This Rod has been examined by the most scientific gentlemen in the world-Professors M'Mortrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leasing the conductor. EECOMMENDATIONS.

I have this day excefully inspected a conductor or Lightning Red, with vare and index, exceted by Mr. Thomas Amnitors, on Relievus House, Gloucester, and have no lessitation in saying that it is not only the heat I have ever-zeen, but that it is the only one I have yet exemined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

Less with mich pleasure that I recommend his conductor to the attention of owners of buildings.

conductor to the attention of owners of buildings.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magneticm, and have no heatstains in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and requision, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been sequalized with Mr. Armitage for several years, and before he commenced the manufacture of these rods. I excluding the principle on which they are constructed, and fill convinced that their adaption would be attended with complete success. The increasing demand for those rods, and the extensive sales in all parts demand for those rods, and the extensive sales in all parts are constructed, and 6-H convinced that their adoption would be attended with complete success. The increasing demand for these reasonal the extensive sales in all parts of the country, is ample communication of their utility and superiority.
