pullets over their first egg; and each old lady that had set a stitch for the 'Circle,' took full credit for every conversion, reserving but a small share for the missionary.

No one followed up the meetings more constantly than a little old woman with a wizzled-up face, of the shape and color of a cocoa-nut. Her head was deposited in the extreme corner of a huge, flaring honnet, of a fashion that had out-run the memory of man. This was the veritable DESIRE AYRES. Nor had the new growth of boys ceased to tease her.

To-night there is a meeting at Deacon F—'s. It is November, and the house is crowded. Mr. P—— stands in the door-way, where the 'keeping-room' opens into the kitable.

RECOMMENDATIONS.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index creeted by Mr. Thomas Armitage, on Bellevue House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific princi-ples. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

II. McMURTRIE.

conductor to the attention of owners of buildings.

It MeWIRTRIE.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have speat several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repuission, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensivessles in all parts of the country, is ample commendation of their utility and superiority.

The acknowledged and extraordinary continuous of these wonderful inventions is now so generally known and their sales and reputation through out the whole country so extensive, that it would seem unnecessary to urge their merits further. But some late circumstances have occurred which reder it a matter of duty to the public not to be altogether atlent, for while the ephemeral nortune of the day are trampeted by columns through the Press are swallowed by quarta and gallons by the affacted, and are found just good for mething.

Christle's Galvanic and Magnetic Curatives. have been quietly working their way among the most intelligent and respectable classes, and are constantly achieving cures in an alarming train of diseases, which have for ages baffled all the aid of medicine and all the resources of Science. These diseases are called

- NERVOUS COMPLAINTS.

And in these diseases medicine is of no avail what ever. It never does good and it often does harn. Syrupe, Extracts, Baims, Palsams, Elizars, Bitter, Pills, Fowders and Fotions of every kind are alike worthless, for they weaken the vital energies of the already prostrated system, while under the strength ening, life-giving, vitalizing influence of Galvaniam, as applied by this beautiful discovery, the echanical patient and weakened sufferer is restored to forast health, strength, clasticity and vigor.

These remarks relate to such discasses as NU. RALGIA, TIC DOLOREUX, RRONGHITS, FALPITATION of the HEART, WEAKNESS and all FEMALE DISCRIDERS, such as NELVOLS HEAD ACHE, LASSITUDE and DESPONDENCY, which are only other names for Nervous Derangement, EFILEITIG FITS and CONVULSIONS which we now known to result from a non-equilibrium of Electric influence; NERVOUS TREMORS, EAR 5488, which is nearly always caused by terping of the Anditory Nerves, and can always be profess under the Anditory Nerves, and can always be profess or the Anditory Nerves, and can always be profess or the Nervous of the LIVER, FAIN in the SDP, SLUGGISH CE, CULATION, SINAI, and BIP COMPLAINING. NEVER FAIL:

NEVER FAIL!

The great populiarity and excellence of the GALVANI CURATIVES consists in the fact that they arrest and cure disease by outward application, in place of the usual method of Drugging and Physicking the patient till exhausted manue sinks hopelessly under the infliction. They strengthen the whole system equality the circulation of the Blood, primite the secretions, insignate the rather energies, and can sever do the slightest have under crup circumstance. Since their introduction in the United States, only three years since, more than

"Throw Physic to the Doors"

"Throw Physic to the Dogs."

To illustrate the use of the GALVANIC BELT, suppose the case of a person afflicted with that base of civilization, DYSFLESIA, or any other Chronic or Nervous Disorder. In ordinary cases, stimulants are taken, which, by their action on the nerves and nuscles of the stimuch, aford seaponary relief, but which leave the petient in a lower state, and with highered faculties, after the action thus excited has based. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyspeptic suffere, even in the worst sympoms of an attack, and simply tie the Belt round the Ecdy, using the Magnetic Fluid as directed. In a their period the insensible perspiration will act on the positive element of the Belt, thereby cauting a Galvanic circulation which will pass on to the negative, and these back again to the positive thus keeping up a continuous Galvanic circulation throughout the system. Thus the most severe case of DYSFLESIA are FERMANENTLY CURED. A FEW DAYS IS AMPLY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.
