SENATE .- On motion of Mr. Benjamin a resolution was adopted calling on the Secretary of State for information relative to the extent to which the transportation of laborers is now being carried on, from the continent of Asia or any of the Asiatic Islands, to America, and whether said laborers be termed slaves, coolies, or apprentices; also to show the manner in which they are treated on the passage and after their arrival, together with any statistics he may possess, showing the sacrifice of human life attending this traffic.

The three million armanent bill then again taken up.

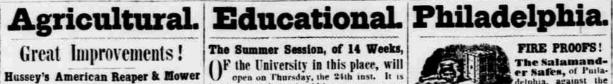

Mr. Hale stated that the expenses of the Government, now, in profound peace, were Ten Millions more than in any year of the Mexican war ! While it cost only Two Millions annually to maintain Washington's administration, Sixty Millions was nocessary to sustain Mr. Pierce's, 11did not know that he was doing wrong to state these facts, as it might encourage the President to go into another war, thinking it might be more economical. (The facts stated above, are alarming, From the day the economies1 administration of J. Q. Adams was cried down by false charges, the depleting of the U.S. Treasury has been by millions. INTERESTING RELICS .- In Chagnaramous Bay, about ten miles to the west of the port of Spain, in the Island of Trindad, have been found, in about six fathoms of water, the remains of a Spanish fleet commanded by APADOCA, at the time the English expedition under HARVEY and ABERCROMEINE, sailed from Martinique for the subjection of that Island in 1797. The Spanish vessels were five in number-four line of battle ships and one frigate-all being perfect specimens of naval architecture, and which, for better protection, had been placed under cover of the guns and mortars of the Fort of Gasparillo. When the English fleet anchored within range A to preserving une impossibility of escape, without engaging, set his vessels on fire to prevent them falling into the hands of the enemy. the money having been landed on the opposite coast. One of the line of battle ships, being windward of the rest, was eventually captured by the English, but four burned to the water's edge and sunk with the guns. The Schooner Searsville, Capt. SEARS, arrived on Saturday, was loaded principaly with iron guns, about ninety in number, taken from the sunken ships, having been raised by submarine process.

[Good for you, Mr. Benjamin; but why

not denounce the African slave trade also, at the premature trial in 1851; before the close of the harvest of the same year, however it was totally beaten by a HUSSEY REAPER, which received the *nonunious* award of an impartial Jury of twelve English farmers. The act is that Hussey's muchine is achieving a
