RECOMMENDATIONS.

RECOMMENDATIONS. PHILAS., AUG 13, 1847. I have this day carefully inspected a conductor or Lightning Rod, with vane and index, erected by Nr. Thomas Armitage, on Believue House, Gloucester, and have no hesitation in asying that it is not only the best I have ever seen, but that it is the only one I have yet examined that its constructed on strictly scientific princi-pies. It is with much pleasure that I recommend his conductor to the attention of owners of buildings. 50 H. MCMURTRIE.

conductor to the attention of owners of buildings. II. McMUNTRIE. I am well satisfied that the Magnetic Lightning Kod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have speat several years in the study of the laws of electricity and magnet-ism, and have no hesitation in aying that these Rots are constructed upon the only principle of safety. The electric shock is received and dispersel by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufac-ture of these rods I examined the principle on which they are constructed, and file couries, their adoption would be attended with complete success. The increasing demand for these rods, and the extensive als in all parts of the country, is ample commendation of their utility and 1 00 1 00 50 Pump made by himself 1 00 50 of the country, is ample commendation of their utility ar superiority.
