### For the Lewisburg Chronicle. Condition of the Common Schools in Union and Snyder Counties.

The School Directors of Union and Suyder counties who have not yet sent in their District Reports, with the four months certificates, will please to do so as soon as possible, as 1 wish to close the general account and make out my annual Report to the Department by the second week of June next.

In availing myself of the suggestions of a circular issued by our worthy Deputy Superiatendent Nov. 15, 1855, I requested our teachers, in my own school visita-tions, to furnish the School Department, through me, with Reports of their respec-tive Schools. In compliance with this request some very able reports have been received, and many more I hope will be in soon. From these, together with the substance of my own visitation notes, I will endeavor to submit a condensed report of the School, School-houses, &c., of Union and Snyder counties. I have taken notes of each School visited, but they would

prove too lengthy for publication. The "School-houses" are generally good, and built of various materials, from a log cabin not worth \$25, to a splendid brick edifice worth \$1500, but the majori-ty are frame or parts weatherboarded and painted red, interior either ceiled and plastered, or lines with boards. "Dimenms" averaging from 16 by 18 to 48 by 50 feet, but the imajority are about 20 by 22 feet. Heighth of certing, from 7 to 12 feet, giving an average of about 3960 c thic feet of air to each house, 74 feet to each scholar attending school, 109 cubic feet to the average number of scholars attending school. "Ventilation." Although in general there are no particular provisions m for the admittance of fresh air, yet I believe few schools suffered for a necessary supply; for while the trap door in the ceiling al-lowed the impure atmosphere to pass off, the vacuum was usually supplied with fresh air through broken panes, cracks in the wall, or space between the door and threshhold. "Desks" will usually accommodate two pupils, each average about 21 to the school, except in about 28 schools, which like the houses in which they are found, are got up on the log cabin princi-ple, with slab betweet, the legs as long in proportion as a "Stanghui Rooster's."— The desks or writing boards facing to-The desks or writing-boards facing to-wards the wall, ext. of the whole length of the bouse. As to the propriety of having the scholars' backs torned towards the teacher I will let others ju 'ge; with these exceptions, the seats are generally fisten-ed to the desks so that the front of the desk serves as a back to the seat, the majority to high for children, and few of them close enough to the desk to give a healthy position to the scholars. The "teacher's desk " is usually found in front of those occupied by the pupils, though few of our most efficient teachers make much use of it except when calling the roll, &c., while an other class of teachers consider themselves out of place when out of the chair. "Black-boards" are found in nearly all the scheeds, but many of them too small to accomodate more than two or three pupils at a time. "Maps" are few, and those few not designed for schools, except one set of Pelton's outline maps, which I found successfully used by an efficient teacher of the system. "Globes and other school apparatus"

wanting. "Arrangements for hats, boarnets, books, &c." The hats, caps, boanets and shawls are usually hung up in said?" anti-rooms, (which I forgot to mention under the proper head, )usually about eight feet square, fitted up with shelves for din ner-baskets, and units or houks for huis, cloaks, &c., while the books generally find room on the deck shelves, every thing is found in its place, and every thing is done

in its proper time; while in a few other schools I found books and clothing promiseuously scattered about on de ki or windows. windows ; nothing appeared to have its regular place, and no lesson its particular "The school, its grade." Only a few

of the village schools are graded; bo and girls in all cases are taught in the

"Whole and average number of pupils attendu chool" last year. Oid Umen reported 4950 male and 3708 female scholars; Total 8764; average 5650; average number to each school 37; num ber of schools last year 161; present year 163; number of school houses 165 two of which were not opened last winter. The total number of scholars last winter I can not tell until all the District reports have been received. " Branches taught and books used."-The branches tanght and owns does The branches taught are Orthography Reading, Wri ing, Mental and written Arithmetic, Algebra, History, Geography, English Grammar Composition Elecution, Book keeping, Physiology, Philosophy, Charita Music and Latin. The server Chemistry, Music, and Latin. The names of the books used are almost legion, at least the catalogue would prove too lengthy to be contained in this brief report. "Punishment, whether corporal or other-wise." In some schools I found the birch in the teacher's right hand, a text book in the left, showing that the government rested between reason and compulsion; that if the pupil willingly yielded to the for-mer, he could avoid the latter. In several other schools, on centering the house, I observed the unlacky urchin standing on the teacher's platform occasionally thrusting an aupleasant countenance above the edge of his book, making a wry face at the teacher when his back was turned. -But the greatest punishment, in my opin ion, that I saw inflicted, was to have children day after day perched on those already described slab seats, without a sepport for their backs, or rest for their feet. for as a general case, they could not reach the floor with their fact by six or eight inches, compelled at the same time to keep "their eyes on their book," while their minds were perhaps meditating upon some plan how to make a happy escape from their thra' lom.

## fast. "Order" is reported very good in general. "Whether the attendance is regular or not." A glance at the total and average number of scholars will answer

the question. "Leveler's age." The majority are between 15 and 25, the youngest is 14, and the oldest about 55 years. 149 of those who taught last winter are males, and 13 female

"His skill in teaching." We have many teachers of whose skill our counties may justly feel proud, who need not hesitate to take charge of any of our Common schools in the State, while on the other hand some in the State, while on the other hand some who may be very successful in cultivating the field, but to develop or cultivate the minds of the young they should avail themselves of the experience of Page, Mansfield, Northead, Potter and others who have written upon the subject of teaching, before they can be successful in leaving favorable impressions of their work in the minds of those under their care.

"Examinations and exhibitions" are beginning to be quite common in many our schools, and are regarded by the teachers as the only means of getting parents into the school house. "Director's visits" in some Districts

have been quite frequent, in others connave been quite frequent, in others con-sidered as gratuitous service, lost time, because not paid in d flars or cents, and hence left to him who is "wELL paid for visiting schools." Is the present school system favorably or univorably received? In intelligent sections or districts in which the citizens regard knowledge and virtue as the necessary bases of our free institu-tions, the system is hailed as the only hope tons, the system is index as the only tops and safe-guard of our future freedom and happiness. While on the other hand those over whom ignorance sways the tyranical sceptre of superstition, prejudice, and bigotry, are more inclined to war against light and truth, because they suppose the system calculated only to make to many more "hungry office seekers, lazy d-masters, Lawyers, Dectors, and Preachers, as well as to turn honest men into reques."

in their mental chains, they are  $\mathbf{P}_{-}$ hugging to their hosoms the offspring ignorance by opposing a system which in-deed may fail to set their own minds free, but calculated and destined to illume the pathway of their children with that in-tellectual light which will enable them to see where they step ; to love good and shun exil : to cherish truth and denounce error ; to be honest and live happy, and to love

God and die happy. D. HECKENDORN. BRAVER SPRINGS, May 17, 1856.

## Great Improvements!

Hussey's American Reaper & Mower F OR 1856 .... This Machine was put stantly increasing support he has received. TUITION (per Session of 13 weeks.) in successful operation in 1833, and con-ted to be the only Reaper and Mowing Ma in the World of any pratical value 1815-twelve years after its introduction Other Reapers are now offered with glowing Advertisements and Certificates of Gold and iver Medals. But the Farmer, in search of the best Reaper, and not posted in the matter, had better see a little further. One of the other Reapers took the great medal in England, at the premature trial in 1851; before the close of the harvest of the same year, however it was totally bearen by a HUSSEY REAPER, which received the unanimous award of an impartial Jury of twelve English farmers. The fact is that Hussey's machine is achieving a series of triumphs in England, and rapidly ob-

tuning that pre-eminent position there, which it has already secured in the land of its origin. If there is any value in 23 years' experience in building Reapers, and using them in the harvest field, OBED HUSSEY, the Father of Reapers, can elatin it. All who are satisfied with the BEST REAPER AND MOWER.can he suplied by senting their orders early in the season, as the crops indicate a large demand, and we can not have over 200 Reapers ready for the vast harvest of 1855-

We would refer to the following gentlemen, who have used Hussey's machines for several years, and will testify to their superiority: UNION AND SNYDER COUNTY. UNION AND SNYDER COUNTY. "Attention paid to study." Where the variety of b oks is not too great to make the desired classification, the attention is reported good.

Degree of advancement," The ele-"Degree of advancement. The co-mentary branches justly claim the supra-macy, yet Orthography, Reading, and the principles of Arithmetic have heretofore been to much neglected or their import-ance too little appreciated. Many choices in German sections read tolerably well without understanding the tenth word of what they read; this is one of the many evil results of the practice of long lessons without the teacher explaining to scholars the meaning or principles of the words or subji

Their general appearance and order." The intelligent appearance of the scholars in general would indicate that the care of a skillful teacher united with the co-operation of parents, aided by judicious Direc-tors, and guided by the system of Common schools, we now have, together with their own faithful exertions, might soon make them bright ornaments to our schools, prove a blessing to society and an honor to our country. But as the stream can not rise above its fountain head, some can not prove to be such desirable beings nuder the guilance of men who confess that they are not competent. that they do not like teaching, yet to satisfy the majority of parents they will keep school for want of better business; but happily this class of teachers is decreasing

### Take Notice.

DR. KELLING, of Mechanicsburg, Pa., announces to all afflicted with Tumors, Wens, Cancer, Cancer Warts, Polypus, Lupus, Moles or Marks, Scrofula or King's Evil, White Swelling, Fever Sores, Sore Legs, and all diseases that have been usually treated with Caustie or Knife, that he can remove them by an entirely new method, without cutting, burning or pain. It is no matter in what part of the body, he can remove them with perfect safety and in a remarkably short time, if curable. No Mineral or Vegetable Poison is applied, and no money required, except for medicine, until a cure is perfected. Chronic and all other diseases not mentioned above,

especially Venereal afflictions treated with pe ive success, if curable. Full particulars can be obtained by addressing C. L KELLING. M.D., Mechanicsburg, Cumberland Co., Pa. At the request of persons afflicted, residing at a distance, he has for years been in the habit

of prescribing by letter, and with GENERAL SATISFACTION. He would say however to those desiring advice in this way, that to secure attention they should enclose, with the general symptoms of their cases, a fee of One Dollar, to warrant him in spending his time for their benefit.

The Doctor may be consulted at his Office at CAUTION .- Strangers coming to Mechanicsurg to see the Dr. are cautioned to beware of unprincipled persons, as some have been deceived. Dr. K. is the only one in this State

who can perform cures by the new method. His office is directly opposite the Union Church. Mechanicsburg is 8 miles from Harrisburg, on the Cumberland V. R. R., and accessib

from all parts of the Union. The Dr. will visit cases within a reasonable distance when de-[July 27-563v1
