A FTER many years' close investigation and numerous experiments, the Patentee takes A PIEK many years close investigates and numerous experiments, the Patentee takes pleasure on informing the public that he has arrived at the true principle of protecting families, dwellings and property from the destructive influence of LIGHTNING. The colomities that every City, Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, espe when the remedy is so easy to obtain-this is found in

ARMITAGE'S Datent Magnetic Lightning Bods. and in this alone. This Rod has been examined by the most scientific gentlemen in the world— Professors M'Murtrie, Johnson, Wallor and many others that have examined them, recommend and speak of them in the highest terms of approbation and have pronounced them the only safe rods ic use in this or any other country for the protecti of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds ; in time of a stroke this enables the rod to conduct that portion of fluid that belongs to the earth without the slightest danger of leaving the conductor. This rod has many other advantages over the old one. The only place of

manufacturing is in Vine St. 3 doors above 12th, Philadelphia. where all persons are respectfully invited to cal and examine for themselves. For sale Wholesale or Retail by THO'S ARMITAGE.
Orders promptly attended to. Terms cash.

I have this day carefully inspected a conductor or lightning fied, with vane and index, ercede by Mr. limma Armitage, on Bellevae House, Gloucester, and have no heistation in agying that it is not only the best thave ever seen, but that it is the only one I have yet

I am well satisfied that the Magnetic Lightning Redmanufactured by Mr. Themas Armitage, of Philadelphia is the best that has ever been made. I have spent several years in the study of the laws of electricity and magnetism, and have no healtation in caying that these Rods are constructed upon the only principle of safety. The electric sheek is received and dispersed by the magnet at the top of the rod, and it would be impossible according to the laws of attraction and repulsion, for a building to be laws of attraction and repulsion, for a building to be injured by a strike of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he roumenced the manufacture of these rods I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demant for these rods and the extensive sales in all parts of the country, is ample commenciation of their utility and superiority.
