Free National Slavery, sectional!

New York all Right!

The Albany Evening Journal gives the following as the result of the elections for Supervisors in New York...

Table showing election results for Supervisors in New York, listing candidates like Republican, American, and Democratic.

This shows how completely and thoroughly the Empire State maintains its attachment to sound principles.

FROM WASHINGTON.

WASHINGTON, March 14.—Joseph Holt, of Kentucky, entered upon the discharge of his duties as Postmaster General today.

The Grand Jury to day commenced the examination of witnesses in the Beckles case.

Chief Clerk Shergill is now acting as Commissioner of Patents.

Thomas B. Florence, of Philadelphia, who has been ill ever since the close of the session of Congress, is convalescing.

Joseph Miller, ex-member of Congress from Ohio, has been appointed Associate Justice for Nebraska...

It is reported that unless Western fortifications are to be reduced...

The United States Senate on Wednesday week confirmed the nomination of Joseph Holt, of Kentucky...

Chief Justice Roger Taney, in his annual report to Congress, has declared his opinion...

Ex-Gov. Denver has resigned his office at Washington and returns to California.

Democratic "Retrenchment."

We hear a good deal lately from certain quarters of the household of the "National Democracy" about "retrenchment."

Indeed, they are so clamorous in their demands in this direction, that very many of the people, who glance at things superficially, very naturally suppose there must be "something in it."

There is something in it; but their demands are as shaped as to force the barons on the shoulders of the people.

They would benefit the few, at the expense of the many. That this is so, we appeal to the facts.

Instead of cutting down the rich Ministers' salaries, they urge the policy of raising the poor man's postage.

Instead of ceasing to fill the tiller's purse, they would empty the laborer's pocket.

Instead of making the least effort to stop the leaks in the Treasury, they are willing to keep them running so long as they can borrow; and they are determined to borrow all they can during the present administration, because they can shove off payment, with compound interest, upon the next one.

They made most dolorous ado about the nation's poverty when asked to give the Farmers College sites, but they are abundantly able to purchase Cuba.

They are most distressingly poor when any measure of Internal Improvement is asked for, but are quite rich enough to establish an armed Protectorate over the neighboring province of Mexico.

They are too poor to dig a sand bar out of the Hudson, but they are rich enough to build Southern Forts by the dozen, and War Steamers by the score.

Such is Democratic "retrenchment!" It does not consist in bridle their own extravagance, but in saddling the consequences of it on somebody else.

Let the people but see and understand the facts in their true light, and they will hurl this "heartless and faithless" party from power.

THE TWO PURCHASES.—When the United States bought Louisiana, including the grand Valley of the Mississippi, from France, which was glad to sell, a little over eleven millions of dollars was paid for it.

The territory then purchased embraced the magnificent extent of almost a million of square miles, and much of it not surpassed in fertility by any on the globe.

It was then nearly all unoccupied, and therefore saleable and valuable to the national Treasury. Now put Cuba in contrast. Mr. Buchanan asks an appropriation of thirty millions to begin negotiations for a purchase of that Island, admitting that a consummation of his plan will cost us a hundred and fifty millions. And what is Cuba? A small island filled with negroes, creoles, and a few lazy Spaniards, without a foot of unoccupied territory to replenish the U. S. Treasury by sale, and promising wars, agitations and perhaps an ultimate division of the Union.

Is the possession of Cuba worth the cost, added to the potentiation risks looming up from its acquisition?

From Kansas—Election on the 25th of March. LEAVENWORTH, March 14.—Governor Medley has issued a proclamation for an election on the fourth Monday in March, in accordance with the Act of the Legislature providing for the formation of a Convention for a State Government.

Three months residence prior to the election is requisite to vote. Aliens having declared their intentions to become citizens are qualified. Delegates to the Constitutional Convention are to be elected.

FROM HARRISBURG.

Messrs. Wagonseller and Patterson, the members from this district, have, during the session, voted in favor of every measure that was introduced in the House to reduce the salaries of the members.

They have also voted against a repeal of the tonnage tax. It is not likely the Members will reduce their salaries or repeal the tonnage tax.

Mr. Wagonseller presented a petition for a change in the place of elections in Union township, Union county.

Mr. Gregg presented a remonstrance from the citizens of Harrison, Union Co., against any law interfering with their present charter, granted by the courts.

The Baltimore M. E. Conference held its session in Lewisburg, Greenbrier Co., Va., at the same time the East Balt. Conf. was in session at Williamsport, Pa. The Balt. Conf. reported about 100 members.

The Conference of the Meth. Prot. church commenced at Georgetown, D. C., 9th inst., comprising about 75 members.

The East Penna. Conference of the Evangelical Association was commenced in Baltimore, 9th inst., and adjourned to meet in Williamsport, Pa., 24 Thursday in March, 1859. The following appointments were made, elsewhere:

York, S. Wolf; Cumberland, J. M. Young; Baltimore, J. C. Farnsworth; In Southwestern District, P. Wagoner, P. E. Buffaloe, A. Longstaff and S. Davies.

Columbia, E. W. Wilson and Z. Hornberger; Lycoming, H. Price and M. Walker; Black Horse, S. A. Ward; Cherry, J. Hartzler; Luzerne, to be supplied.

Holt, Mr. Holt!—The Sanbury Amer. has some time since pronounced as "subversive" the desire of the mass of the people in the upper end of Northumberland to be reunited with their natural neighbors, the people of Union county.

Well, there is "some method in their madness." But that is not the only funny conception of the journal Editor: he has since published some wise body's plan to "re-annex" Columbia, Montour, Union, Snyder, and we suppose all the other counties north and west—to the old mother Northumberland of the last century.

(A proposition about as feasible as to prevent the "upper end" from coming over this way.) There's a small mistake, however, in our neighbor's programme: the real design is to "re-annex" little Northumberland to Old Berks, where it formerly "belonged!"

At the M. E. Conference in Williamsport, it was stated that there was a nominal debt of \$10,000 upon Dickinson Seminary, and that "the buildings were seized and would shortly be sold."

While the Conference expressed the utmost interest as individuals in its maintenance, they declined assuming responsibility for its indebtedness. An institution which has gathered so many students, and conferred such honor and pecuniary benefits upon Williamsport, deserves the fostering care and liberal contributions—in bonafide money—of her citizens.

On Sunday last, Dr. John Wright of Halifax, and two small children, took a walk on the Northern Central R. R., and while resting on a bridge near a curve, a coal train came suddenly along and before they could get out of the way killed Dr. W. and seriously injured his daughter, the boy escaping.

There was an accident and water near which deadened the sound, but whether the signal was given is disputed. Dr. Wright was a Member of the Legislature recently, and Brigade Inspector at his sudden death.

Wreck of a Slave with 600 Negroes. By the arrival at Havana, of the steamer Europa, we have advices from Porto Rico to Feb. 26. The Bulletin Mercantile, of the 12th, says that on the night of the 10th, a large clipper ship, name unknown, but with a T on one side of the prow, went ashore near Punta de Candelo, and made signals of distress.

In the morning she was discovered to be a slave ship from the coast of Africa, with six hundred negroes on board. The captain and mate, and some of the crew had died on the passage, and the rest of the crew were sick. Twenty-eight sailors were arrested and locked up in prison. The negroes were taken to the capital in the steamer Herman Cortes, but what disposition was made of them does not appear.

GROWING ONIONS.—I noticed a piece in the Rural in regard to growing onions, and would say to any one who wishes to raise large onions, sow them as soon as the frost is out of the ground. I sowed mine last spring when the snow was nearly two feet deep in some parts of the garden, and my onions, in the fall were nearly as large as a common tea-saucer.—Rural Editor.

In despoiling an old dwelling house at Deep River, Conn., a short time since, a Mrs. Williams requested her son to look for a twenty-five cent piece that she lost, sixty years ago, describing the circumstance and the location. The money was found. [How much would that 25 cents have earned in the sixty years, upon compound interest?]

TO MAKE PRIME VINEGAR.—A correspondent of the Ohio Cultivator vouches for the merit of the following recipe for making vinegar. Take and mix one quart of molasses, three gallons of rain water, and one pint of yeast. Let it ferment, stand four weeks, and you will have the best of vinegar.

The Court House of Clarion county, built about 1842, was accidentally burned on the 10th inst. The books and papers were saved. A defective fuse was the cause. Insured \$5,000 in the Lycoming and \$2,000 in the York Company.

Webster's Residence at Washington.

[From a letter by N. P. WILLIS in the Home Journal, we take the following, suggested by a recent visit of the writer to Washington.]

"With a rainy day and no inhabitants, Washington, of course, looked 'as if its potatoes had been dug,' but we walked about a little, under an umbrella, and saw the enlargements of the Capitol, and stopped, for a moment, before the shut doors of one or two of the houses made famous by having been once the dwellings of men who were of the 'Sacred Legion of the Sombodies'—Benton's and Webster's, among others. The latter, a small brick tenement of two stories, near the Capitol, is particularly interesting to those who know the charms of the great Daniel in familiar life—for his thought were not always 'shoes for giants in the world of pigmies.' In the small dining room in the basement of that house, and with the simplest of dinners upon the table, there were feasts of wit and humor, at which he shone, (say those who were intimate with him) even more than in the Senate Chamber near by. Here rose the 'godlike man' an hour before sunrise, every morning of the winter season, and first made all the fires in the house, kitchen, bedroom and parlor—for it was 'a thing he had a knack at, and he lived thus to air his drudge-abilities before getting upon his pedestal for the day.' Then he took his basket and walked down to the market, to have a chat with the butcher, and himself to choose the joint and the vegetables for the day's larder—home again before his great eyes were looked for by the curious. And it is of this cordial Webster, let me say—'in whose mortal body the great inhabiting intellect was a guest he was often weary of—that we want a picture drawn by some friend who thus remembers him. One of the best models of humorous practicality in all literature, I fancy, is a letter of Webster's dated in this very house at Washington, and written to the laboring man who was his farm tenant at Marshallfield. Judge Warren of Boston, his possession of it, with other specimens of the great statesman's vein of grave drillery and downrightness—(a vein of which all mention is strongly omitted in the biographies of him)—and the Judge, by the way, whom Webster loved so well as the nucleus of the wit and good fellowship of Boston, would be the very man to give us the other picture of his friend—the Marshallfield farmer, with the 'godlike' shut up in the unseen brain chamber where he lodged."

Wm. H. Seward a school teacher in Georgia, in 1837.

The rector, Wm. H. Seward, is late from Union College, New York, from which institution he comes highly recommended as a young gentleman of good moral character and distinguished industry and literary attainments.

This was the present United States Senator's recommendation from the Georgia Journal, March 24, 1839, when, like a young man, took a village school in Putnam county. We say it, that every young student, "seeing it may take again," and show that good moral character and distinguished industry must sooner or later meet their just rewards.

MAOON, (Ga.) March 14.—A letter has been received from Albany, in this State, announcing the murder of Col. Joseph Bond, a citizen of Macon. He was killed on Saturday, near Albany, by Lucius Brown. The difficulty is believed to have originated in Brown visiting one of Col. Bond's negroes. Col. Bond was one of the largest cotton planters of the South, and was one of our most popular and public spirited citizens.

The editor of the London Times, receives the same story as the President of the United States.

ORIENTAL WANDERINGS.

ARAB GRATITUDE.—THE LIGHT OF THE HAEM.

During a successful medical career of more than twenty years, in the course of which he has visited every quarter of the globe, it may well be supposed that Professor Holloway has been the recipient of many distinguished marks of honor and confidence. As the originator of a system of treatment which has swept over the world with a force and rapidity that in this enlightened age, are the prerogatives of truth, his fame everywhere preceded him. Even in traversing Arabia, some years ago, he found that his name and discoveries were well known to the Sheiks of the various tribes, and deputations of Arabs met him at various points of his journey, soliciting the great "Hakim," (their name for a physician) to visit their tents and administer to their ailments.

Those who wish to procure any of the following varieties, (with directions how to cultivate) will call and examine the specimens which I shall grow the coming season, and leave their orders as soon as may be convenient.
