"I don't like his rig, but Josephine thinks he's 'some,' " was the reply.

"Whether you like it or not, it's my opinion he'il make a tip-top husband,' centinued the mother.

"Put her through, mother," said Jose phine, blushing.

"Go in lemons," suggested Napoleon, smoking through his nose; a remark, by the way so ambiguous, that it must have puzzled the other parties to have guessed his meaning; but, in the present case, it seemed to be invested with perfect lucidity.

" Napoleon, I advise you to shut up your hopper!" retorted the young lady. Mr. Stout then proceeded to inquire it

Mr. Rustle was a man of property, and was assured by his better half, that he had a "nocket full of rocks." The husband and father then remarked to the effect that he had been more favorably impressed with Mr. Goodwin, a young farmer in the neighborhood, than with the gentleman under consideration

Mrs. Stout manifested a different opinion on the subject, emphatically declaring that " he couldn't come in."

"He is over that way," said the brother, making a gesture over his left shoulder with his thumb.

The Eclipse. A. M. Root, of New York, took twenty

eight dagnerrotype views of the sun dur ing the progress of the eclipse. We have already heard of a few

jokes played upon spectators.

A cute doctor, in New York, made himself very agreeable in exhibiting the eclipse to a crowd at the corner of Cortlandt and Greenwich streets. He lent them his smoked glass freely, and kindly placed each spectator where he could see a dark line dividing the uncelipsed portion of the sun. Many speculations as to its cause were indulged in, but at length the waggish doctor solved the mystery by point-

ing to the intervening telegraph wire.

The printers of the Miners' Journal, (Pottsville,) hoisted a large copper roller mould on a temporary tripod in the street, and soon collected a crowd, spectators were invited to take an observation; but the only thing visible was at the other end of this pseude telescope, in plain printed sharacters, the word SOLD!

A gentleman in Lewisburg had one glass darkened with smoke, and another with black paint. "It is said" that some to whom he loaned the latter proclaimed a soul ectipse !

Lightning Rods.

A FTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the time principle of protecting families. dwellings and property from the destructive influence of LIGHTNING. The calmities that every City, Town, Village and Country falls victim to annually, theo' the gross negligence of s mhabitants, is beyond calculation, especially when the remedy is so easy to obtain-this is

ARMITAGE'S Datent Magnetic Lightning Rods. and in this slone. This Rod has been examined by the most scientific gentlemen in the world-Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation and have pronounced them the only safe rods in use in this or any other country for the protection of Lives and Property. One advantage is to divide and throwback a part of the electric fluid barmless o the clouds ; in time of a stroke this combles the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of

manufacturing is in Vine St. 3 doors above 12th, Philadely here all persons are respectfully invited to call and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.

RECOMMENDATIONS.

RECOMMENDATION.

RECOMMENDATION.

I have this day carefully inspected a conductor or Lightning End, with vane and index, erected by Mr. Thomas Armitage, on Bellevue House, Glomester, and have no heritation in eaying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much piezawre that I recommend his conductor to the attention of owners of buildings.

B. MEMURERIE.

conductor to the attention of owners of buildings.

It am well satisfied that the Magnetic Lightning Red, manufactured by Mr. Thomas Armitage, of Philadelphia is the best that has ear been made. I have spent several years in the study of the laws of electricity and magnetism, and have no hesitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a strike of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before lecommenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive-sales in all parts of the country, is ample commendation of their stility and superiority.
