LEWISBURG CHRONICLE & WEST BRANCH FARMER.

Wit and humor.

A Good Courting Story.

That was a good courting anecdote our oid friend B. used to tell. The thing hap- a general assortment of FARMING utensils ject of the affections of B. was blessed in having an old codger of a father, watchful as an Argus, and jealous as a Turk, and withal a deadly hater of B. It was one cold night in w uter a romantically clandestine meeting was arranged. It was to take place in the very chamber of the damsel, which basides being a dormitory was a sort of business office for the old gent. As a matter of course fire and light were out of the question, as being instru ments to interrupt the course of true love which never did run smooth. The walls

were full of eracks and holes, and the frosty course B. must be off, and his charmer must be asleep; so one goes under the bed while the other takes a more comfortable while the other takes a more comfortable place above. The old man entered and to the dismay of B. sat down to posting up his accounts. Perfectly insensible to the coid, be kept on. The clock struck twelve WELL TIMBERED. WELL TIMBERED. The buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-traction of the buildings are a good Frame House, Coo-House, etc., and an excellent Spring of Water near the door. There is also crected a first rate Saw Mill and one and there was no sign of leaving. B. had become perfectly benumbed, and the only sign of muscular action was the castanct-like chattering of his teeth. Presently the old man got up. Was he going ? No; but he felt the cold. He lighted a few shavings, and sat down to his compound interest. No heat radiated to B. and the flame was tantalization. A gentle snore from above convinced him that the third party was oblivious to hi situation. The clock struck three-the flame had gone out, and by the light of the embers B. saw the old man depart. "J. rusalem !" our friend used to conclude hi touching narrative, "Jerusalem ! didn't) stradile those andirons ?" It is useles to add that the arrangement was broken up. Our friend to this day feels a cole chill at the recollection of it.

"Didn't know Beans."

On a late trip of one of the New Orleansteamers, she was crowded with German emigrants. As might be expected, after a long sea voyage, their appetite for fruit and vegetables was most voracious. At Selma, a short distance below St. Louis, the boat received some fifteen or twenty sacks of castor beans, consigned to Mr. Blow. The appearance of the beans, "good to the eye," excited the cravings of the emigrants. Finally, curiosity and appetite triumphed ; a ing 4 large rooms on the first floor, 6 bed bag was surreptitionsly obtained, a large rooms on the second floor, and two large panful extracted, and a buge luncheon of finished rooms on the third. POCKET SPIRIT LEVEL.

TERMAN'S POCKET SPIRIT LEVEL AND PLUM ATTACUMENT TO SQUARE THIS Level may be used in connection with a steel or other true square as a Leveling Plumbing Instrument, the base line being the level or horizontal line-the upright edge of the square being the plamb or perpendicu lar line.

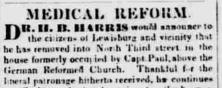

This compact and accurate instrument is adapted to every and any use that the common form of Level is serviceable in, and is far superior in regard to accurateness, compactness and durability to any other in use, and is less than half the price. It may be detached from the square and used separately as a level or carried in the pocket, not taking up more room

than a common pocket knife, thereby obviating the necessity of carrying about the cumbersome article now in use. The Bubbles used in these instruments are warranted not to evaporate or burst from exposure to sudden change of atmosphere (so often the case with the article now in the market) being made in the most perfect manner, and filled with alcohol full 95 proof. In offering this article to the public the inventor feels confident that in the hands of every mechanic this tool will speak for itself ; yet for the purpose of showing the trade in what estimation the instrument is held by those who have tested its merits, by putting it into practical use, he would respectfully call their attention to the accompanying certificate, given by some of the most scientific mechanics in the United States :
