THE COMET COMING!

BY DR. OLIVER W. HOLMES.

THE COMET! He is on his way,
And singing as he flies;
The whistling planets shriek before
The spectre of the skies!
Ah! well may regal suns burn blue,
And satellites turn pale—
Ten million cubic miles of head,
Ten billion leagues of tail!

On! by whistling spheres of light,
He flashes and he burns;
He turns not to the left nor right,
He asks them not their names;
One spurn from his demoniac heel—
Away, away they fly,
Where darkness might be bottled up
And sold for "Tyrian dye."

And what would happen to the land,
And how would look the sea,
If in the hoarded devil's path
Our Earth should chance to be?
Full hot and high the sea would boil,
Full red the forests gleam—
Methought I saw and heard it all
In a dyspeptic dream.

I saw a tutor take his tube
The Comet's course to spy;
I heard a scream—the gathered rays
Had stirred the tutor's eye.
I saw a fort—the soldiers all
Were armed with goggles green;
Pop crackled the guns! whiz flew the balls!
Bang went the magazine!

I saw a poet dip a scroll
Each moment in a tub,
I read upon the warping back,
"The dream of Belteshub;"
He could not see his verses burn,
Although his brain was fried,
And ever and anon he bent
To wet them as they dried.

I saw the scalding pitch roll down
The crackling, sweating pines,
And streams of smoke, like water-spouts
Burst through the rumbling mines;
I asked the fireman why they made
Such noise about the town;
They answered not, but all the while
The brakes went up and down.

I saw a roasting pullet sit
Upon a baking egg;
I saw a cripple scratch his hand
Petrographicking his leg;
I saw nine grins upon the wing
Towards the frozen pole,
And every mother's sucking fell
Crisped to a crackling coal.

I saw the air that browned the grass
Writhe in the blistering rays,
The heritage in his parching jaws
Was all a sorry blaze;
I saw huge fishes, boiled to rags,
Belch through the bubbling brine;
And thoughts of supper crossed my soul—
I had been rash at nine.

Strange sights! strange sounds! O, fearful dream!
Its memory haunts me still—
The steaming sea, the crimson glare,
That wreathed each wooded hill.
Stranger! of through thy reeling brain
Such midnight visions sweep,
Spare, spare, O spare three evening meal,
And sweet shall be thy sleep!

NOT SO VERY "LOONEY."—At the Insane Asylum at Utica, New York, after Mrs. Dix, the well known philanthropist, had passed through, an insane girl made one of a cluster called together by the occasion:

Girl. "Who was the lady whom we saw with the Doctor?"

Lady. "That was Miss Dix, the philanthropist."

Girl. "What is a philanthropist, please?"

Lady. "Philanthropist, my dear, is a word from two Greek words, signifying a lover of men."

Girl. "Well, then, are not all the women philanthropists?"

☞Nothing more lovely than the innocent simplicity of children, as manifested before they have learned of their parents and school teachers to lie and dissimulate.

Take the following specimen.

"The question of a tea party turning upon the propriety of one's mixing up cakes with a pinch of snuff in the fingers, fearing some might be scattered in the dough, a lad remarked that he had seen his mother mix cakes with a pinch of snuff in her fingers and not scatter a bit. "Why, Billy!" replied the offended lady, "how dare you lie!" "Well, mother, I don't know but I do," innocently replied the urchin; "I don't know but you did scatter a very little."

In the Kickapoo (Kansas) *Pioneer*, we find the annexed charming little billet-doux, which serves to exhibit the usual mode of interchanging the courtesies of life in Kansas:

To Hon. A. V. Brown, P. M. General—The undersigned would respectfully call your attention to the gross negligence of the Postmaster at Westport, Mo., John L. Detchmundy, who is in the habit of delivering my letters to one H. Clay Pate, thereby enabling said Pate to *steal money* from me, which he has repeatedly done.

Respectfully, &c., A. W. KING.
Kickapoo City, K. T., April 18, 1857.

This "Clay Pate" was a Captain of a Border Ruffian gang, and is a favorite of the Administration.

A young man named Knox, a printer, has been troubled with a sad bereavement. An uncle whom he had never seen, died the other day and left him $75,000. Mr. Knox has our entire sympathy.—*Erie Observer.*

Yes, and the sympathy of everybody else. A man with $75,000 always has. But a printer with that amount of funds needs sympathy. There must be something wrong in the solar system.

CAPTAIN JONES, of the U. S. Army, a Virginian by birth, stationed not long since at Benecia, California, had with him, as body servant, a slave named Joe. One morning the Captain was startled by the news of Joe having shot another negro, and sternly asked him how he dared to do so. Joe seemed at first cast down, but rallying himself, and looking the Captain full in the face, replied: "De fact is, massa, dat ar nigger was one of dem New York free niggers. He 'sulted me, and I had to take high Sudron ground wid him."

A DILEMMA.—On the 21st ult., a wedding party in North Brookfield, Mass., having arrived within half a mile of the house of the bride, were blocked in by snow, and it required the labor of *eight men for an hour* before the banks were so shoveled away as to admit of a passage.

Aaron Bedbug, of Montgomery county, Ky., intends petitioning the Legislature to change his name. He says that his sweetheart, whose name is Oliva, is unwilling that he should be called A. Bedbug, she O. Bedbug, and the little ones little Bedbugs.

The man who was so forgetful, that he forgot his honest debts, we learn, had his [illegible] by a Justice of the Peace.

Helmbold's Genuine Preparation
OF
Highly concentrated Compound Fluid Extract of
BUCHU,

FOR Diseases of Bladder, Kidneys, Gravel, Dropsy, Weaknesses, Obstructions, Secret Diseases, Female Complaints, and all diseases of the Sexual Organs arising from excessive and imprudencies in life, and removing all Improper Discharges from the Bladder, Kidneys or Sexual Organs, whether existing in Male or Female, from whatever cause they may have originated,

and no matter of how long standing,

giving Health and Vigor to the frame, and Bloom to the pallid cheek.

Joy to the Afflicted!

It cures Nervous and Debilitated Sufferers, and removes all the SYMPTOMS, among which may be found

Indisposition to exertion, loss of power, loss of memory, difficulty of breathing, general weakness, horror of disease, weak nerves, trembling, dreadful horror of death, night sweats, cold feet, wakefulness, dimness of vision, languor, universal lassitude of the muscular system, often enormous appetite with dyspeptic symptoms, hot hands, flushing of the body, dryness of the skin, pallid countenance and eruptions on the face, pain in the back, heaviness of the eye-lids, frequently black spots flying before the eyes with temporary suffusion and loss of sight, want of attention, great mobility, and restlessness, with horror of society. Nothing is more desirable to such persons than solitude, and nothing they more dread for fear of themselves; no repose of manner, no earnestness, no speculation, but a hurried transition from one question to another.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follow Loss of Power, FATUITY, and EPILEPTIC FITS—in one of which the patient may expire. Who can say that these excesses are not frequently followed by those direful diseases—Insanity and Consumption? The records of the Insane Asylums, and the melancholy deaths by Consumption, bear ample testimony to the truth of these assertions. In Lunatic Asylums the most melancholy exhibition appears. The consideration is actually sudden and quite desolating—not the birth or grief over its death. Should a sound of the voice occur, it is rarely articulate.

"With woeful measures, wan despair
Low sullen sounds his grief beguiled."

Debility is most terrible! and has brought thousands upon thousands to untimely graves, thus blasting the ambition of many noble youths. It can be cured by the use of this INFALLIBLE REMEDY.

If you are suffering with any of the above distressing ailments, the BLUE EXTRACT BUCHU will cure you. Try it and be convinced of its efficacy.

BEWARE OF QUACK NOSTRUMS AND QUACK DOCTORS, who falsely boast of abilities and references. Citizens know and avoid them, and save long suffering, money, and exposure, by sending or calling for a bottle of this Popular and Specific Remedy.

It allays all pain and inflamation, is perfectly pleasant in its taste and odor, but immediate in its action.

HEMBOLD'S EXTRACT BUCHU

Is prepared directly according to the Rules of *PHARMACEUTICAL CHEMISTRY*, with the greatest accuracy and Chemical knowledge and care devoted in its combination. See Professor Bowers' Valuable Works on the Practice of Physic, and most of the late Standard Works of Medicine.

☞ $100 ☜

One Hundred Dollars will be paid to any Physician who can prove that the Medicine ever injured a Patient: and the testimony of thousands can be produced to prove that it does great good. Cases of from one week to thirteen years' standing have been effected. The mass of Voluntary Testimony in possession of the Proprietor, vouching its virtues and curative powers, is immense, embracing names well known to SCIENCE AND FAME.

100,000 *Bottles Have Been Sold,*

and not a single instance of a failure has been reported!

Personally appeared before me an Alderman of the City of Philadelphia, H. T. Helmbold, Chemist, who being duly sworn does say, that his preparation contains no Narcotic, Mercury or injurious drug, but are purely Vegetable. H. T. HELMBOLD, Sole Manufacturer.

Sworn and subscribed before me this 25th day of November, 1853.

Price, $1 per Bottle, or Six for $5 Delivered to any Address,

accompanied by reliable and responsible Certificates from Professors of Medical Colleges, Clergymen and others.

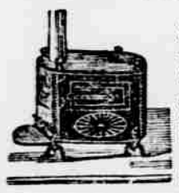
NOTICE.

THE undersigned have this 2d day of Feb. A. D. 1857, entered into Co-Partnership for the purpose of carrying on a **General Foundry Business** at the Brick Foundry in Market street, Lewisburg, under the name and firm of Frick & Lilley.

WILLIAM FRICK,
JOHN LILLEY.
Lewisburg, Feb'y 2, 1857.



A general assortment of COOKING STOVES for coal or wood, Stone Coal Stoves, Wood Air-Tight and Parlor Stoves, &c. in variety always kept on hand.

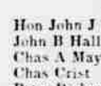
CASTINGS of all kinds made to order.

DENTAL CARD.

THE new method of inserting artificial Teeth, Gum, &c., known as

Allen's Continuous Gum Work,

is, without exception, the best improvement ever made in the art of Dentistry. This work, when properly constructed, is the most beautiful, the cleanest, combines the greatest strength with durability, and adds more to a clear and distinct articulation, than any other kind of



work ever brought before the public. And not only this. By a beautiful discovery in combination with this style of work, we can give the face its natural expression, without, in the least, interfering with the usefulness of the teeth in mastication.

I would take this method of informing those interested that I have purchased the Patent Right for this valuable improvement, of the inventor, John Allen, (now of New York,) for this and several adjoining counties, and that I am now manufacturing an article of Teeth and Gums that will compare favorably with anything in that line that has ever been made in this or any other country. I ask all, and especially those that need teeth (if they have engaged them or not,) to call, and examine for themselves.

JOHN LOCKE, Lewisburg.

ARE YOU INSURED AGAINST LOSS BY FIRE!—There are but few who receive sympathy who incur loss by neglecting this most necessary and substantial precaution. We often see it announced that persons have lost their stocks of Goods and Furniture, and results of years of industry swept from them by the devouring element over which they have no control but by being insured.

Insurance protects you from the incendiary, negligence of servants and the casualties of your neighbors. It will impart confidence to your creditors, and give a character of prudence and precaution to all your business transactions.

It requires but a very *small* sum to insure in sums ranging from $100 to $1000, and yet how many there are who have no insurance upon Goods, Furniture, or anything else! If your Stock is small, still the Loss to you might be serious.

This Company insures *BUILDINGS, MERCHANDIZE, GOODS, FURNITURE, MACHINERY* and *STOCK* FROM $100 TO $5000,

at the Lowest Rates and upon the most Liberal Terms, and PROMPT PAYMENT on the adjustment of Loss.

To the Farmers!

MANNY'S COMBINED REAPING
AND
MOWING MACHINE,
with Woods' Improvement.

THE undersigned having been appointed Agent for the sale of these Reaping & Mowing Machines in Union and Snyder counties, offers them to the public, believing them to be the

Best Combined Machine in Use.

These Machines have been in successful operation, and have rendered general satisfaction. They are of easy draft, easily managed, and do the work in a workmanlike manner. Manny's received a Silver Medal at our State Fair, last fall, and drew the first premium at the County Fairs of York, Cumberland, Centre, Huntingdon, &c. where it was exhibited.

Persons in want of a Reaping & Mowing Machine, will do well to call before purchasing. For further particulars, and information please CALL upon the subscriber who always takes pleasure in exhibiting this Machine.

N.B. Early orders are solicited, in order to have the Machines on hand in season, as the number received from the Manufactor will correspond with the demand.

CYRUS DREISBACH.
Lewisburg, April 10, 1857. 680m3

Chester County

ONE and Two Horse Endless Chain POWER.—The undersigned being convinced by practical experience of the superiority of *Vanderslice's Tread Power* over the ordinary five horse power now in use in the West Branch country, for threshing out grain, have purchased the patterns and right to make them. We are now making and have on hand a large number, which we propose to introduce on the plan if they don't answer to the letter of the guarantee given with each of them, the machine will be taken back and the money refunded, if paid. They are now almost the only entire Threshing Machines in use in Chester, Montgomery, Berks and Delaware counties. Their advantages are that they will do almost double the work, according to the number of horses used, than the old machines will do; ☞ they will save at least two hands; ☜ and Threshing can all be done snugly closed up in the barns, in wet days, when the hands would be otherwise unemployed. T. CHURCH & CO.
Hartleton, Union Co., Pa.
Apply to THO'S CHURCH, Hartleton, or
or D. L. ROOKE, Union Furnace.]y615

Hunsecker's CLOVER HULLER.

THE subscribers still continue to manufacture the above Machines, and as there are over 500 of them now in use in Union and adjoining counties, we deem any further recommendation unnecessary.

The machines are all warranted not only to do good work, but better work than any other kind of machine now in use.

T. CHURCH & CO, Hartleton, Pa.
Apply to THO'S CHURCH, Hartleton,
or L. ROOKE, Union Furnace.]1y652

Hickok's Patent Portable KEYSTONE CIDER & WINE MILL,

patented Nov. 29, 1855.

☞ This is not the Mill sold in 1852. It excels all mills in the market in the ease and speed with which it grinds, and in the great power of the press.

Manufactured at the Eagle Works, Harrisburg.

PLEASE TAKE PARTICULAR NOTICE!

THAT this is entirely new mill—no expense has been spared in its manufacture—all the materials are the very best, and are used unsparingly. The Cylinders are almost twice the length of the former ones, and all, including the top Cylinder, made of Iron. The screw is two inches in diameter, with a heavy ½ V thread cut on it. The beam of the Press is cast iron instead of wood—is made VERY HEAVY, and the thread of the nut cut for four inches through it. The power of the Press is very much increased and cannot be broken by any fair means. The arrangement of the Tub and other parts of the Press, is very perfect. The Boxes and Hopper are all screwed together: the Journals run in long bearings; and lastly, the workmanship shall not be excelled by any machine of the kind whatever. Perfection being the aim, both in the arrangement and the mechanical department.

All persons who have been obliged to use the old-fashioned nut Mill, are aware how inconvenient it is, and especially those who have not large quantities of apples. By having this Mill on your farm in addition or farm, you can, at any time, in a few minutes make a few gallons of sweet cider for present use; or you can very expeditiously make up a few barrels. The Machine, well worked, is capable of making 6 to 12 barrels of cider a day, with ease.

The machine is made to run by horse, steam or hand power, and when the apples are ground, a small boy of fourteen years of age can press the pomace with all ease. The following may be adduced as the decided advantages of this mill:

First—It will make more Cider than any other Press, with a given quantity of apples in a given time, and with much less labor and expense.

Second—It will make cleaner and sweeter cider than any other Mill.

Third—You can make the cider as you want it, and when you want it; and in quantities from one gallon to barrels.

Fourth—With it you can press your Currants, Cherries, Berries, Cheese, Butter, Lard and Tallow.

Fifth—With its use you can at all times have fresh and sweet cider.

With all the advantages resulting from the possession and use of such a Machine—at a price so low that it is within the reach of all—can it be that any intelligent Farmer would do without it?

RECOMMENDATIONS.

Jacksonville, June 15th, 1854.

W. O. HICKOK: SIR—I have one of your Improved Cider Mills; I used the Mill last October, and on trial I ground fifty bushels of apples per hour. I keep the ground apples twelve hours, and I can press out two barrels of cider per hour with two men. I can recommend your improved Cider Mill to all fruit growers, for speed and a saving of labor. I can make thirty-five gallons of cider from nine and one-half bushels common apples. The cider can be pressed from the pomace without using water now. Cider will keep one year when water is not used at the press.

JOHN M'COMEE.

St. Louis, July 29, 1855.

MR. W. O. HICKOK:—Your Mills got here, and we have sold them and telegraphed for twelve more. As they are a much better made and better looking Mill than the other kind, we know they will sell quickly alongside of them at $50—price of the other $35.

We have six of the other kind, but, as we said before, people won't look at them alongside of yours.

Yours, Very Respectfully, WM. M. PLANT & Co.

Youngstownstown, June 16, 1855.

MR. W. O. HICKOK: DEAR SIR—It gives me great pleasure to lend my feeble influence in recommendation of your invaluable Patent Cider Mill. Any person who has made cider by the old process will quickly perceive, should they procure one of your new Mills, the utility and economy of your invention. I regard it as one of the best inventions now in use. Although I have had it but one year, it has amply repaid me for what it cost. Cider expressed through one of your machines is less liable to fermentation, and can be preserved sweet longer than that produced through the old-fashioned Mill, from the very fact that it is more free from pommel, which always has a tendency to acidity, and unfits it in many instances for domestic use. Yours, respectfully, W. QUIGLEY.

This is to certify, that I purchased of D. Landreth, in October, 1852, one of Hickok's Patent Cider Mills, and have had it in use ever since. Perfectly satisfied with it myself, I have no hesitation in pronouncing it a very useful and indispensable Machine to the farmer. With it, one man and two boys can make from five to six barrels of good cider per day, easy. Many of my neighbors have purchased similar Machines. The Mill has been greatly improved since I bough mine. W. G. WARD.

May 11, 1854. Ridley, Delaware County, Pa.

I hereby certify that I have used W. O. Hickok's Improved Portable Cider Mill, and consider it a valuable invention in the economy of time. The cider is cleaner and better than that made in the usual way. I am well pleased with it, and should be unwilling to part with it for quite a premium on the advanced cost. JOHN S. HALE.

July 1, 1854. Portland, Ct.

☞ More than one hundred Silver Medals and Diplomas have been given to my Mill within the last four years.

☞ This Mill occupies about 2½ feet by 3 feet, and is 4 feet high, weighing 370 lbs, is every way portable and convenient. ☜ [PRICE $40.

EVANS & WATSON,

Philadelphia Manufactured
Salamander Safes
No. 26 S. Fourth St., Philadelphia.

Truth is Mighty, and Must Prevail.

Report of the Committee appointed to superintend the Burning of the Iron Safes, at Reading, February 27, 1857.

READING, March 4.

The undersigned, members of the committee, do respectfully report, that we saw the two Safes unanimously agreed upon by Farrel & Herring and Evans & Watson, placed side by side in a furnace, viz: The Safe in use by the Paymaster of the Philadelphia and Reading Railroad Company, in his office building, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz in his store, manufactured by Evans & Watson, and put in books and papers precisely alike.

The fire was started at 8½ o'clock, A. M., and kept up until four hours of green hickory, two cords dry and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee. The Safes were then drawn off with water after which they were opened, and the books and papers taken out by the Committee and taken to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans & Watson were but slightly affected by the intense heat, while those taken from the Safe manufactured by Farrels & Herring were, in our judgment, damaged fully fifteen per cent. more than those taken from Evans & Watson's Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both safes.

JACOB H. DYSINGER,
DANIEL S. REUTER.

Having been absent during the burning, we fully coincide with the above statement of the condition of the papers and books taken out of the respective Safes.

G. A. NICOLLS,
B. H. MUHLENBERG,
JAMES MILLHOLLAND.

Evans & Watson have now on hand **300,000 pounds** of the above SAFES, which they offer for sale on better terms than any other manufacturer in the United States.

S. H. FULTON. } W. G. MASON.

HERRING'S SAFE.

THE ACKNOWLEDGED
CHAMPION:

THE RECENT TRIALS at Reading have enlisted the earnest attention of public opinion, and confirmed the verdict of more than 250 excited spectators, pronouncing unanimously that "Herring's" is the only safe that will withstand fire.

Extract from the Committee's Report on the Trial of Iron Safes at Reading:

"On the 26th of February all the members of the Committee met to witness the Safes and locks of experts placed in them; and were part of the Committee that was present at the burning of the Safes. After a careful and essential burning for five hours, the Fall of Messrs. Evans & Watson was first opened, the fastenings on the inside, and the contents partially consumed, while the contents in the safe of Messrs. Farrels & Herring were in good condition, and on the front of the book of Reading, March 2, 1857.

(Signed,) H. F. TELLY, }
F. C. FRICKMAN, } Committee.
A. H. PEACOCK, }

And endorsed by each [illegible] of the Reading.

The above safes can be inspected at the store of Lantz, where the public can see for themselves the effects of the greatest heat of the "Philadelphia Fatent Herring's Safe" defeated and vanquished from their endurance!

FARRELS & HERRING,
24 Walnut Street, Philadelphia.

Only makers in this State of Herring's Patent Champion Safes.

The attempt made by other parties to bolster up the reputation of a safe which has proved itself to be a wonderful *fire* in Philadelphia, has failed the same as being the cast of an agent's stone. If A. Lantz has other safes, (different from those they sold to "burn up" one of Herring's,) that he thinks can cope with its superiority, why not bring them forward. Herring's Safe could not be burned, and has conclusively proved that only reliable safe now makers' Herring's, of which over 1,000 are now in actual use, and more than 500 have been tried by fire without a failure.
