Wal, whose being scared at first) they stubbed their toes
I wender where they'd land!

I wonder if that reinbow has been shinin'

Since sunrise at creation— And this waterfall been underminin' With constant splatteration!

That Moses never insultioned ye, I've wondered,
While other things describin?
My conscience here ye must have formed and thunder'd
When the Debu e was subskin?

"My thoughts are strange," magnificant and deep, "When I look down to ther".

O what a glorious place for washing sheep Ninpers would be?

And O what a tre-men-done water-power Is wasted o'er its edge! One man might furnish all the world with flour With a single privilege!

I wonder how many times the Lakes have all Been carried over here! Why Clinton doin't fel the great Canawl Up, here, I think is queer. The thoughts are "very strange" which crowd my brain

A Lesson for Boys.

One of the wealthiest merchants of New York city tells us how he commenced buainess :]

I entered a store and asked if a clerk was not wanted. "No," in a rough tone, was the answer, all being too busy to bother with me, when I reflected that if they did not want a clerk, they might want a laborer; but I was dressed too fine for that. I went to my lodgin s, put on a rough garb, and went into the same store, and demanded if they wanted a porter; and ngain, "No, sir," was the response-when I exclaimed in despair, almost, "A laborer? not my object. I must have employment and I want to be useful in business." These last words attracted their attention; and in the end I was hired as a laborer in the basement and sub-cellar, at a very low pay, scarcely enough to keep body and soul together. In the basement and sub-cellar, I soon attracted the attention of the counting house and chief clerk. I saved enough for my employers, in little things wasted, to pay my wages ten times over, and they soon found it out. I did not let anybody about commit petty larcenies without remonstrances, and remonstrances would not never growled, but told every body to go weeks. home, "and I will see that everything is right." I loaded off at day-break packages or nearly completed, are the following for the morning boats, or carried them my Gen. Schuyler self. In short, I soon became indispensable to my employers, and rose and rese money enough, as you see, to give me any

A PERFECT DEFINITION .- When the Committee of the French Academy Dietionary, Cuvier, the celebrated naturalist, came one day into the room where they were holding a session. "Glad to see you, M. Cuvier," said one of the forty; " we have just finished a definition which we think quite satisfactory, but upon which we should like to have your opinion. We have been defining the word crab, and we have explained it thus: "Crab, a small red fish, which walks backwards." " Perfect, gentlemen," said Cuvier; only, if you will give me leave, I will make one small observation in natural history; the erab is not a fish-is not red-and does M not walk backwards! With these exceptions, your definition is excellent."

THE MUSICAL PIONEER 4 CHORIS-

A funny story is told of a man who stole a five dellar bill out in Indiana. In order to lessen the crime, his counsel tried to prove that the note was not worth five dollars, it being at a discount. The prosecutor said he knew the prisoner was the meanest man in the State, but he did not think he was so all-fired mean as not to be

willing to steal Indiana money at par. "How fortunate I am in meeting a rainbeau in this storm !" said a young lady who was caught in a shower the other day to her beau of promise who happencel along with an umbrella. " And I." said he, gallantly, " am as much rejoiced as the poor Laplander when he has caught

Chester County ONE and Two Horse Endless Chain POWER.-The undersigned being convinced by practical experience of the superi-ority of Vandershee's Tread Power over the ordinary five horse power now in use in the West Branch country, for threshing out grain, have purchased the patterns and right to make them. We are now making and have on hand a large number, which we propose to introduce on the plan if they don't answer to the letter of the guarantee given with each of them, the machine will be taken back and the money refunded, if paid. They are now almost the only entire Threshing Machines in use in Chester, Montgomery, Berks and Delaware counties. Their advantages are that they will do almost double the work, according to the number of horses used, than the old machines will do; is they will save at least two hands; at and Threshing can all be done snugly closed up in the barns, in wet days, when the hands would be otherwise

Hussey's American Reaper & Mower. FOR 1856....This Machine was put I in successful operation in 1833, and con-tinued to be the only Reaper and Mowing Ma

chine in the World of any pratical value up to 1845-twelve years after its introduction. Other Reapers are now offered with glowing Advertisements and Certificates of Gold and Silver Medals. But the Parmer, in search of the best Reaper, and not posted in the matter, had better see a little further. One of the other Reapers took the great medal in England. at the premature trial in 1851; before the close of the harvest of the same year, however it was totally beaten by a HUSSEY REAPER, which received the ununimous award of an impartial Jury of twelve English farmers. The fact is that Hussey's machine is achieving a series of triumine and position there, which it has already secured in the land of its origin If there is any value in 23 years' experience in building Reapers, and using them in the harvest field, OBED HUSSEY, the Father .1 Reapers, can claim it. All who are satisfied with the BEST REAPER AND MOWER, can be suplied by sending their orders early in the season, as the crops indicate a large demand, and we can not have over 200 Reapers ready for the vast harvest of 1856.

We would refer to the following gentlemen. who have used Hussey's machines for several years, and will testify to their superiority:

FREEBURG ACADEMY NORMAL SCHOOL.

THIS Institution is located in the quiet beautiful and healthy village of Freeburg Snyder Co., Pa. It will commence the second (Spring) quarter of its second session on the 23d of March. Encouraged by the very liberal patronage it has heretofore received, and in view of the great want of the proper instruction for Teachers in this and neighboring counties, a NORMAL DEPARTMENT, for the special training of Teachers, and tho ing to become such, will hereafter be connec-ted with this Institution. And the Principal having secured the services of that justly pop-Teacher, Lecturer, and Author, Prof. J. P. Srospens, for a limited time, hopes that th Strongard, for a limited time, tapes much additional expense thus incurred will at leaf render this Institution more worthy of patronage. Frof Stochard will endeavor, by Lectures and other means, to prepare Teachers for the ordice duties of the School-room; and those who enjoyed his instructions at the late Teachers lustitute, know how able he is to do this. It is hoped Teachers will avail themselves of his services while in

Patent Magnetic Lightning Rods, and in this alone. This Rod has been examined by the nost scientific gentlemen in the world-Professors M'Murtrie, Johnson, Wallor and man others that have examined them, recommend an speak of them in the highest terms of approbation and have pronounced them the only safe rods in use in this or any other country for the protecti of Lives and Property. One advantage is to divide and throw back a part of the electric fluid harmless to the clouds; in time of a stroke this enables the rod to conduct that portion of fluid that belong to the earth without the slightest danger of lea ving the conductor. This rod has many other advantages over the old one. The only place of

RECOMMENDATIONS. I have this day carefully inspected a conductor or lightning Rod, with vane and judex, exceeded by Mr. Thomas Armitage, on Bellevus House, Gloscoster, and have no instation; in saying that it is not only the best I have ever seen, but that it is the only one I have yet

1 am well satisfied that the Magnetic Lightning F manufactured by Mr. The mas Armitize, or is the best that has over been made. I have years in the study of the laws of electricit iom, and have no hesitation in saving that ism, and have no he-station in saying that these Rods are constructed upon the only principle of safety. The electric shock is received and dispersed by the magnet at the top of the red, and it would be impossible, according to the laws of attraction and repulsion, for a building to be injured by a stroke of lightning when protected by one of these rods. I have been acquainted with Mr. Armitage for several years, and before he commenced the manufac-ture of these rods I examined the principle on which the are constructed, and felt convinced that their adoption are constructed, and felt convinced that their adoption would be attended with complete success. The increasing demand for these rooks and the extensive sukes in all parts of the country, is ample communication of their utility and superiority.
