LEWISBURG, UNION CO., PA., FRIDAY, DECEMBER 12, 1856.

J. P. ROSS' Improved Blower and Pumping Engine.

YEAR XIII ... WHOLE NUMBER, 651. AT \$1,50 PER YEAR, ALWAYS IN ADVANCE.

Our Evenings.

" How can we best use our Evenings ?" render. If properly answered, and acted upon, it will profit him much. How can four, for our mental improvement?

The season of long nights is here; the subsided; the "country" is "safe;" all parties will peaceably betake themselves to the usual paths of life; and with the return of quiet, and with a clearer view of our duties, we should be prepared to attend more closely to things which will advance our individual improvement and increase our happiness.

It is not sufficient that the day only be devoted to doing that which we have to do. for there is so much to be done in the brief period of a lifetime, that an evening put in here and there will be found of reat service in helping on the work which each one of us is allotted to perform. work as recommended, and seems destined during which labor is suspended, and might be turned to good account every

The young mechanic of the town has to no means received as graciously as I ex- as to say, "Well, new I'm President, how who obtain a livelihood by illegal means these hours be invested so as to produce the largest dividend? How can they be 10,000 applied in performing the duty of self im-

5,000 provement? Do not suppose that we desire to deprive 000 the young mechanic of the amusement and recreation which traditionally belong to Saturday night. We do not wish to dis-1.600 turb, but to point out, what is the true 1,500 pleasure. Every young man has that 2,000 natural taste for amusement, which can not be suppressed without a violence to nature. But when such urgent claimants the day, which can be profitably introas the demands of nature and the promptdue day, which demands of nature and the promptdue day, which demands of nature and the promptrecommend the Pennsylvania Farm Jour-This is nearly one half the matured pop- compromise is the only means to settle

reckless of character, "without God and ment to our young mechanics. For this without hope in the world." California is reason it is that we see them, on those a startling illustration of the text, that evenings when their work is done for the "the love of money is the root of all evil" week, collected in shops, in saloons, and and in that rich soil the root thrives prodi- at the corners of the streets. They claim attention. If more journals than are then doing nothing more nor less the local ones are desired, we would sug-AGER VOTERS .- John Bently, of Oswe- than following a strong principle of their nature. Thus, in the circle of a farmer's power to make laws upon the subject. Would not that be better than cracking tual improvement be planted, and stimupea-nuts behind a grocery stove, or loung- lated to vigorous growth, ultimately bearwould not only separate South Carolina ing on the counter of a village store? ing fruit of surpassing value, all by a profrom the North, but from the South also. Then we say to our young mechanics, per use of those hours which, in too many choose that companionship which will not

-Our remarks we now address to the of them, who get their living by breeding YOUNG FARMERS of the country. This slaves, oppose a plan which would reduce class have the advantage of every evening ing ahead, and will not, can not wait on of the winter. Their business does not the shuffling steps of the laggard? - Sun-

cal idea gained, from the fall of the leaf to the setting forth of the buds in spring, This question is of great importance to the useful information and rational pleasure. causing the dull nights of winter to teem with their productions not less profitable we save an hour or two, from the twenty- than the barvests of summer. Of these two modes of using the winter evenings. election is over; political excitement is they wish to progress? Do they aspire to become intelligent farmers, and well informed men? Do they want to be true members of that honorable craft whose laboratory is the soil of this great earth. and whose impleyment is the feeding of its many people? This, we know, is the ambition of every highspirited farmer boy. But remember, ingenuous youth, this high

point can not be attained without an im-

provement of those many hours which

every winter places at your hands.

Then read, digest, and practice. First, those books and papers which treat of your business, for your main object is to become good farmers; and then, every useful book and interesting paper that may add to your stock of general information. When the fire burns brightly, and the candles are lit, and the family are drawn around the table, one can read for the whole group. The best reader can perform the largest share of the task; the others taking their turns, for the sake of improvement in the manner of reading. The county papers supply the home news. Local incidents, the proceedings of the courts, the meetings of the county agricultural society, &c., will be of interest to the family circle. Knowledge, like charity, begin at home. Then the Agricultaral journal frem a distance, may elaim attention-full of practical facts and useful suggestions. These will lead to dicussions in which the whole family can engage, bring out their latent views, and exercise their reasoning faculties. Discussion will lead to further investigation, and this to reflection, and from reflection, the highest taculty of the human mind, springs every improvement.

Among the agricultural periodicals of nal, and the Cultivator, and Country Gentleman, of New York. But it would be well for Pennsylvania farmers to give the journal of their own State the preference. Encourage home literature as well as home

When the agricultural journal has been read and discussed, any other paper which the family have been taking, will next gest the expediency of selecting the best and most substantial-journals which can

years old, walked on Tuesday seven miles, his "butty" on the corners of the streets, weekly paper, and every incident, every useful fact, every fruitful suggestion, every instructive sketch, and absorbing parthat which their nature so urgently demay be taken up where it was left off the previous evening: The story of our national birth, the struggles of our emigrant fathers, the heroic actions of the Revolumany who have not made the experiment but be themes of interest to the family The mind will not be satisfied with the and periodicals, testifies that such com- amined to discover where these things occurred. American History will draw the reader to English history. The story of chanics will deny that their evenings are the Pilgrim Fathers, and the Quaker Emgenerally very unprofitably employed igrants, will lead to the story of that oppression in England which caused our of those golden moments. If they have fathers to fly to the wilds of America; for but one evening in the week, let them the mind when once put in motion is
