LEWISBURG, Pa [Jan 17, 1856—11w] and iron heeled oppression, for they are consecrated by the lapse of hoary ages! Is not that the idea of the Senator, shorn of its tinsel, and exposed in all its naked ugliness and feeble deformity?

He tells us too, that the enactment, which he says is "aptly termed the Jug Law," increases drunkenness, and as a matter of course the consumption of whis- Commonwealth Insurance Company, key. Then, sir, why do those who are interested in the sale of it, and whose especial representative he seems to be, in this chamber, beg so piteously for its repeal? Do they sell too much? Are their profits too great under the present law? I can not understand it. The Senator and myself must have learned to cypher out of James Fox

He tells us the poor can not get newspapers or books, and must therefore have 6m597 whiskey to amuse them. As far as my experience goes, this is very delightful amusement. It must be very "amusing" to the poor inebriate to behold the rags and wretchedness of his forlorn and deso- than usual, is to prepare the way by a shorter late home-to witness the squalid misery of his wife, and hear the wails of his hungry children. It must be right down amusing, when he comes to lead a felou's life, to all such innocent amusements, I am "constitutionally" opposed.

He tells us that because thousands abuse themselves, it is no reason why the supply should be cut off from millions, and they subjected to this terrible deprivation. I hope I shall always be deprived of it; for it strikes me, sir, that whiskey is like Virginia lands, the more you have of it the poorer you are.

The Senator says we have no confidence in man, because we would restrain him. Has the Senator such confidence, that he would lift the ban of the law from theft, and robbery, and murder? Would be make these little pastimed, free? or is that carrying his ideas of amusement fur-Senator's cranial developments are too good, to allow us to believe he was in earnest in all that be has said.

Vain, vain must be all their efforts to palliate the enormities of intemperance. Niegara Falls with saw dust, or put out the fire of the sun with an elder squirt.

The times demand a good article at a low they have imposed upon themselves. He only shivered his lance and upset his old horse, while they are trying to butt their brains out against a fortress which time and the devil united can never overthrow.

Mr. Speaker, it may astonish some Senators that I have treated this subject with so little show of burlesque. The general run of our business here affords opportunity enough for its exercise. But, sir, there are occasions when jocoseness is not only inappropriate, but indecorous. When principles are discussed that lie at the founda-tion of public prosperity and private hap-that involve the weifare or misory piness-that involve the welfare or misery of millions of our fellow citizens-the laugh and jest should find no place.

The statistics of the evils of drunkennes have become a school boy's story, and need no repetition here. Their effects upon poor houses, hospitals, lunatio asylums, prisons, and the gallows, are understood not only by Senators, but by all mankind. They are written in terrible and unfading letters upon every page of the world's history. The mouldering ruins of cities attest their power, and the "decline and fall" of empires bear witness of their universality.

The details of this amendment for which I intend to vote, have been honestly and Browne) from whose hands it chiefly emanated. I have confidence in his ability to defend it; and more than all, I have condence in his integrity, his courage, and his patriotism.

Of course, Mr. Speaker, I have not spoken to influence the votes of Senators. On a question of this magnitude, such an attempt for less than first cost. would indicate more vanity than good sense. I have risen only to state, in the fewest possible words, where I stand, and why I stand there. If I am wrong, it is an error I would have inscribed upon my tomb, in letters so deep that the showers of summer ings every week. and the storms of winter could never efface them : "HERE LIES A MAN WHO LOVED SCHOOL HOUSES AND HATED GROG SHOPS."

The calamities that every City. Town, Village and Country falls victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain-this i

ARMITAGE'S Datent Magnetic Lightning Bods, and in this alone. This Rod has been examined by the most scientific gentlemen in the world-Professors M'Murtrie, Johnson, Waller and man others that have examined them, recommend and speak of them in the highest terms of approbation, and have pronounced them the only safe rods in use in this or any other country for the protecti of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds ; in time of a stroke this enables the rod to conduct that portion of fluid that belong to the earth without the slightest danger of lea-

ving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in Vine St. 3 doors above 12th, Philadelphia, where all persons are respectfully invited to cal and examine for themselves. For sale Wholesale

RECOMMENDATIONS I have this day carefully inspected a conductor at Lightning fiest, with vane and index, exected by Mr. Thomas American, on he live House, tilonesser, and have no he situation in saying that it is not only the best I have ever resu, but that it is the only one I have yet examined that is constructed on strictly scientific principles. It is with much pleasure that I recomment his conductor to the situation of owners of buildings.

H. McMUATRIE

conductor to the actuation of councrs of buildings.

I am well satisfied that the Magnetic Lightning Red manufactured by Mr. Thomas Armitage, of Philadelphia is the best that line ever been made. I have spent everal years in the study of the laws of electricity and magnetic manufactured upon the entry in a saying that these Rods are constructed upon the entry principle of asfety. The electric manufactured upon the entry principle of asfety. The electric shock is received and dispersed by the magnet at the top of the rod, and if would be impossible, according to the laws of attraction and reputation, for a building to be injured by a stocke of lightning when protected by one of these rods. I have been nequanted with Mr. Armingfor several years, and before be commenced the manufacture of these rods. I examined the principle on which they are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rods and the settinetwestics in all parts of the eventry, is ample commenciation of their utility and superiority.
