DESTRUCTION OF STUMPS, -- We have heard of two methods of getting rid of stumps, which, as they appear feasible, and not expensive, we hope some reader will try and report them. Bore with a two-inch nuger to the heart or centre, fill the cavity thus made with sulphurie acid, or with crude petroleum. In the first case, the acid becomes the destructive agent within a few months; in the latter, when the stump becomes saturated, as it will, with the oil, it is fired, and will burn out to the last particle, like a candle.

CURE FOR IN-GROWING NAILS .- It is stated that cauterization by hot tallow is an immediate cure for in-growing nails. Put a small piece of tallow in a spoon, and heat it over a lamp until it becomes very hot' and drop two or three drops between the nail and granulations. The effect is almost magical. Pain and tenderness are at once relieved, and in a few days the granlations all go, leaving the diseased parts dry, so as to admit of being pared away without any inconvenience. The operation causes little if any pain, if the tallow is properly heated.

SWEET POTATO BALLS-First boil the potatoes, then carefully mash the farinaceous part. Boil, in the meantime, a pint of milk with some lemon peel, a couple of small lumps of sugar and a little salt.-When the milk boils take it off the fire and add the potatoes, so as to form a paste, or rather a tolerably thick mash. When cold, make it into balls; cover these with crumbs of bread and yelk of egg. Fry them to a nice brown color, and serve them up with sugar strewed over them.

... Two rival belles met at a hop: "Hew well you look under candlelight !" exclaimed one, with a stress on the candles. "And how charming yous; in the dark!" answered the other.
