I have this day carefully inspected a conductor or lightning Red, with vane and index, erected by Mr. homas Armitage, on Bellevue House, Glemester, and are no heatather in saying that it is not only the best have ever seen, but that is it the only one I have yet omined that is onstructed on strictly scientific principle. It is with much pleasure that citizens of the Susquehonna country desire an Instrument well made, after the latest improvements. Two of these Instruments have I am well estisfied that the Magnetic Lightning Red, manufactured by Mr. Thomas Armitage, of Philadeiphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magneticm, and have no hesitation in saying that these looks are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the red, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquisinted with Mr. Armitage for accornal years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete assesses. The increasing demant for these rods, and the extensive sales in all parts of the country, is ample commencedation of their utility and superiority.
