MARCHIS'S UTERINE CATHETER.

WE now come to the most important medicine of the day, when the number of those afflicted is taken into consideration, and when it is remembered that until the introduction of this remedy it was impossible to remove the disease without mechanical means and by a painful course of treatment.

Dr. Marshall's Uterine Catheter is the discovery and invention of Dr. Theodor Pomeroy, of Utica, an old and successful medical practitioner. Its peculiar efficacy was suggested by unexplained developments in a case of Prolapsus Uteri, while other treatment for another complaint, the protraction in this instance to a course of long and severe study, which resulted in the continuation of the disease, led to the discovery of this medicine.

THE NEW FOUNDRY

IS now carried on as usual, at the upper end of Market street, where every description of CASTINGS is kept on hand or made to order--such as

CHRIST & FRICK.
