples enclosed in a water tight cask may be left in a cold loft all winter without further care, and will be sound in the spring and perfectly fresh.—*Genesee Farmer.*

☞We have the gratification of stating that a Union County Agricultural Society—long talked of—is at length formed, by the decisive and determined efforts of the young men and others connected with the East Buffaloe Township Society. There were also persons in attendance from Buffalo, Kelly, Union, Lewisburg, and New Berlin, only.

The meeting called at the Court House last Saturday, was organized by appointing MARTIN DRIESBACH, of old Buffaloe, for President, and Samuel Weirick, Esq., of New Berlin, for Secretary.

Jacob Gundy, in the discharge of his duty as a Vice President of the State Society, stated the design of the meeting, and presented the form of a Constitution, which after some emendations was adopted, viz.

Constitution of the Union County Agricultural Society.

The name of this Society shall be the Union County Agricultural Society. The objects of this Society are to foster and improve Agriculture, Horticulture, and Domestic and Household Arts.

SECTION 1. The Society shall consist of all such persons as shall signify to the Executive Committee their wish to become members, and shall pay to the Treasurer, on signing the Constitution of the Society, not less than fifty cents; and annually thereafter not less than fifty cents; and also of honorary and corresponding members. The payment of five dollars shall constitute life membership, and exempt the members so contributing, from all annual payments.

SECTION 2. The officers of this Society shall be a President, one Vice President from every election district, a Corresponding Secretary, a Recording Secretary, a Librarian and such assistants as the society may find essential to the transaction of its business, and an Executive Committee, consisting of the above named officers and three additional members.

SECTION 3. The *President* shall have a general superintendence of the affairs of the Society. In case of the death, illness, or inability of the President to perform the duties of his office, the Executive Committee shall select a Vice President to act in his stead, who shall have the same power, and perform the same duties as the President, until the next annual election.

Vice Presidents.—It shall be their duty to take charge of the affairs of the association in their several districts, to advance all its objects, to call upon farmers to report as to the condition of agriculture in their neighborhood, to ask for information as to the mode of cultivation adopted by the different farmers, and all such matters as may interest farmers in every part of the county.

The *Treasurer* shall keep an account of all moneys paid into his hands, and shall pay bills when audited and aproved by the Executive Committee—each order for payment must be signed by the President or Chairman of the Executive Committee.

Corresponding Secretary.—The duty of this officer shall be to invite a correspondence with all persons interested in agriculture, whether in the county of Union or elsewhere, as to the introduction, cultivation and propagation of new seed, vegetables, or live stock. At each stated meeting of the Society, he shall read his correspondence, which shall, either the whole or such part as may be selected by the Society, form a portion of its transactions; he shall also correspond with the President or other officers of each County Society in the State, at least once in a year, for purposes of combined and mutual action, and to be informed of the result and progress of each other's efforts; also to invite mechanics to forward models or implements for examination and trial.

The *Recording Secretary* shall keep the minutes of the Society and of the Executive Committee, and at the close of each year he shall prepare for publication such parts of the minutes and transactions of Society as may be designated.

The *Librarian* shall take charge of all books, pamphlets, &c., preserve seeds, implements, or whatever property the Society may possess.

The Executive Committee shall transact the business of the Society generally; shall superintend and direct the publication of such of the reports and transactions as they may deem proper; and shall designate the time and place for annual exhibition, regulate the expenditures, examine all accounts, and keep such general charge of the affairs of the Society as may best promote its interest. They shall select their own Chairman, and meet quarterly, and at any other time when convened by the President. Five members shall form a quorum. They shall call special meetings of the Society when neccessary.

SECTION 4. The Society shall meet annually for exhibition, when, on the last day thereof, all the officers of the Society shall be elected, by ballot, for the ensuing year and until another election. They shall also hold a general meeting at the time of the annual exhibition, and special meetings whenever convoked by the Executive Committee. Ten members shall form a quorum for the transaction of business but no member in arears shall be entitled to the privileges of the Society.

SECTION 5. This Constitution may be altered or amended at the annual meeting by a vote of two thirds of the members in attendance.

About 25 or 30 memberships were then made, and the following Officers chosen:

President—JACOB GUNDY, East Buffalo.
Vice Presidents—Samuel Shadle, Perry.
do Daniel Witmer, Chapman.
do E. R. Mengas, Washingtn.
do H. C. Eyer, Penns.
do Henry Wetzel, Middleerk.
do John Swengel, Center.
do Jacob Beaver, Beaver.
do H. H. Margaritz, W. Beav.
do Jacob Sanders, Centerville.
do John Wilt, Hartley.
do R. B. Barber, Limestone.
do A. Swineford, New Berlin.
do Isaac Eyer, Union.
do Jno Gundy, East Buffalo.
do David Watson, West Buff.
do Wm. Vanvalzah, Buffalo.
do Geo. Dreisbach, Mifflinbg.
do Geo. R. Bliss, Lewisburg.
do Wm. N. Wilson, Kelly.
do Saml Henderson, W. Deer.
Treasurer—Robert H. Laird, East Buffalo.
Cor'g Sec'y—Richd V. B Lincoln, Hartley.
Rec'g Sec'y—O. N. Worden, Lewisburg.
Librarian—Samuel Weirick, New Berlin.
Executive Com.—Jas. P. Rose, Lewisburg.
do Isaac Slenker, New Berlin
do H. W. Snyder, Selinsgrove.

The Society then requested the publication of the Constitution, &c., in all the papers of Union county—and adjourned.

The Executive Committee will probably be convened during next Court Week, to decide upon the time and place of holding the FIRST FAIR. We hope there will be a spirited competition for the honor of having the First Exhibition of the Fruits and Industry of this rich central Agricultural county.

Our smaller neighboring counties—Center, Mifflin, Juniata, Perry and Northumberland—have Societies in successful operation. Union county should not be backward in so laudable a work to advance her most substantial interests.

The Society, to be vigorous and useful, needs a large number of members, each of whom paying the small sum of 50 cts. per year would furnish an amount sufficient to meet the wants of the Society without making the burden fall unjustly on a few. It should therefore be the work of every friend of the enterprise, to procure among his acquaintances as many names, and the money, as possible, and send in the first of next Court. This will be especially desirable for the Officers, to enable them to make proper preparations. Altho' it is the especial duty of the Officers to obtain Members, yet the same privilege is the equal right and duty of any other person interested in the work.

—Now for the noble strife—Middlecreek, Penn's Creek, and Buffalo!

Preserved Meats.

The most of mankind are determined to be carniverous, and eat all the meat they can get, whether nature designed them for this purpose or not. It therefore becomes rather an important question to them, how meat shall be preserved in the best possible manner for the purpose of food? There are several modes in use. The original primitive mode is to dry it, either in the sun, or in smoke. Lean meat, or the muscle of animals, may be dried in the sun, if cut into thin slices. This is known by the common name of "jerk beef." By smoke, all the parts of the meat, the fat as well as the lean, become impregnated with the pyroligneous acid, creosote and other ingredients of the smoke, and are therefore preserved from putrefaction. This forms what is familiarly called bacon.

Another mode is the very common one of packling it, and its preservation is owing, in the first place, to the salt combining with the watery and other juices of the flesh, and in the next place in keeping it from the air.

Another mode is to place the meat into tin canisters, after which the cover is soldered on tight, leaving a small hole in the top. These canisters are then put into kettles of boiling water, by which means nearly all the air is driven out, and the albuminous parts of the meat partially coagulated by the heat, and the hole is then soldered over. If this be faithfully done, the meat will be preserved almost any length of time, and may, by unsoldering the canister, be taken out and cooked like any fresh meat recently slaughtered.

Recently, a new plan for preserving meat has been devised and put into practice. Gael Borden, of Texas, exhibited, at the World's Fair, preserved provisions, in a form called meat biscuits.

These biscuits are prepared by boiling down the best fresh beef that can be procured in Texas, and mixing it with certain proportions of the finest flour. The essence of five pounds of the best meat, it is stated, is contained in one pound of the biscuit. This is concentrating it pretty well. It was stated by the committee who examined it, to be a material not liable to undergo a change, very light and portable, and extremely nutritious.

Dr. Playfair, to whom it was submitted for examination chemically, reported that it contained thirty-two per cent. of flesh forming principle. He stated that the starch of the flour was unchanged, consequently there could have been no putrescence in the meat employed in its preparation. This preparation has been used in the navy and the army, and found to be an excellent kind of provision, ten pounds of it being considered sufficient to support an active man thirty days. It ought to be more generally known.

IMMENSE CORN CROPS IN MISSOURI.—The Brunswicker of Sept. 25, says: The yield of corn this season in the Grand River country will be unprecendented, and will probaly bring forth the best fattened pork hogs we have ever had' as that will be the most ready way of turning corn into cash. Stock animals of all kinds are in great demand among us and we shall have for years a great market of all kinds of live stock. Three year old sell from $15 to $18; four year old at from $20 to $25; and sucking mule colt at $30.

GERRITT SMITH IN CONGRESS.—The well known Gerritt Smith has been elected to Congress from the district composed of Madison and Oswego counties, New York. Besides the abolition vote he received the support of many whigs and democrats. He is a man of great wealth, and has spent almost a fortune in philanthropic measures including more perhaps for the abolition cause, than any other man in the country. Personally, he is unsurpassed as a MAN.

METHODIST MISSIONARY APPROPRIATIONS.—The General Missionary Committee of the M. E. Church has been in session for some days, at the Mission Room in Mulberry street, New York. On Tuesday the Board of Managers of the Missionary Society met with the Committee, and $210,000 appropriations were made for the current year.

Funeral honors in memory of Daniel Webster are being paid throughout the country. Many who opposed him through life as e public man, are now foremost in lauding his transcendent talents, and his patriotism. "I STILL LIVE"—Webster's last words—are prophetic of the fame of a master mind.

The inauguration of Gov. Lane, as Governor of the Territory of New Mexico, took place at Sante Fe on the 25th of September. He was cordially received by the inhabitants, and appearances indicate that under his administration the peace and good order of the territory will be insured.

WOULDN'T VOTE.—At Brunswick, Glynn county, Georgia, no polls were opened at the Presidential election—it being the deliberate opinion of the good people there that none of the candidates were worthy of support.

Gov. UJHAZY advertises his farm in Iowa for sale. He is going to Texas, the climate of Iowa being too rigid for him.

Lightning Rods.

AFTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S
Patent Magnetic Lightning Rods,

and to this alone. This Rod has been examined by the most scientific gentlemen in the world—Professors M'Murtrie, Johnson, Walter and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in

Vine St. 3 doors above 12th, Philadelphia,

where all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

These rods have been purchased and successfully used by the following individuals, companies and corporations, whose names are cheerfully submitted:

In and near Philadelphia—A. & S. Roberts, George Sanbridger, Judge Bouvier, Judge Conrad, J. Mulford, John Hoome, C. C. Clatley, J. Bronner, G. Oakley, Conrad Ingersol, The Blockley Almshouse, Anderson & Brothers, Rev. J. L. Grant, John Norman, Thos. Grover, Bele & Hoome, A. R. Geakers, B. Sommers, Thos. Nast & Co., Mr. Downing, J. F. Greer, J. W. Watson, C. Humphreys, J. Eglesfield, Mr. Nyman, B. Barker, J. Overholtzer, C. Pepper, Mr. Sharpless, Mr. Martin, S. Brobley, J. Brinkley, Mr. Davison, Dr. Paul, S. H. Powers & Co., J. Winegarden, H. Miller, the Red Bank Hotel, the U.S. Arsenal, the Spring Garden Commissioners' Hall.

In the State of New Jersey—George Crispin, Judge Wall, Judge Dayton, John Notman, Dr. H. M'Murtie, Benj. Roberts, Mr. J. Downing.

☞The only authorized Agent for the Counties of Union, Juniata, Mifflin, Clinton, Lycoming, Northumberland, Montour, Columbia, Luzerne, is

SAMUEL HOOVER
Hartleton, Union county, Penn

Orders and letters addressed (post paid) to Mr. Hoover, will be promptly attended to. He has put up a number of these Rods in Union county, some of which may be seen as follows:

IN UNION COUNTY.

Foster, John Hass, Michael Peters, Jacob Smith, David Filmore, Reuben Mench, George Kleckner. *New Berlin*—Court House, and Commissioners' Office. *Limestone Tp*—John Reber. *Union Tp*—Dr. Charles Wilson. *Washington Tp*—John Kuntz, Simon Kuntz. *Penn Tp*—Isaac Cranston. *White Deer Tp*—Michael Hoffman.

RECOMMENDATIONS.

PHILADA., Aug. 13, 1847.

I have this day carefully inspected a conductor of Lightning Rod, with vane and index, erected by Mr. Thomas Armitage, on Bellevue House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

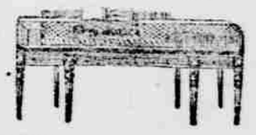
D. M'MURTRIE.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and believe he commenced the manufacture of these rods by examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample commendation of their utility and superiority.

TRACY E. WALLER, M. D.

Rising Sun, Philad. Co., April 10, 1852.

PIANO AGENCY.



HAVING been appointed Agent for the sale of the celebrated Pianos, manufactured by

GEO. VOGHT, Philad.,

the undersigned would be happy to supply any citizens of the Susquehanna country who may desire an Instrument well made, after the latest improvements. Two of these Instruments have lately been introduced into Lewisburg, to which I am happy to refer any one. The Pianos are are warranted, and if not satisfactory on trial for a year, they may be exchanged. Prices reasonable FRANCIS J. GESSNER.

17th. The celebrated named *STRENGTHENING PLASTER*, made from Dr. LIN'S recipe, and the most popular in the market.

18th. *DR. KLINE'S TOOTH ACHE DROPS.* A certain and easy cure for Tooth Ache.

19th. Dr. COMSTOCK has lately bought the right for the United States, of the celebrated *SARATOGA MINERAL WATER*, found at the Salt springs of Dr. Wm. C. Clowe, at St. Catherines, C. W. This medicine has attained a notoriety and popularity never before equalled by any proposition of that place, and its sale has been commensurate with its merits, which are extraordinary.

All the properties are fully described in ALMANACS, to be given to all who call where the medicines are kept.

NOTICE. All preparations heretofore known as COMSTOCK'S or COMSTOCK & CO'S, always belonged exclusively to Dr. Lucius S. Comstock; and though the signature of Comstock & Co will be continued, the extra label with the fac-simile signature of Dr. L. S. C. will in future designate the GENUINE.

ALL OTHERS MUST BE SPURIOUS.

LUCIUS S. COMSTOCK.

The above medicines can be had in Lewisburg only of J. & J. WALLS, who are the only dealers in the genuine COMSTOCK'S PREPARATIONS. 1yr44middle

CHERRY PECTORAL
For the Cure of
COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

TO CURE A COLD, WITH HEADACHE AND SORENESS OF THE BODY, take the CHERRY PECTORAL on going to bed, and wrap up warm, to sweat during the night.

FOR A COLD AND COUGH, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find, by taking the *Cherry Pectoral* on going to bed, they may be sure of sound, unbroken sleep, and consequently refreshing rest for at relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

From two eminent Physicians in

FAYETTEVILLE, Tenn., April 16th, 1851.

SIR:—We have given your *Cherry Pectoral* an extensive trial in our practice, and find it to surpass every other remedy we have for curing affections of the respiratory organs.

DES. DIEMER & HAMPTON.

TO SINGERS AND PUBLIC SPEAKERS this remedy is invaluable, as by its action on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

ASTHMA, in previously mild cases, is relieved, and often wholly cured by the *Cherry Pectoral*. But there are some cases obstinate as to yield entirely to no medicine. *Cherry Pectoral* will cure them, if they can be cured.

BRONCHITIS, or irritation of the throat and upper portion of the lungs, may be cured by taking *Cherry Pectoral* in small and frequent doses. The uncomfortable cough is soon relieved.

Rev. Dr LANSING, of Brooklyn, N. Y., states:—

"I have seen the Cherry Pectoral cure such cases of Asthma and fit to kills as leads me to believe it can rarely fail to cure those cases."

FOR CROUP Give an emetic of antimony, to be followed by large and frequent sips of the *Cherry Pectoral* until relief follows, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyspeptic sufferer, even in the worst symptoms of an attack, and simply tie the Belt round the body, using the Magnetic Fluid as directed; in a few minutes the insensible perspiration will set on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. From this cause the worst cases of DYSPEPSIA are PERMANENTLY CURED. A FEW DAYS IS AMPLY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.

THE INFLUENZA is speedily removed by this remedy. Numerous instances have been noted where families were protected from any serious consequences, while their neighbors without the *Cherry Pectoral*, were suffering from the disease.

SALEM, Ohio, 11th June, '51.

Prof. J. C. AYER:—I write to inform you of the truly remarkable effects of your *Cherry Pectoral* in this section. One of my daughters was completely cured in three days of a dreadful Whooping Cough, by taking it. Dr. Means, one of our very best physicians freely states that he considers it the best remedy we have for pulmonary diseases and that he has cured more cases of Croup with it than any other medicine he ever administered.

Our clergyman of the Baptist Church says that during the run of Influenza here this season, he has seven cure a from your medicine, he could scarcely have believed without seeing. Yours respectfully,

J. D. SINCLAIR, Deputy Postmaster.

Cures of severe diseases upon the lungs have been affected by *Cherry Pectoral* in such extreme cases as warrant the belief that a remedy has at length been found that can be depended on to cure the Coughs, Colds and Consumption which carry from our midst thousands every year. It is indeed a medicine to which the afflicted can look with confidence for relief, and they should not fail to avail themselves of it.

PREPARED AND SOLD BY JAMES C. AYER,
Practical and Analytical Chemist, *Lowell, Mass.*

☞For sale by C. W. SCHAEFLE, Lewisburg; J. H. Cashow, Milton; Miss M. M'Carr, Northumberland; G. W. Kessler, New Berlin; I. Gerhart, Selinsgrove; and by Druggist, everywhere. 1yismid106chgo

DRUG & CHEMICAL DEPOT!

Dr. Thornton & Christ,
Wholesale & Retail Druggists,

A Bargain!

A NEW Rockaway Carriage—with seats for four—for sale cheap by CHARLES S. CRITES.

THE acknowledged and extraordinary curative powers of these wonderful inventions is now so generally known and their sales and reputation throughout the whole country so extensive, that it would seem unnecessary to urge their merits further. But some late circumstances have occurred which render it a matter of duty to the public not to be altogether silent, for while the ephemeral nostrums of the day are trumpeted by columns through the Press and swallowed by quarts and gallons by the afflicted, and are found just good *for nothing.*

Christie's Galvanic and Magnetic Curatives,

have been quietly working their way among the most intelligent and respectable classes, and are constantly achieving cures in an alarming train of diseases, which have for ages baffled all the aid of medicine and all the resources of Science. These diseases are called

NERVOUS COMPLAINTS,

and in these diseases medicine is of no avail whatever. It never does good and it often does harm. Syrups, Extracts, Balms, Balsams, Elixirs, Bitters, Pills, Powders and Potions of every kind are alike worthless for they weaken the vital energies of the already prostrated system, while under the strengthening, vitalizing influence of Galvanism, as applied by this beautiful discovery, the exhausted patient and weakened sufferer is restored to former health, strength, elasticity and vigor.

These remarks relate to such diseases as NEURALGIA, TIC DOLOREUX, BRONCHITIS, PALPITATION of the HEART, WEAKNESS, and all FEMALE DISORDERS, such as NERVOUS HEADACHE, LASSITUDE, and DESPONDENCY, when in many cases they exist to an alarming extent, EPILEPTIC FITS and CONVULSIONS, which are now known to result from a non-application of Electric influence; NERVOUS TREMORS, BLINDNESS, which is nearly always caused by torpidity of the Auditory Nerves, and can always be restored to its healthy functions, as we have proved in DYSPEPSIA, in its worst forms; PALSY and PARALYSIS, uniformly caused by a deficiency of Nervous influence; CHRONIC RHEUMATISM, TORPIDITY of the LIVER, PAIN in the SIDE, STAGNATION of CIRCULATION, SPINAL and HIP COMPLAINTS, DEFICIENCY of NERVOUS and VITAL ENERGY, and all those distressing complaints arising from a DERANGEMENT of the NERVOUS SYSTEM.

In the above prevalent and terrible class of diseases—Nervous Complaints are much more numerous than is generally imagined—
