# AGRICULTURAL.

## Gatherings.

Mr. A. P. Davis of Lake Washington, Minn., by selecting the earliest ears of corn for several successive years, has a variety of white dent corn, which he says will always escape the fall frosts, if properly cultivated.

All dead leaves in the orchard, garden and pleasure ground should be collected and placed as a mulch around the trees, bushes vines and canes. A few shovel ulls of compost thrown over them will keep them from being blown away by wind.

Three brothers in Plymouth, Mass., own a cranberry meadow of fifty acres, from sixteen of which they picked last year 1,050 bushels. They intend to devote the remainder of the land to the same crop, and in good years expect to harvest 6,000 bushels.

"To pursue sheep husbandry most successfully," says the *Homestead*, "roots must be raised and fed; grain either raised or bought, will be consumed, and oil meal have to be purchased for food. Their manure is better for the farm than the purchase of superphosphate or guanno."

If sheep are kept in the same lot with cows or fat cattle, no dog will disturb them. As soon as the dogs approach the sheep, they run to the cattle who drive of the dogs. A farmer for thirty years, by adopting this plan, never lost a sheep by dogs, although the same night the same dogs killed sheep in the farms north and south of him.

The influence of food on the quality of milk is very striking. A half starved cow not only yields but little milk, but what it yields is miserably poor. On the other hand the liberal supply of food rich in nitrogenous and phosphatic elements of nutrition tell directly on the milk. Nothing, therefore, can be more injurious than to stint dairy cows in food.

The *Gardener's Monthly* advises that in tying up climbers to wire or other kinds of trellice or lattice-work, they should never be allowed to twine themselves in and about the meshes, as it is often necessary to take off the plant to paint or repair the trellis.—Half-hardy climbers, which require a slight protection in winter, may thus be easily taken down and coiled in a circular form at the roots of the plant, and covered with soil.

The carrot is the most esteemed of all roots for its feeding qualities, and its influence in the stomach upon the other articles of food is most favorable, conducing to the most werfect digestion and assimilation.—This result, long known to practical men, is explained by chemists as resulting from a substance called *pectine*, which operates to coagulate or galatinate vegetable solutions, and thus favors digestion in all cattle.—Horses are especially benefited by the use of carrots.—*Exchange.*

## Keeping Farm Accounts.

Let any farmer make the experiment, and he will find it as interesting and useful to know from year to year the actual produce of his farm. Let everything therefore, that can be weighed or measured; and let that which cannot be brought to a correct standard, be estimated as if he himself were about to sell or purchase it. Let him, likewise, as near as possible, measure the ground on which he plants the quantity of seed that he uses, and manure that he applies.

The labor in doing this is nothing compared with the satisfaction of having done it and the benefits which must arise from it. Conjecture in these cases is perfectly wild and uncertain, varying often, with different individuals, almost a hundred per cent. Exactness enables man to form conclusions which may, most essentially, and in innumerable ways avail to his advantage. It is that alone which can give any value to his experience; it is that which will make his experience the sure basis of improvement; it will put in his power to give safe council to his friends, and it is the only ground on which he can securely place confidence in himself.—*Exchange.*

## Seeds.

Get a complete assortment for next year. Much of the success of farming depends upon this item. For corn select sound ears and those growing two ears upon a stalk. Keep the ears in a warm dry room, until thoroughly dried. Much poor seed corn is planted every year, and people wonder why it does not come up. Early seed potatoes should be secured now. It often make a difference of half in price whether a crop is marketed in July or October. Born up the old garden seeds and get a new stock from some reliable seedsman. Our present postage law brings a seed store to every man's door, and he has no excuse for planting seed that are most too good to throw away, but not quite good enough to come up. Doubtful seeds will not pay when good ones can be had for love money.

## Water-proof Harness Blacking.

"Beeswax (shred fine) eight ounces, turpentine sufficient to cover it; let them stand till the wax is dissolved (three or four days;) ivory black, four ounces; olive oil (I use neatsfoot oil,) two ounces; Prussian blue two ounces. Rub the ivory black and Prussian blue well together to a fine powder in a morter; then add the oil, and gradually the other ingredients, and thoroughly mix them: If it gets hard by keeping, soften with turpentine. One brush only is needed—one end for blacking, the other for polishing."

DWARF PEAR TREES.—Young dwarfs are often seriously injured when planted in exposed places where winds sweep off the snow. Much good may be done in such instances by covering the ground early in winter with manure spread three or four inches in thickness, and in circles from five to eight in diameter around the trees. This was a twofold benefit—it protects the roots from severe freezing, and enriches the soil by the liquid partions of the manure soaking into the earth at the time of every thaw and rain.

TOOLS.—Now that the season is ended, overhaul all implements and vehicles. Repair damages, and if new tools are wanted, secure them, to be ready for next year's operations. If these have no abiding place build a tool house without delay, and illustrate that motto: "A place for every thing, and everything in its place."

WASHING MACHINE.

It is generally conceded that "the best is always the cheapest;" and that being the case great pleasure is taken in introducing to the public

**DOTY'S C OTHES WASHER**

which is rapidly becoming popular and with this Machine the hard work of washing is mitigated to a comfortable and pleasant task. The clothes are placed in hot suds, and shut in. While thus immersed and the steam confined, the Machine is operated as seen above. Thus the work is speedily, clearly and easily done, and that too without tearing and wearing out the clothes, which to a great extent is the cause under the old fashioned rubbing process

With a

**UNIVERSAL CLOTHES WRINGER**

this whole labor of washing is but a pleasant pastime compared with the former mode of RUBBING AND SOAKING, and twisting and wringing. The dirt is so dissolved by the HOT SUDS that but little compression is necessary to expel it. No family in the County should be without

A BUSINESS CHAT.

Good morning, Squire, which way with your bundles of wool?

On my way home, sir; I have got rolls for my old woman to spin;

Well Squire, if it is a fair question, where did you get carding done so soon?

O, at Vance's Factory.

Where is that?

Near Orangeville. I tell you it pays to get carding done there. Vance cards for 6 cts. per lb. if you take and bring your wool. He has re-built his machine and got new cards on. Depend on it no poor rolls are made there, as he is tending his machine himself this season. He says, for an accommodation for those who live at a distance, if they leave their wool at either of the Stores in Orangeville, the same will be attended to. Also, their cloth for fulling coloring and dressing.

Over 24 years, since June 1843, Vance has been steady at the business, with one regular price. No ups and downs in his prices. Rich and poor all served alike.

GREAT IMPROVEMENT IN

*SEWING MACHINES.*

**Empire Shuttle Machine!**

SALESROOMS, 536 Broadway, N. Y.,
250 Washington St cor. Boston,
921 Chestnut Street, Philadelphia,

PATENTED FEB. 14, 1860.

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be

*Simplicity and Perfection Combined.*

It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP nor RAVEL, and is alike on both sides; performs perfect sewing on every description of material, from Leather to the finest Nansook muslin, with cotton, linen, or silk thread, from the coarsest to the finest number. Having neither CAM or COG WHEEL, and the least possible friction, it runs as smooth as glass, and is

*Emphatically a Noiseless Machine.*

It requires FIFTY PER CENT. less power to drive it than any other machine in the market. A girl twelve years of age can work it steadily, without fatigue or injury to health.

Its Strength and wonderful Simplicity of Construction renders it almost impossible to get out of order, and is GUARANTEED by the company to give entire satisfaction.

We respectfully invite all those who may desire to supply themselves with a superior article, to come and examine this UNRIVALLED MACHINE.

One half hour's instruction is sufficient to enable any person to work this machine to their entire satisfaction.

Agents wanted for all towns in the United States, where agencies are not already established. Also, for Cuba, Mexico, Central and South America, to whom a liberal discount will be given.

BEALE'S LATE

**POWELL'S EMBROCATION,**

FOR ALL DISEASES INCIDENT TO HORSES, CATTLE, AND THE

**HUMAN FLESH,**

requiring the use of an external application.

This new Compound, prepared by a practical Chemist, being a full knowledge of all the medical virtues of each ingredient that enters into its composition, is warranted to exceed anything of the kind ever yet offered to the public as an external application for the diseases for which it is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and those who try it once will never be without it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by

FARRIERS

and all who have tried it, to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse is subject.

Many remedies have been offered to the public under different forms, some of these are injurious, others at best of little use, and many wholly improper to answer the purposes for which they are recommended.

A judicious and really useful composition, free from those objections, *has heretofore long been* desired by many gentlemen who have

**VALUABLE HORSES,**

and are unwilling to trust them to the care of designing and pretended Farriers. Their wishes are at length fully gratified, by (Dr. Beale) being prevailed upon to allow this valuable Embrocation (which has proved so efficacious to the various diseases) to be prepared and brought out to the public

This Embrocation was extensively used by the Government during the war.

Address all order to DR. EDMOND BEALE,
602 South Second St. Philadelphia, Pa.

March 20, '67—6mo.

OMNIBUS LINE.

**BROWN & PERKINS,**

Pianos for the People!

**420 Broome St., N. Y.**

We would call the attention of the public and the trade to our elegant New Scale Pianos, in the following styles:

STYLE A, 7 octave, Front large round corners, plain case, either octagon or carved legs, straight bottom, bead mouldings on plinth... $450
STYLE B, 7 octave, same as style A with serpentine moulding on plinth, carved legs and lyre.. 500
STYLE C, 7 octave, Front corners large round serpentine bottom, mouldings same as on style D, carved lyre and desk, fancy carved legs.... 550
STYLE D, 7 octave, Four large round corners, finished back, mouldings on rim and plinth, serpentine bottom, carved lyre and desk, elegant carved top legs..... 600

The above styles are all finished in elegant rosewood cases and have the full iron frame, French action, harp pedal, beveled top, ivory keys and key fronts and exceed in overstrung bass, nearly all the 7 ¼ Octave Pianos now manufactured. They are made of the best materials, and for finish, durability, purity and sweetness of tone, cannot be surpassed. We invite the attention of the public, of dealers and the profession, to a critical examination of the merits of our Pianos

By avoiding the great expenses attendant upon costly factories and expensive warerooms in the city, we are enabled to offer these Pianos at prices which defy competition, and invite all to call and examine them before purchasing elsewhere. Parties ordering from a distance can rely upon receiving their Pianos promptly, and no confusion can arise as the styles are so distinctly designated by the letters A B C D.

The four styles described above, embody all the essential changes in exterior finish of case, which are by many manufacturers run up to 15 and 20 patterns.

**MUSIC DEPARTMENT.**

We would respectfully call the attention of Choir Leaders and Singing School Teachers to our establishment where all kinds of Church Music, Glees and Anthem Books can be obtained on the most favorable terms.

The long experience of our Mr. PERKINS in Musical Conventions, Choirs, the Concert Room and Sunday-School, enables him to give advice and information on all points of musical interest as to the selection of proper works of instruction formation of musical schools—progress in musical studies, and items of general interest to composers, leaders teachers and students.

Sheet Music furnished on the usual terms with promptness and dispatch. Country orders solicited—and selections made for pupils, teachers, concerts, &c., &c., &c.

Now ready the new Sunday School Singing Book,
