The New Gudgeons.

The following dialogue, which actually took place some years since between an old lady, who had much confidence in professionals, and a learned but eccentric elergyman, goes to strengthen a conviction already strong in many minds, viz., that and price his work, as he is confident they will homan nature is gullible.

"Now parson, you are a man of much barning. I want to ask you what became of the eleven days, when old style was altered to new ?"

"Well, well, madam, you know this world is hung on two great gudgeons-" "Indeed, sir! well, what then ?"

"Well, it had been running round on the two gudgeons a great while, and they got worn out, and it broke down." "Do tell me if it did ?"

"Yes marin. Well, after the world broke down, all the people turned to and put in new gudgeons, and set it going again; and it took 'em just eleveu days!"

The old lady was abundantly satisfied, and would have given to the learned gentleman the degree of bachelor of science without further exemination.

THREE BROTHERS IN CONGRESS .- Israel Washburu, Jr., of the Bangor, (Me.) district; E. B. Washburn, of the Galena, (III.) district; C. C. Washburn, of the Mineral Point, (Wis.) district-three brothers-will probably all be in Congress together next session, Israel from his native place in the "down East State," and the others from their adopted homes in the West. They are agreed in one course -opposition to the Nebraska swindle. [A similar event happened about 1820, when William Findley, of Pa., was a Senator in Congress, and had two brothers at the same time in the House-one from Pennsylvania and the other from Obio.]

THE WAY THEY TAKE IT .- It is really amusing to see how philosophical the journalists of the defeated party in the recent election, announce the result of their downfall. The Cleveland Plaindealer, says :

"From the telegraph reposts it will be seen that Know Nothings, Whigs, and Free Soilers, have carried Pennsylvania;

DIRECTORS—WILLIAM CANERON, Esq. that the Free Soilers, Whigs, and Know Nothings, have carried Ohio; and that Whigs, Know Nothings, and Free Soilers have probably carried Indiana.—If any of the fusion papers want our Rooster they can have him, as we have no use for him at present."

John D. Whiteside, tavern keeper in West Fallowfield township, who was convicted on Thursday last of selling liquor to a minor, and sentenced to pay a fine of \$25, the cost of prosecution and to undergo an imprisonment of ten days, was pardoned by Gov. Bigler on the following day. The fine and costs were not remitted. - West Chester Examiner.

For unadulterated economy, commend us to the German. Give him a salary of forty cents per diem, and in ten years he will own a brick block, a fat horse, nine children, and a vrow broader than she is long, and as good natured as a blind kitten.

"Landlord," said a seedy pedagogue somewhat giving to strong libations, "I would like a quantum of spirits, a modicum of molasses, in conjunction with a little water; but deal largely in the spirits, thou man of mixtures."

"Did you know," said a cunning Yankee to a Jew, "that they hang Jews and jackasses together in Portland?"

"Indeed! then it is well that you and are not there," retorted the Jew.

A boy called a doctor to visit his father. who had the delirium tremens; not rightly remembering the name of the disease, he called it the devil's trembles-making bad Latin, but very good English.

Dobbs says, he would have died of cholera, in August, if it had not been for one thing-" the doctors gave him up." Two days afterwards he says he was a well man, indulging in specotash.

"I don't believe it's any use to vaccin ate for small pox," said a back-wood Kentuckian, "for I had a child vaccinated. and he fell out of a window and was killed in less than a week after."

There is a man in West Troy who has so much of the milk of human kindness that he is obliged to water it, for fear that he should be so benevolent as to give away all his property.

There are two reasons why you should not interrupt an editor when he is writing.

One is, it is apt to put him out-the oth er is, you might get put out yourself. The celebrated "Doestick," describing

a New York boarding house, says he can always tell when they get a new hired girl by the color of the hairs in the biscuit. No proof of temperance-a man with

his hat off, at moonlight, explaining to a lamp-post the principles of his party. A Know Nothing at Somerset, who fell into the water, refused to be rescued by

To Provision Hottoway—Dear Sir: Mrs. Sarah Dixon of Liquerpond street, Soston, has this day deposed before me that for a considerable period she was severely afflicted with scrofulous sores and ulcers in her arms, feet, legs, and other partie of her body; and although the first of medical advice was obtained, at the cost of a large sum of money, she obtained no abatement of suffering, but gradually grew worse.

Bring recommended by a friend to try your Ointinent, she procured a small pot, and a box of the Pills, and before that was all used, symptoms of amendment appeared. By persevering with the medicines for a short time longer according to the directions, and strictly adhering to your rules as to diet, i.e., she was perfectly cured, and now enjoys the best of health.

Lightning Rods.

FTER many years' close investigation and A numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in

ARMITAGE'S Patent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world— Professors M'Murtrie, Johnson, Waller and many others that have examined them, recommend and speak of them in the highest terms of approbation. and have pronounced them the only safe rods in use in this or any other country for the protection Extraordinary and rapid Cure of Erysipelas of Lives and Property. One advantage is to divide in the Leg, after medical aid had failed. and throwback a part of the electric fluid harmless to the clouds ; in time of a stroke this enables the to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of

manufacturing is in Vine St. 3 doors above 12th, Philadelphia, here all persons are respectfully invited to call and examine for themselves. For sale Wholesale

or Retail by THO'S ARMITAGE.

Orders promptly attended to. Terms cash. These rods have been purchased and successfully used by the following individuals, companies and corporations, whose names are cheerfully

I have this day carefully inspected a conductor or Lightning Rod, with vame and index, erected by Mr. Thomas Armitage, on Bellews House, Glucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

11. McMURTRIP.

conductor to the attention of owners of buildings.

It am well satisfied that the Magnetic Lightning Rod, manufactured by Mr. Thomas Armitage, of Philadelphia, is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no heetiation in saying that these Roles are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the rod, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a struke of lightning when protected by one of those rods. I have been acquainted with Mr. Armitage for several years, and befure be endurenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods, and the extensivesales in all parts of the country, is ample commendation of their utility and superiority.
