They have been successful-the Governor's scruples were laid aside, and he has been graciously pleased to sign the bill. That this road will be speedily completed, there can be no doubt. There is capital enough interested in the work to complete it; and when finished, there will only remain a short link to be made to Ridgeway, to connect with the Eric road and the Allegheny Valley road, thus making a shorter and cheaper route from Philadelphia to Eric and the Lakes, than by the valley of the Susquebanua.

Lightning Rods.

A FTER many years' close investigation and numerous experiments, the Patentec takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in ARMITAGE'S

Datent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world-Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend an large and well selected stock of fresh speak of them in the highest terms of approbation and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throwback a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other

dvantages over the old one. The only place of manufacturing is in Vine St. 3 doors above 12th, Philadelphia, where all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

RECOMMENDATIONS

I have this day carefully inspected a conductor or lightning Red, with case and index, exected by Mr. Thomas Armitage, on Reflexuse House, Goncester, and have no hesitation in saying that it is not only the best have ere seen, but that it is the only one! have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

H. MCMURTRIE

In MeWikhthe I am well satisfied that the Magnetic Lightning Red, manufactured by Mr. Thomas Armitage, of Philadelphia, is the lest that has ever been made. I have spent several years in the study of the laws of electricit and magnetism, and have no hestation in saying that there Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and regulation, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demant for these rods, and the extensive sales in all parts of the country, is ample commenciation of their neighty and emerge of their mility and emerge of the mility and emerge of their mility and emerge of their mility and emerge of their mility and emerge of the militage of their mility and emerge of the militage of their militage of the militage of the militage of their militage of the mi of the country, is ample communication of their utility as superiority.
