

AGRICULTURAL.

HOW TO TREAT BALKY HORSES.—If you have balky horses, it is your own fault, and not the horses, for if they do not pull true, there is some cause for it, and if you will remove the cause, the effort will cease.

HOW TO HAVE MEALY POTATOES.—It is a very common thing in the spring to find strong potatoes on the table, unless care has been taken to select and preserve them.

SULPHUROUS ACID.—The English Medical Times has a correspondent who writes that he has found sulphurous acid to be one of the best means for promoting, the speedy union of parts which have been divided during surgical operations.

BET SUGAR IN CALIFORNIA.—George Gordon, of San Francisco, states that an arrangement has been made with an association of German and French gentlemen, now engaged in the sugar business in Europe, to erect in California factories for the manufacture of raw sugar from beets.

OLD TIMES IN ILLINOIS.—Some of the correspondents of the Prairie Farmer are indulging in reminiscences. One man bought some rough split bottom chairs at 50c each when he was married in 1828, and paid for them in No. 1 fall wheat, at 25c per bushel.

QUEEN OF PUDDINGS.—One pint of nice fine bread crumbs, one quart of milk, one cup of sugar, the yolks of four eggs beaten, the grated rind of a lemon, a piece of butter, the size of an egg. Bake until done, but not watery.

LEMON CUSTARD.—One cup of sugar, yolks of three eggs, two and one-eighth cups of sweet milk, one tablespoon of flour, grated rind, the juice and pulp of one lemon, a little salt. Bake with one crust.

DISEASE OF SHEEP.—For worm in the head—turn into their nostrils a few drops of spirits of turpentine, hold up their nose a few minutes, and repeat daily until cured of the disease.

THE exports of wheat from Hungary are so heavy that neither the Danube steam fleet nor the railroads can carry the immense quantities away as fast as necessary.
