Lightning Rods.

A FTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S Datent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world-Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation. and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throw back a part of the electric fluid barmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of lea-

wing the conductor. This rod has many offer advantages over the old one. The only place of Vine St. 3 doors above 12th, Philadelphia. there all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

Orders promptly attended to. Terms cash. These rods have been purchased and success-

RECORNEY ATIONS.

Pittaba, Aug. 13, 1847.

I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erected by Mr. Thomas Arminage, on Bellevus House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

H. McMURTRIE.

conductor to the attention of owners of buildings.

It. McMURTRIR.

I am well satisfied that the Magnetic Lightning Red, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has over been made. I have spent several years in the study of the haw of electricity and magnetism, and have no heatisation in saying that these Reds are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and regulation, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is ample commendation of their utility and superiority.

Christier, New York.

Dear Sir, - Deing a physician in the vicinity of
one of your Agents, I have been much gradied in
the examination of your Galvanic Curnives, as
highly pleased with their practical results. I have
observed that they are constructed on the true sciatific principle for the gentle, soft, pleasant and extimal development of the Galvanic Current, theely
filling a disideratum, long sought for, but hereighte
unknown. I cheerfully recommend them for the
alleviation and cure of those distressing albeits
called Nervoux Courteavur, for which they are as
happily and ingeniously designed.

Very truly yours, DAVID BICK, M. B.
