Editorial Visiting.

One day last week, we were favored with a "pop visit" from H. C. HICKOK, Esq., the facetious editor of the "Chronicle," A NEW STOCK IN TRADE. published at Lewisburg, Union county, Pa. We found him to be one of your good, clever, "how are you, sir?" kind of a chap, free and easy in his manners, and withal, of just the right kind of material to make a good editor. We are always pleased to have our editorial brethren give us a call when visiting our Borough. It looks sociable. We promise all a hearty for Men and Boys, ever offered in Lewisburg welcome, even though they do find us with our coat off, setting type, running press, Gaiters, half-Gaiters, etc. washing rollers, or scribbling for the amusement of our patrons. PRIMARA, Aug. 13, 1847.

I have this day carefully inspected a conductor or Lightning Rod, with came and index, exceted by Mr. Thomas Arminge, on following House, Gloncoster, and bove no hasitation in raying that it is not only the best. I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his constructed to the attention of owners of buildings.

conductor to the attention of concerts of business.

It am well satisfied that the Marmetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadeiphin, is the best that has very been male. I have spent several years in the study of the have of electricity and magnetism, and have no hesitation in saying that these Rods are constructed usen the endy principle of safety. The electric shock is reasted and disputed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and reputation, for a building to be injured by a strike of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examines; the principle on which they are constructed, and left convinced that their adoption would be attended with complete success. The increasing sould be attended with complete success. The increasing temand for these rods, and the extensive sales in all parof the country, is ample commendation of their utility an superjectly. Ter acknowledged and extraordinary curative powers of these wonderful inventions is now acgenerally known and their sales and reputation through on the whole country so extensive, that it would seem unnecessary to urge their ments further. But some late currentances have occurred which render it a matter of duty to the public not to be shingether allent, for while the ephemeral mostroms of the dar are trumpeted by evolumes through the Freez are evolutioned by quarts and gallons by the afficted, and are found just good for nothing.

Christie's Galvanic and Magnetic Curatives have been quietly working their way among the most intelligent and respectable classes, and ar-constantly achieving cares in an alarming train of discusses, which have for ages infield all the aid of medicine and all the resources of Science. These discusses are called

To D. C. Monemean, M. D. Con. Agt. for Dr.

Genstre, New York.

Deer Sir.—Being a physician in the vicinity of
one of your Agents, I have been much gratified in
the examination of your Galvanic Curatives, and
highly pleased with their practical results. I have
observed that they are constructed on the true scientific principle for the goatic ser, siscered and ontimed development of the Galvanic Current, thereby
filling a disideratum, long sought for, but heretofore
unknown. I checurally recommend them for the
alleviation and cure of those distressing allmans
called Nerveus Companions, for which they are of
happily and ingeniously designed.

Very truly yours, DAVID RICE, M. D.
