FARM ROADS.-Lay out roads with reference to the future as well as the present wants of the farm. First drain the course as well as tile drains can do it. This will generally be enough for most earth paths, but roads to be used at all seasons need After draining, level the surface crossways, throwing off the top soil; then make a bed of stones, shallow on the tops of knolls and deeper in the swales and were water will be likely to wash. This will ease the grades, and, being made even, and level crossways, by the use of small stones, should be topped with gravel. Where stones and gravel cannot be had, branches of trees, cedars being especially good, may form the bed, first drained as directed, and covered with earth; this will make a very fair farm road, or even highway.

PICK UP STONES, -As soon as the surface is thawed the stones will be leosened, and may be picked up and laid in heaps, or at once loaded into wagons or stone-boats, and removed. Many hands make light work at this business, and half a dozen neighbors' boys may be hired to work for a few days and they will make fun of the job. Mowing land, newly plowed ground and fields of winter grain, should certainly be gleaned over. A stone which is fast may often be loosened by being struck with another, and those which the boys cannot start will most of them yield to a few blows with a pick.

SPRING GRAINS.-It is generally best, north of lat. 40 deg. to sow in April, but where the ground is warm, and can be thoroughly prepared beforehand, it is well to get all kinds, even peas, in as early as possible. Peas and Oats sown together are an excelent crop for feeding green, or for cutting and cureing before ripe enough to shell, to be fed in the straw, or when ripe, to be thrashed, and ground together for feed. It is early enough to prepare for wheat.

WORKING STOCK should be fitted for hard labor by increasing their grain and accustoming them gradually to severer demands upon their strength and endurance. Horse's shoulders are apt to gall, and oxen's neeks will become sore, if they have done little work during the winter. Look out for Look out for Japuary 15, 1867.—4w. such troubles, and bind on wet clothes at night, greasing the spots when the yoke or harness is again put on, but above all have well fitted yokes and harnes?.

SHEEP.—Examine the flock carefully so as to be sure that each sheep gets its share of grain roots. Give ewes near yeaning. pens where they are not crowded, littered with short straw, trodden firm. Early lambs are well worth extra care in raising. If found chilled they should be brought to the house and warmed at the fire, or by a warm bath and rubbing. A mild milk punch sometimes has an excellent effect.

CUBRYCOMB, CARD, AND BRUSH, are among the best friends of the farmer and his stock, especially when the animals are shedding their coats. Every horse, young and old, should have a good grooming daily, neat cattle twice, and hogs once a week. Carrots appear to have a remarkable effect upon the coats of cattle and horses. 5 quarts a day is enough, if fed with other roots, grain, bran, or oil-cake.

CHURNING IN WINTER.—To make milk churn easy in winter gather the cream where it will not freeze, take it over night into a warm kitchen. Scald the churn next morning before putting in the cream, and it will seldom take more than an hour to churn in. Should the milk or cream swell, put nearly a quart of hot water into it.

COST OF WHEAT. - A correspondent of the Prairie Farmer writing from Washington county, Neb., gives \$1260 as the total expenses of raising 1700 bushels of wheat from 72 acres of land. This is at the rate of 724 cents per bushel.

I HAVE found that good clover hay, cut green, from rich ground, well cured, is the best hay to make cows give milk; and that the best pasture is high land, newly cleared and seeded to clover or timothy; and in addition to the above, a shaker pailful of boiled potatoes and meal made into a soft mess by mashing and mixing together, and given to every cow morning and night, is the best feed, on the whole, that I have ever found to make cows give milk .- Boston Cultiva

This is a new stand intely fitted up for the accommodation of the traveling public generally, situated on Main Street, a few doors shove the Court House, on what is known as the "Robbison property." It is centrally lecated in the town, a most pleasent place for suests to stop, besides being in that part of town where the majority of the business is being done.

The proprietor feels confident that he is prepared to give general satisfaction to his guest, and would solidit a fair portion of the public patronage.

They remove the obstructions of the stomach, bowels, liver, and other organs of the body, and, by restoring their irregular action to health, correct, wherever they exist, such derangements as are the first causes of disease. An extensive trial of their virtues, by Professors, Physicians, and Patients, has shown cures of dangerous diseases almost beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. Their certificates are published in my American Almanac, which the Agents below named are pleased to furnish free to all inquiring.

Annexed we give Directions for their use in the complaints which they have been found to cure.

For Costiveness.—Take one or two Pills, or such quantity as to gently move the bowels. Costiveness is frequently the aggravating cause of Piles, and the cure of one complaint is the cure of both. No person can feel well while under a costive habit of body. Hence it should be, as it can be, promptly relieved.

For Dyberpersa, which is sometimes the cause of Costiveness, and always uncomfortable, take mild doses—from one to four—to stimulate the stomach and liver into healthy action. They will do it, and the hearthurn, bodyburn, and southurn of dyspepsia will rapidly disappear. When it has gone, don't forget what cared you.

FOR NERVOUSNESS, SICK HEADACHE, NAUREA, Pain in the Stomach, Back, or Side, take from four to eight pills on going to bed. If they do not operate sufficiently, take more the next day until they do. These complaints will be swept out from the system. Don't wear these and their kindred disorders because your stomach is foul.

Fon Scropula, Envirplas, and all Diseases of the Skin, take the Pills freely and frequently, to keep the bowels open. The eruptions will generally soon begin to diminish and disappear. Many dreadful ulcers and sores have been healed up by the purging and purifying effect of these Pills, and some disgusting diseases which seemed to saturate the whole system have completely yielded to tkeir influence, leaving the sufferer in perfect health. Patients! your duty to society forbids that you should parade yourself around the world covered with pimples, blotches, ulcers, sores, and all or any of the unclean diseases of the skin, because your system wants cleansing.

To Punify the Blood, they are the best medicine ever discovered. They should be taken freely and frequently, and the impurities which sow the system like chaft before the wind. By this property they do as nauch good in preventing sickness as by the remarkable cines which they are making every

vhere. | Laver Complaint, Jaundice, and all Bilious Affections arise from some derangement—either torpidity, congestion, or obstructions of the Liver. Torpidity and congestion vitiate the bile and render it unfit for digestion. This is disastrous to the health, and the constitution is frequently undermined by no other cause. Indigestion is the symptom. Obstruction of the duet which empties the bile into the stomach causes the bile to overflow mined by no other cause. Indigestion is the symptom. Obstruction of the duct which empties the bile into the stomach causes the bile to overflow into the blood. This produces Jaundice, with a long and dangerous train of evils. Costiveness, or alternately costiveness and diarrhose, prevails. Feverish symptoms, languor, low spirits, weariness, restlessness, and melancholy, with sometimes insability to sleep, and sometimes great drowsiness; sometimes there is severe pain in the side; the skin and the white of the cause become a greenish yellow; the stomach acid; the bowels sore to the touch; the whole system iritiable, with a tendency to fever. in the morning, and repeated a few days, will remove the cause of all these troubles. It is wicked to suffer the cause of all these troubles. It is wicked to suffer such pains when you can cure them for 25 cents.

RHEMATISM, GOUT, and all Inflammatory Forers are rapidly cured by the purifying effects of these Pills upon the blood and the stimulus which they afford to the vital principle of Life. For these and all kindred complaints they should be taken in mitd doses, to move the bowels gently, but freely.

As a DINNER PILL, this is both agreeable and useful. No Pill can be made more pleasant to take, and certainly none has been made more effectual to the purpose for which a dinner pill is employed.

The celebrated author in this admirable essay clearly demonstrates, from a thirty years' successful practice, that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife—pointing out a mode of cure at once simple, certain, and effectual, by means of which every authorer, no matter what his condition may be, may cure himself cheaply, privately, and radically.
