WE now come to the most important medi-cine of the day, when the number of those afflicted is taken into consideration, and when it is remembered that until the introduction of this remedy it was tho't impossible to remove the disease without mechanical means and by painful course of treatment. Marshall's Uterine Catholicon

Marshall's Clerine Catholicon Is the discovery and investion of Dr. Theodore Pomeroy, of Utics, an old and successful medical practitioner. Its prealine effracy was suggested by unexpected develop-ments in a case of Prolapses Uter while nuclear treatment for another complaint. The suggestion in this instance led to a course of long and severe study, which resulted in the combination of the Catholicon. We have seen so much pain and patient endurance of suffering in these who balored under these diseases, with the conviction that there was no cure, that we field this medicine will, are long, be demied an insettimable sequipition.

The acknowledged and extraordinary curative powers of these wonderful investions is now so geo-erally known and their sales and reputation through out the whole country so extensive, that it would seem unnecessary to urge their ments further. Bu-nome late circumstances have occurred which render it a matter of duty to the public not to be also render it a matter of duty to the public not to be also render it a matter of duty to the public not to be also render it a matter of duty to the public not to be also render when the transmitter of the solution of the day are trumpeted by columns through the Frees and swallowed by quarks and gallons by the afflicted, and are found just good for metang. there was no cure, that we fiel this medicine will, ere-long, be deemed an inestimable acquisition. A physician of much emissions, after examining the medicine, and observing its effects, remarked that "a new era had sprung up in the lives of females, and that did they understand in the least degree the virtues of the re-medy, and the inability of the profession to treat their cases, they would not long waste their money in decirs's bills, nor yet suffer from the tortune of a curable disease." This medicine is a certain cure for Profagens Uteri, (Failing of the Womb.) Profuse Eischarges and Fainful Menstruation, Lucherthers, or Whites, and for most of the distructing Complexitie incident to Females. "Now what do you think of the variety called Shank-highs, whose name don't belie them? I tell my wife they have no body at all, and that when the head is cut off the legs come right apart : am I right ? Neighbor Buckingham's wife says they're the beatenest things to lay on airth, and that they sit and lay both at onst. I don't believe it-it's contrary to nater. I think they only recline a little, as it were, and-Jerusalem ! how can them things set ? my jack-knife can set as well as they can. I tell you, Mr Editor, they put things out of joint too, dreadfally. When Buckingham's wife got her Shankhighs home the other day, old Kink happened to hear the rooster crow the first time, and not knowing anything about the matter summoned half the hands on the place to come and help get the old blink-eyed mule out of the crib. Old Kink says day don't sit on de roost same as odder chicken nohow, but dey sits straddle of de stick, cause why, when dey 'tempts to sit same as common chicken de head aint hebby 'nuff for de legs and day falls off backward. Correct philosophy that. They sit when they eat, I know, for I've seen 'em do it ; and I've seen 'em try to cat standing, but 'twas no go, for when they peck at a grain of corn on the ground they don't more'n half reach it, but the head bobs right between their legs making all the trass plates and knots completely melted off. them turn a complete somerset. May-be they're like swinged cats, worse than they look, and that's bad enough, anyhow. I'd as soon see a pair of tongs or compasses walking about the yard, as these Shank-highs. And I had like to have forgot to tell yon, that Pete says they're log liars, 'cause dey crows long time 'fore day in de mornin' when 'taint day; but, Kink says, Pete don't 'flect dat deir legs is so long, dey see daylight long time 'fore common they're like swinged cats, worse than they doy see daylight long time 'fore common doint at the American institute. "I have been using Christie's Galvanic articles in a quiet way among my patients for about two years past, and I couless I am astomaled at their success. If I am sure a disease is Nervess, I know just what they will do. In Epileptic Fits, particularly in children: Deafness and Affections of the liend in adults. Laralysis and Falsy, in all ages, and indeed several other diseases of like nature which have long puzzled the profession. I have found the Galvano articles of surprising benefit. Although I detect the shameless quackery of advertisements and new-papers. In must express my confidence and belief in the wonderful virtues of CHRISTIE'S CURA-TIVES. My name is, of course, confidencial bet I shall never besitste to recommend your articles en-all proper occasions." ONE self-evident, and worthy of every consideration, that no Miller can make good clean flour without he has good clean wheat. I suppose you wish to know the remedy. I tell you-it is to get one of Bergstresser's Wheat Scourers, or Smut Machines. He being an old, practical and experienced Millwright has invented, got up and put in successful operation the best Wheat Scourer now in use. Any person ANOTHER INSTANCE OF CANDOL To D. C. MORTING, M., D., Gen. Agt for Dr. Cinserie, New York. Deer Sir, -Daing a physician in the vicinity of one of your Agents, I have been much gratified in the examination of your Galvanic Curaires, and highly pleased with their practical results. I have observed that they are constructed on the true scien-tific principle for the Foule, and, pleasant and se-tematic development of the Galvanic Current, theraby filling a disideratum, long songht for, but beratologo unknown. I cheerfully recommend them for the alleviation and cure of those distressing ailments ealled Neurone Courtainers, for which they are se-bargelly and ingeninnally designed.
