MARCHISI'S

UTERINE CATHOLICON.

WE now come to the most important medicine of the day, when the number of those afflicted is taken into consideration, and when it is remembered that until the introduction of this remedy it was tho't impossible to remove the disease without mechanical means and by painful course of treatment.

Marchisi's Uterine Catholicon [Merchise's Uterine Catholicon

Is the discovery and invention of Dr. Theodore Pomeroy, of Utera, an old and successful medical practitioner. Its peculiar effects was suggested by unexpected developments in a case of Prolapars Uteri while under treatment for another complaint. The suggestion in this instance led to a course of long and severe study, which resulted in the combination of the Catholicon. We have seen so much pain and patient endurance of suffering in those who labored under these diseases, with the constituent that there was no cure, that we feel this medicine will, ere long, be deemed an inestimable acquicition.

A physician of much endurence, after examining the medicine and observing its effects, remarked that "a new era had sprung up in the lives of females, and that did they understand in the least degree the virtues of the remely, and the inability of the profession to treat their cases, they would not long waste their money in doctor's tills, nor yet suffer from the forture of a curable disease."

This medicine is a certain cure for Fredness Uteri, Falling of the Womb, Fredness Discharges and Fanfau Menstruation, Lucharrhea, or Whiles, and for most of the dentance inclined to Eventue.

To illustrate the use of the GALVANIC BELT, suppose the case of a person affected with that bane of civilization, DVSU/PSIA, or any other Chrenic or Nervous Disorder. In ordinary cases, stimulants are taken, which, by their action on the nervoe and muscles of the stomach, affect transcency relief, but which leave the patient in a lower state, and with igured faculties, after the netion thus excited has based. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyseptic sufferer, even in the worst symp.

"I have been using Christie's Galvanic articles in a quiet way among my patients for about two years past, and I confess I am astonished at their success. If I am sure a disease is Nervous, I know just what If I am sure a disease is Nerrous, I knew just what they will do. In Epileptic Fits, particularly a children; Deafness and Affections of the head in adults; Faralysis and Paley, in all ages, and indeed several other diseases of hise nature whice/have leng puzzled the profession. I have found the Galvaria articles of surprising benefit.
