School-House Dedication.

BY BEY, H. D. MOORE.

Let others wake the boastful strain To sculptured temples rare, And how before the gorgeous fane, To pay their worship there;

But we will raise a nobler song, The song of Freedom's band.

And sing—while joy the strains prolong—
The School-House of the land! Let myriad serfs, in other lands,

Adore the Conqueror's name, And rear aloft, with slavish hands, The monumental fane— But we will rear, with honest toil, From inland to the coast, The School House—fruit of Freedom's so Our country's pride and boast!

Has died away their fame;
But ask, O sons whose fathers bled!
The trophies of their hands—
Their shades with majesty are led
To where the School House stands.

Go, ask of Kings to tell you o'er

Hail, School House! Temple of the Free, The shrine where Freemen bend, The bulwark of our liberty, Do thou our homes defend; And while our rivers flow along, And hills adorn the land, Let every heart awake the song—
"E'er may the School House stand!"

As regarde the application of single officers for admission into the lowest dregs of society for a period, the Turkish army, Kossuth writes, that the Saltan avers, "that it was of no interest to the Porte, to employ single Generals or ther officers of the late Hungarian Army. but that he will only accept the services of those, of itally, who make their appearsace in Constantinople in company of Kossuth."
