NEW HOHENLINDEN.

A monraful genius "out West" gets up the OF Mrs. Thompson's School for Young following new song to an old tone, which no doubt has "more truth than poetry" in it. To in advance; but there are many "borrowers," &c., indebted to the office on old scores, who we hope will take it as "meaning them," and SQUARE UP immediately!

Seasons occur when funds are low, Subscribers are provoking slow, And few supplies keep up the flow Of dimes departing rapidly.

But we shall see a sadder sight, When dans pour in from morn till night Commanding every sixpence bright To be forked over speedily.

Our bonds and due-bills are arrayed-Each seal and signature displayed The holders vow they must be paid, With threats of "Law and Chancery."

Then to despair we're almost driven-There's precious little use of livin When our last copper's rudely riven From hands that held it lovingly.

But larger yet these dues shall grow, When interest's added on below, Length'ning our chin a foot or so, While gazing on them hopelessly.

"Tis so, that scarce have we begun To plead for time upon a dun, Before there comes another one Demanding pay ferociously.

Who would your very bacon save! Waive, Patrons! all your pretexts waive And pay the Printer cheerfully. Ah! it would give us pleasure sweet,

The prospect darkens. On, ve brave,

A few delinquents now to meet, Asking of us a clear receipt Por papers taken regularly.

Major Jones' Travels.

[The Travels of Major Joseph Jones, of Pineville, from his plantation in Georgia to Canada, is the production of a genuine Southern wit, and full of fun and pathos. It has eight Illustrations by Darley, and is published by T. B. Peterson, 102 Chestnut street, Philadelphia-price, 50 cents. As a specimen of the Major's philosophy and humor, we copy for the Canonicus some account of a railway trip in South Carolina:1

-There was a considerable bustle and fuss about the depo, gettin reddy to start. The passengers was gittin their tickets and their checks for their baggage, what some fellers was knockin about like they would tear the hide off evry trunk ther was thar. stowin 'em away in the cars-some people was runnin about bidding good-by with FURNISHING GOODS, also heap of things-and sum was kickin up a rumpus 'causa they could n't see their trunks after they was put in the cars. Bimeby evry thing was fixed, and here cum old Beelzebub, with his fire, smoke, sutbage and thunderations, to carry us to Chariston. When I saw that everlastin, black, ugly thing cum chug up agin the cars for 'em to tackle it on, fizzin and fryin, and smokin like a tar kill, I thought how if I was a hos or a mule, I'd take my hat off to it. If ther ever was a thing what deserves a vote of thanks from all the pullin generation of animals, I think it's the locomotive ingine. Just to think, the amount of hos flesh it has saved since it tuck to carryin the mails. A locomotiv always seems to me to cum nearer a livin animal, than any other machine invented lerin at the cows when they get on the track. It's a monstrous fractious, spiteful, headstrong sort of a creeter, and sumtimes it takes it into its hed to run off the track, but generally speakin it's jest about as governable as any other team, and don't spining to the track of the old School Medical Colleges of Philadson of the common that the com by man, specially sense they've got to hol-

givin 'em plenty of corn and fodder. Ling! ling! went the bell. "All aboard,"

company in his own thoughts, he's monstrous apt to be lonesome. Along at the fust ther wasn't many passengers, and most of them was preachers what had been up to Augusty to tend a convention. They was the dryest set of old codgers I ever met with, til the joltin of the cars shuck up ther idees a little, and then they fell to disputin about religion like all rath. After a while one old feller, what had his hed tied up with a red cotten handkerchef and didn't belong to the same church with the rest of 'em, mixed in with 'em and in about five minits they got into one of the hottest kind of argyments 'bout sprinklin and dippin. The old bardshell laid about him like rath, and the louder the racket and the more dust the cars made, the louder the feller fired away at 'em, and whenever he stopped for breth, two or three of the others was down on him like a Yankee thrashin-machine. They kep up one everlastin string of argyment about fortyfive miles long, and to them what sot a Carpets were bought at auction, others direct from the manufactors, at prices that we can hear a few words now and then, it sounded zactly like a reglar cussin match; and where. sumtimes they'd look at one another like they meant jest what they sed. Bimeby the old hardshell caved in for want of breth, and all the rest of the way he was hockin and hemin, and tryin to git the dust and sinders out of his wind-pipe.

Lightning Rods. A FTER many years' close investigation and numerous experiments, the Patentee trace phasure in informing the public that he has strived at the true principle of protecting families. dwellings and property from the destructive indu

that every City, Town, Village and Country late, victim to annually, thro' the gross negligence of its inhabitants, is beyond calculation, especially when the remedy is so easy to obtain—this is found in ARMITAGE'S Patent Magnetic Lightning Hods, and in this alone This Rod has been examined by the most scientific gentlemen in the world-Professors M'Mortrie, Johnson, Wallor and man others that have examined them, recommend and speak of them in the highest terms of approbation. and have pronounced them the only safe rode is use in this or any other country for the protects of Lives and Property. One advantage is to divide and throw back a part of the electric field harmless

to the earth without the slighte-t danger of leaving the conductor. This rod has many other advantages over the old one. The only place of manufacturing is in Vine St 3 doors above 12th, Philadelphia, where all persons are respectfully invited to cal

RECOMMENDATIONS. Philada, Aug 15, 1847.

I have this day excefully inspected a conductor of lightning field, with some and index, exceted by Er. Thomas Armitoge, on fedlewin House, Glamester, and have no hesitation in seying that it is not saily the best I have ever seen, but that it is the only one I have yet examined that is constructed on strately scientific pulsars. It is with nonth pleasure that I recommend his conductor to the attention of contents of buildings.

I am well installed that the Vacantia Linkston list.

I am well satisfied that the Magnetic Lightning lied manufactured by Mr. Thomas Armining, of Philade phis is the best that has ever been made. I have spent several years in the stury of the laws of electricity and magnet-iem, and have no bestlation in caying that these helps are

of the country, is ample commendation of their utility as superiority. That's E Waller, M. D. Elsing Sun. Philad Co., April 10, 1852.
