Polygamy of the Mormons.

[The interesting and authentic pertraiture given of the Mormons and their practices, in Mr. Ferris's recent work on Utah, presents the following striking facts respecting the moral tendencies and results of that abominable feature of their history, polygamy. Though losthsome, they are precisely what might be expected, and ought to be known.]

"Polygumy," says Mr Ferris, "is introducing a new style of building at Salt Lake City. A man with half a dozen wives builds, if he can, a long, low dwelling, having six entrances from the outside; and when he takes in a new wife, if able Philadelphia. to do so, adds another apartment. The For every additional word I cent to all staobject is to keep the women and babes, as tions on this line. \*Not now in operation.

RECOMMENDATIONS.

RECOMMENDATIONS.

RECOMMENDATIONS.

I have this day exercially inspected a conductor or Lightning Red, with vane and index, erected by Mr. Thomas Armitage, on Bellevue House, Gloucester, and have no hesitation in esping that it is not only the best have ever seen, but that it is the only one I have yet examined that is constructed on strictly schealife principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

If MEMULTRIES. B. MCMUETRIE

II. MCMUETRIE.

I am well satisfied that the Magnetic Lightning Red manufactured by Mr. Thomas Armitage, of Philadelphia is the best that has ever been made. I have spent severa years in the study of the laws of electricity and magneticm, and have no hesitation in saying that these Reds are continuous and have no hesitation in saying that these Reds are ism, and have no heditation in saying that these Rods are constructed upon the only principle of safety. The electric shock is reacted and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a strake of lightning when protected by one of these rods. I have been acquained with Mr. Armitage for several years, and before be commoned the manufac-ture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensive sales in all parts of the country, is anothe commendation of their utility and
