### Indian Corn.

For many a mile on every side, I see the golden corn, And hear the cricket's notes around Sound like a fairy horn In concert with the wild bec's drone, In elfin murmurs borne.

Long, long ago, as legends tell, The Indian fairy queen, Unto the ancient Delawares Came down upon the green, An azure glory round her head, Her robes a vapory sheen;

And where she sat tobacco soon Its bitter fragrance flung, And where her left hand touched, the bean Rose flowering fresh and young; And where her left hand swept, the maze In golden glory sprung.

And whether you do eat it roast, Or take it baked in pone, Or like it best as Johnny cake, Still let its truth be known-That corn first came from fairy land And was by fairies grown.

#### Ashes for Wheat.

A correspondent of the Rural Gentleman in Delaware, writes strongly in favor of ashes to prevent rust in wheat, and from experience has found them of great value. As to the effects of ashes, he says they have, like Shakspear's sherry sack, a "three-fold op-

1. The ashes operate as a manure upon the wheat, even in the limited quantity of eight bushels per acre.

2. They push the wheat forward several days, and in time to escape the hot, sultry days which often prevail about the time of the "heading out" of the wheat; and

3. They strengthen the stem, giving it substance and solidity.

I may add one or two more properties of the ashes; they afford just that kind of pabulum of food, which is best for the development and perfection of the grain, and will, in my opinion, also prevent the ravages of the fly in wheat. I would here venture the remark, that who ever once tries this experiment will thereafter spread his wood ashes upon his wheat, as above indicated; and, in so doing, he will effectually guard against and prevent "the rust" in his wheat.

## How to put up Pickles.

Take nice small cucumbers, cut from the vines without breaking any part of the skin, or rubbing off the little knots on the sides, lay them carefully into a seive, pour water gently over them, but not shake them. Put a layer of brown sugar (scrapings from sugar barrels and settlings from molasses barrels is as good, only so that it is dry,) into a tub or can, then put in a layer of cucumbers, cover them with sugar, then anothor layer of cucumbers and sugar until the vessel is full, using about as much sugar as you would salt. Place stiff white paper over the vessel, prick holes in the top to admit air, and set it away. The sugar and juice of the cucumbers will form a pleasant vinegar, and the pickles will be ready for use, and be much nicer than any other way they can be fixed. A weight should be placed on top of them to keep them tight down in

To CLEAN FEATHER BEDS. - When feathor beds become solid or heavy, they may be made clean and light, thus: Rub them over with a stiff brush, dipped in hot soapsuds. When clean, lay them on a shed or any other clean place, where the rain will fall on them. When thoroughly soaked let them dry in the hot sun for six or seven days, shaking them up well and turning them over each day. They should be covcred over with a thick cloth every night. This way of washing the bed ticking and feathers make them very fresh and light, and is much easier than the old fashioned way of emptying the bed and washing the feathers separately, while it answers quite as well. Care must be taken to dry the bed perfectly before sleeping on it.

CLOVER. - A farmer, writing to the Bucks County Intelligencer, says: A larger use of clover, as an enricher and loosener, would be better on many farms. A heavier seeding would also be an improvement, measured experiment showing that the increased product more than repays the cost of additional seed, while the growth is finer and less rigid and woody. Many good farmers sow a peck per acre, and unless the soil is in good condition so as to produce free germination, and growth, a larger amount would not be too much.

LIBERALITY IN FARMING. -- In this art, and almost in this art alone, "it is the liberal hand which maketh rich."

Liberality in providing utensils is the sav ing both of time and labor. The more pe. feet his instruments, the more profitable are

So also is it with his working cattle and

his stock. The most perfect of their kinds are ever the most profitable. In cultivating the earth, the condition of

man's success is his industry upon it .-Hon. Josiah Quincy. .....A juryman was asked whether he had

been charged by the presiding judge.-"Well, Squire," said he, "the little fellow that sits up in the pulpit and kinder bosses the crowd gin us a talk. but I don't know whether he charged anything or not."

ENGRAVINGS.

There is a certain portion of the war that will never go into the regular histories, nor be embodied in romance or poetry, which is a very real part of it, and will, if preserved, convey to succeeding generations a be ter idea of the spirit of the conflict than any many dry reports or careful gossip, the fun, the pathos of the war. This illustrates the characters of the leaders, the humor of the soldiers, the devotion of women, the bravery of men the pluck of our heroes, the romance and hardships of the service. The Valiant and Brave Hearted, the Picturesque and dramatic and Witty and Marvelous, the Tender and Pathetic, and the Whole Panorama of the War are here thrillingly portrayed in a masterly mauser, at once historical and romantic endering it the most ample, unique, brilliant and cadable book that the war has a filed forth.
