LAUGHABLE HORSE EXHIBITION. To-day one of the most laughable affirs occurred that I have ever witnessed. The horse ring, which has been open during the afternoon for the use of such gentlecontained some six or seven fine horses splendidly caparisoned and attached to light su'kies, which had grown so excited by the sport that the whole affair had become merged into a most spirited race. The contest was strong, and every horse was urged to his utmost speed. A vast crowd had collected for the purpose of enjoying the sport, and loud shouts attested their approbation of the favorite horses.

Just about the height of the race, the rope that protected the entrance to the ring was lowered and one of the ugliest looking specimens of the horse kind that I ever saw, entered. He was of dnn color, one-sided, loosely built, ring-boned and spavined. His driver, an old man, with a short grey beard, was clothed in a rusty suit of grey, with a seal skin cap, and was sexted in an old unpainted sulky, with a bundle of straw beneath the seat, from which an old rusty umbrella protruded.

The old man now tomers, in good style and quality at moderate reached down behind him and drew the umbrella from the sheaf of straw beneath the seat, and to which it was fastened, and with a great flourish over his head, brought it down on the hip-bones of the old dun. It was hard to tell which rattled most, the old umbrella or the bones of old Claybank; but from that moment the race was at an end. The gray was left far behind, and the old dun came up to the entrance at one of the most awkward, shambling, and vot swiftest paces that I have ever seen, bearing his rival a considerable distance, and presenting within himself the uglicat of horse-flesh that has ever been seen in this section of country. It is needless resay that old Claybank was the favorite

Lightning Rods.

FTER many years' close investigation and numerous experiments, the Patentee takes beasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so casy to obtainfound in

ARMITAGE'S Datent Magnetic Lightning Hods, and in this alone. This Rod has been examined by the most scientific gratiemen in the world— Professors M'Munrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation. and have pronounced them the only safe rods in see in this or any other country for the protect of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of learing the conductor. This rod has many other

dvantages over the old one. The only place of manufacturing is in Vine St. 3 doors above 12th, Philadelphia. where all persons are respectfully invited to call THO'S ARMITAGE. or Retail by These rods have been purchased and successfully used by the following individuals, companies

RECOMMENDATIONS.

RECOMMENDATIONS.

I have this day carefully inspected a conductor or lightning Red, with vane and index, erected by Mr. Thomas Arminge, on Bellevue House, Gloucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

I. A. McMURTRIE.

conductor to the attention of owners of buildings.

I am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no hestitation in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufacture of these rods. I cammined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensives has in all parts of the country, is simple commendation of their utility and superiority.

In the above prevalent and terrible class of the class of the class. Nervous Complaints are much more many our than is generally imagined.— CHRISTIE'S GALVANIC CURATIVES. Are an Absolute and Positive Specific.

The BELT is used when the body or system generally is affected; the NECKEACE for complaints of the Throat, as Asthma and Bronchitis, and of the Head; and the BEACELETS for all disorders of the structor limbs; as Rhebumatics, Palsy, Tremers and Spasmodic affections. These articles are simply applied as directed with the MAGNETIC FLUID which accompanies them, and when faithfully used they NEVER FAIL!

"Throw Physic to the Dogs."

To illustrate the use of the GALVANIC BELT, suppose the case of a person afflicted with that buse of civilization, DYSP,PSIA or any other Chronic or Nervous Disorder. In ordinary cases, stimulars are taken, which by their action on the nerves sof miscles of the stomach, afford temposing relief, but which leave the patient in a lower state, and with kiptered faculties, after the action thus excited has said. Now compare this with the effect resulting from the application of the GALVANIC BELT. Take a Dyspeptic antierer, even in the worst symptoms of an attack, and simply tie the Belt round the Bedy, using the Magnetic Fluid as directed. In a thart period the insensable perspiration will act on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. Thus the most severe case of DYSPSISIA are FERMANENTLY CURED. A FEW DAYS IS AMILY SUFFICIENT TO ERADICATE THE DISEASE OF YEARS.
