Lightning Rods.

A FTER many years' close investigation and numerous experiments, the Patentee takes pleasure in informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The calamities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is

found in ARMITAGE'S Datent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world-Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation. and have pronounced them the only safe rods is use in this or any other country for the protecti of Lives and Property. One advantage is to divide and throwback a part of the electric fluid harmless to the clouds ; in time of a stroke this enables the rod to conduct that portion of fluid that belonge to the earth without the slightest danger of leaving the conductor. This rod has many other

advantages over the old one. The only place of manufacturing is in Vine St. 3 doors above 12th, Philadelphia, where all persons are respectfully invited to cal and examine for themselves. For sale Wholesale

RECOMMENDATIONS. PRILADA., Aug. 13, 1847.

I have this day carefully inspected a conductor of hightning lies, with your and index creeted by M. tightning Red, with vace and index, erected by ar-Thomas Armitage, on Rellevue House, Glaucester, and have no hesitation in saying that it is not only the best I have ever seen, but that it is the only one I have yet examined that is constructed on strictly scientific princi-ples. It is with much pleasure that I recommend his conductor to the attention of owners of buildings.

I am well satisfied that the Magnetic Lightning Rod manufactured by Mr. Thomas Armitage, of Philadelphia is the best that has ever been made. I have spent executivers in the study of the inex of electricity and magneticm, and have no hesitation in saying that these Rods are constructed upon the only principle of sefety. The electric shock is received and dispersed by the magnet at the log of the rad, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been assumated with Mr. Armitage

The University

IN this place will open its 17th Semi-Annual Session on the 4th of OCT. next.
The Faculty is full and experienced, the number of Students so large as to secure emulation and mutual benefit, and of such an age as to render any pranks or violations of d unpopular and distasteful. The number last session was 133.

As the whole of the classes commence new studies next term, it is eminently the best time for new students to enter. In the College and Academy together, not less than twenty-five recitations occur daily, giving young men who contemplate but a brief stay in the Institution an extensive choice of subjects and enabling them to pursue branches suitable to their previous attainments.

The Female Institute opens at the ame time under the three Ladies who have had the charge. PRICE OF TUITION.
