Officers of the Union County Agricultural Society. President-JACOB GUNDY, East Buffalo.

Vice Presidents -Rec'g Soc'y-O. N. Worden, Lewisburg. Executive Com .- Jas. P. Ross, Lewisburg. Isanc Slenker, New Berlin | wholesome food. Hy W. Snyder, Peuns.

Members Wanted-Why?

County Agricultural Society are urgently bers, immediately. This is absolutely necessary, for the following reasons:

1. To give premiums, money is indisknow how much money they have to expeud.

and exercise other privileges of the Society : if none but Members can be upon Committees to Award Promiums-certainly, we require a great many members

large number to make up expenses.

4. February Court will soon be with us scribers should be completed, and the time ded or chopped fine, are excellent, as they and place of the First Fair, fixed.

If any Vice President will not " magwify his office" by attending to his duty, let some other friends of progress in his Township or Borough, "take the responsibility," and procure subscribers.

De There is work to be done, to make the Society what it should be. Much depends upon a good start. The premiums should be made out very early, so that noon, especially if they are in rather a dark Farmers and other friends could have Spring, Summer and Fall, in which to labor with definite aims before them in their relation to the Society.

### Plans and Prospects.

lers have superseded the flail in threshing egg in January. The next winter, we and the shovel and tub in corn shelling; tried what could be done with the same Christmas festivities at greater leisure - mostly old hens. #### Important to Farmers and Housekeepers! HICKOR'S PATENT CIDER MILL.

N all former times it was supposed that a large quantity of Cider could be made only by using a ponderous markine, that slowly crushed the Houser, will be promptly attended to. He has apples without grinding them fine. They were put up a number of these Rods in Union county. then made into a massive cheese in straw, and a most severe and long pressure was required to extract a portion of the eider, a considerable portion being absorbed by the straw and the mass of romice, and to obtain this unsatisfactory result he farmer had to take all his hands and perhaps his six horse teams and devote a whole day that could have been more profitably employed, to make from six to twelve barrels of cider. To obviate the difficulty the farmers have beretofore Li hining liest, with vace and index, exceted by Mr Thomas Armitage, on Bellevine House, disquester, and have no hestation in saying that it is not and whe be-I have ever seen, but that it is the only one I have ye

# This Machine

has been invented, and the statement of a few facts may prove that it is not only the Best Machine of the kind in existence, but that it is the most profitable that a man can have on his farm. The apples are by this machine grated up into a fine pulp, so that it requires but a comparatively light pressure, and that but a minute or two, to extract all the cider, it being ascertained by practical experiment that One Fourth more can be obtained than by the old process. Besides this it requires only two hands to grind and make up into cider a larger quantity of apples than can be possibly made on the old-fashioned machines. On this press, owing to the compactness of the pomice in the tub and the complete manner in which it is ground, a pressure of three to five tons-which can be easily obtained—will produce a more favorable result than one hundred tons pre-sure on the ordinary cider press, even if the were ground as finely as on the improved Mill; and if the apples were merely crushed as on the Nut machine, it would require a pressure of two hundred tens to produce the result accomplished by this Patent Mill. The following are adduced as decided advantages of this machine: First-It makes more Cider than any other press, with

a given quantity of apples in a given time, and with much less tolor and expense.

Noond—It makes cleaner and sweeter Celer than any other markine.

Third—You can make your Cider as you want it, and when you want it and in quantities from one gallon to six or twenty borreis.

Facts. With it you can press your Corrants, Cherrics, Errics, Cleves, Earles, Lard and Tallow.

Fifth—With it you can save ONE FOURTH of your time in making Apple Butter.

Soth—With it you can grind or chop your Apples, Pota toss, Turnips, Beets, Carrots, or Patapkins, for Carlie, Seoth—By its use you can at all times have FRESH and SWEET Caler.

The price of the Cider Mill, with right to use the same on any one form is \$325. Price of the

the same on any one term, is \$35. Price of the

Root Cutting Cylinder, \$5.

The size of this Machine is about 3 by 4 fe and weight about 200 pounds. It may readily be taken to the cellar, door-yard, kitchen, barnfloor, or orchard, as may be most convenient. For State, County or Township rights, or for Grants to make machines in certain territory for stated period, address (post paid)
W. O. HICKOK, Harrisburg, Pa.

Persons in Union and the upper part of Northumberland counties, and in Penns and Brush valleys, Center county, can procure the above Machines on application to H.C. HICKOK.

RECOMMENDATIONS.

PRILADA. Aug 13, 1847.

I have this day carefully inspected a conductor or intuing first, with value and index, exected by Mr.

I am well satisfied that the Magnetic Lightning Red

naturate tured by Mr. Thomas Armitage, of Philadelphia s the best that has ever been made. I have spent severa cars in the study of the laws of electricity and magnet

years in the study of the laws of electricity and anguests an and have no hesitation in saying that these Robs are constructed upon the only principle of asfety. The electric shock is received and dispersed by the magnet at the top of the roal and it would be impossible, according to the laws of attraction and repulsion. For a building to be injuried by a streke of lightning when protected by one of those rods. I have been acquainted with Mr. Armitage for several years, and be for he commonwed the manifesture of these rods I examined the principle on which they

are constructed, and 1-14 convinced that their neighbours and the attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ampie commendation of their unitity and superiority.

# THE ONLY TRUE

# PORTRAIT OF WASHINGTON.

UST published, T.B. WELCH's magnificent Portrait of 10 A. S. C. 25 Des engranot portrait, in the Athanaeum, Boston.

This superb picture, angraved under the superblandence of THOMAS SULLY, E.q., the eminent and highly
giffet artist, is the only correct likeness of Washingtonver published. It has been characterized as the greatest
work of art ever produced in this country. As to its finality, we refer to the letters of the adopted son of Washington, Gronos Washington Parks Curie, who raps, "it is
a feethind representation of the caceboard or ginal," and
incline Justice Taker of the Supreme Court of the United States, who says. "As a work of art its excellence and
beauty must strike every one who sees it; and it is no less
hopps in its likeness to the Father of his country. It was
my good for une to have seen him in the days of my toylessed and his whole appearance is yet strongly impressed
on my memory. The portrait you have requested
on my memory. The portrait you have requested
to me to be an exact likeness, representing perfectly the
expression as well as the form and features of the face."
And says Severage as see, if or the like representation of
the greatesigned. Practices Frincent ways, "the great
work is admirably town the days of the
pairwang of the public." Sees Matenas C. the eminentastructure of the country of the pairwang of the public." nal portrait, in the Athanaeum, Boston. States, active and enterprising MEN, my g engage in the sale of some of the best books

will have such inducements obsered a senator them to make from \$3 to \$510 a day profit.

The books published by us are all useful in character, extremely popular, and command large sales wherever they are offered.
