GREASING WAGONS. -But few people are aware that they do wagons and carriages more injury by greasing too plentifully than in any other way. A well made wheel will endure common wear from ten to twenty-five years, if care is taken to use the right kind and proper sort of grease; but if this is not attended to, they will be used up in five or six years. Lard should never be used on a wagon, for it will penetrate the hub and work its way out around the tenons of the spokes, and spoil the wheel. Tallow is the best lubricator for wood axletrees, and cas-Just enough grease should be applied to

the spindle of the wagon to give it a light coating; this is better than more, for the surplus put on will work out at the ends, and be forced by the shoulder-bands and nut-washers into the hub around the outside of the boxes. To oil an axletree, first wipe the spindle

clean with a cloth wet with spirits of turpentine, and then apply a few drops of castor oil near the shoulder and end. One teaspoonful is sufficient for the whole.-Ohio Farmer. SELECTING A Cow.-It is sometimes the

case that the best judges will be deceived. A cow of very promising appearance, coarse in the neek, large boned, and second or third rate milk mark generally, will now and then turn out to be first rate, while another, with these marks largely developed, fine in the head and neek and promising every way, will prove unsatisfactory. But a failure in this case is rare. Let the head be light the forehead broad, the horn rather thin and clear, the eye clear and prominent, the neck thin and the fore quarters rather light, the back straight, the hind quarters well develoned, wide over the loins, the careass deep, the udder coming forward and well shaped, the skin soft to the touch, the teeth well set, not too large nor too small, the tail long and thin, like a whip lash. Such a cow ought to be a good one. - Ploughman.

LET WELL ENOUGH ALONE. - When you have a good strawberry or rapsberry which suits your soil, don't throw it aside for any new sort with a high-sounding name and high-sounding praise; but stick to it. If the new sort turns out to be real acquisition, you can grow it if you like quite time enough to enjoy any good qualities it may possess. We know of persons who are always changing their varieties of small fruits-always experimenting-and are nearly always without a good supply. In our experience of a series of years we have found the "let-wellenough-alone" policy to be the best. When convinced that a new variety of this or that was an improvement, it was adopted and recommended, and our readers we think will vouch for us that we have not often been mistaken. - Germantown Telegraph. ·

Sawdust is easy for cattle to rest upon. It absorbs a large portion of the liquids, and serves to keep the cattle clean, and therefore, in a healthy and thrifty state; and this is of no small consideration. All animals thrive according to the degree of health and comfort which they enjoy, as well as the amount and quality of food given them. An ox well fed, but exposed to severe cold and storms, would be likely to gain only half as much as he would if properly sheltered. So if he were so situated as to be obliged to stand all the time, he would become so uncomfortable as not to gain more than half as fast as he would if he could lie down, when inclined to do so, upon a bed of dry sawdust or litter.

Conn soaked in very strong lye made of wood ashes, is said to be an infallible remedy for kidney worm in hogs. Salt and brimstone is a preventative, and, indeed, the only one known. Comfortable quarters and good food are of really more importance in the successful management of hogs than many are inclined to suppose, and should never on any account be neglected.

FORCED PLANTS.-In cities and towns plants that have been forced are often offered for sale. As a general thing they are worthless for future use, although for present gratification they are often worth the price asked. -Am. Ag.

OMNIBUS LINE. THE undersigned would respectfully associance to the citizens of Bloomsburg, and the public generally, that he is running an OMNIBUS LINE, heorally, that he is running an OMNIBUS LINE, between this thee and the different kail Road Depots dais
y, (Sundays excepted) to

THE MISERABLES Without a good digestion there can neither be bodily omfort nor mental enjoyment. Between the stomach and the brain there is a close

and wonderful alliance. If the one is disordered the other is gloomy, dejected, incapable of effort, and indifferent to all that makes life agreeable to the healthy. Is this a condition that any rational human being is

is willing to endure, when, the means of certain, immediate and permanent relief can be chained every The Dyspeptic has his fate' in his' own hands. It

he chooses to danish forever the eleorder that racks his body and disturbs the mind with nameless horror he has only to step to the centest drug store and pro cure a supply of Hostetter's Stomach Buters. No phase of Dysoepsia has ever yet resisted the

alterative, tonic and anti-bilious operatous of this potent vegetable specific. It leterally regenerates the lether gic stomach; rouses into healthy action the dormant liver; puts to flight the dismal fancies that beset the mind; gently relieves and regulates the bowels; strongthons the enfectled nerves; restores the appetite, and makes, as it were, a new creature of the desponding and debilitated invalid. Ladies who suffer from indigestion have only to take a small dose of t bis pure vegetable corrective once or twice a day, to secure entire exemption from the pains and penalties of a weak stomach and that perfect functional regularity, which but few of the sex uninteruntedly enjoy.

BEALE'S LATE

POWELL'S EMBROCATION, FOR ALL DISEASES INCIDENT TO HORSES, CATTLE, AND THE HUMAN FLESH,

requiring the use of an external application.
This new Compound, prepared by a practical Chemist, hains a full knowledge of all the medical virtues of each ingredient that enters to its composition, is warranted to exceed anything of the kind ever yet offered to the public as an external application for the diseases for which it is recommended We are satisfied that it will work its own road but the confidence of all who use it, and those who try it once will never be without it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by

IPAIRIRIE INS

and all whe have tried it, to be the best application ever used. This Embrocation has been put up for over right years, and it is only through the increasing demand and urgent request of my friends and the public that I send it forth as the grand renedial agent for the various diseases to which that noble and useful animal, the horse is subject.

Many remedies have been offered to the public under different forms, some of those are injurious, others at best of tittle use, and many wholly murroper to answer the purposes for which they are recommended.

A judicious and really useful composition, free from those objections, has heretofore long been desired by many gentlemen who have

VALUABLE HORSES,

and are unwilling to trust them to the care of dosign-ing and pretended "Parriers, "There's wishes are at length fully gratified-by (Dr. Reale) being, prevailed upon to allow this valuable Embrocation (which has proved so, efficients to the various diseases) to be prepared and brought out to the public. This 'Embrocation was extensively used by the Government during the war.

Incidents of the War. SPLENDIDLY ILLUSTRATED WITHOURS 100 FINE

PORTRAITS AND BEAUTIFUL . ENGRAVINGS. ENGRAVINGS.

There is a certain portion of the war that will never go into the regular histories, nor be embodied in romance or poetry, which is a very real part of it, and will, if preserved, convey to surceeding generations a briver iden of the spirit of the conflict than air many dry reports or careful gossip, the fun, the pathos of the war. This illustrates the characters of the leaders, the humor of the soldiers, the devotion of women, the benuery of men the plack of our heroes, the romance and hardships of the service. The Valiant and Erave Hearted, the Picturesque and dramain and Wisty and Marvelous, the Tender and Pathetic, and the Whole Panoraim of the War are here thrilling by portrayed in a masterly manuer, at once historical and romantic "endering it the most ample, usique, b: libat and cadable book that the work are iled forth.

Amicement as well as instruction may be found in every page, as graphic detail, brilliant wit, and authentic history, are skillfully interwoven in this work of literary art

Scrofula, or King's Evil is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the veneral infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to withstand the attacks of other diseases; conse-quently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain and, indeed, of all the organs, arise from or

will visit the iniquities of the fathers upon

their children."

are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Empriva and Skin Diseases, Sr. Anthony's Firm, Rose, or Enysipplas, Pimples, Pustules, BLOTCHES, BLAINS and Boils, TUMORS, TETTEA and Salt Rheum, Scald Head, Ringworm, Rheumatism, Syphilitic and Mercurial Dis-BASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIA-TED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The
