

DANVILLE INTELLIGENCER

Established, 1828

DANVILLE, MONTGOMERY COUNTY, PA., SEPT. 10, '04.

D. AUST LUTZ, Editor and Proprietor.

The INTELLIGENCER is the oldest and best weekly, Democratic newspaper in this section of the State. It enjoys the distinction of having a larger county circulation than all the other weeklies combined. It goes into the homes of all the best Democrats in the county, and is read by thousands of its Republican friends weekly. Published every Friday at Danville, the county seat of Montgomery county, Pa., at \$1.00 a year in advance or \$1.25 if not paid in advance; and no paper will be discontinued until all arrearages are paid, except at the option of the publisher.

Rates of advertising made known on application. Address all communications to THE INTELLIGENCER, Danville, Pa.

DID THEIR WORST.

It's all over. No war. No blood shed. No blood-letting. No nothing. A small handful of Foster's party met in Convention on Saturday to see if they could manage to place a Republican ticket in the field this fall.

We would not have it understood that there are no Republicans in Montour county, for there are a few that are just as good as some of the worst Democrats, but those of the better element stood aloof and left the rest do their worst.

It was impossible to fill the ticket, and Mr. Foster appointed the rest of the convention as a committee to assist him in hunting some one to allow his name to be used as candidate for probatory. After screening in all sections and quarters they managed to complete the ticket in a few days, but so flimsy is its construction that it will require strong ropes to keep it bound together and hold fast what they have.

The ex-postmaster figured in the quietness of the minute, but seemed to evaporate in the ridiculousness of the moment. In short the local party is simply disgusted with its leaders and manifests no interest whatever in their party.

This is a good year for Chairman Blue to show what Montour is made of. With the most excellent men for President and Vice President, and such a man as Mr. Thompson for Supreme Judge, the Hon. Harry E. Davis, for Congress, and then our good, safe county ticket, we can expect nothing less than the greatest Democratic landslide in Montour county we ever experienced in the county's history.

We forewarn Horace that if he fails to produce the above desired and expected results, he will suffer nothing less than decapitation, electrocution or hanging.

SLIPPED OUT.

They have gone. Just as was expected from the very establishment of the concern. Wise people mistrusted them from the start, and their expectations have been fully realized.

Monday or Tuesday the Red Star Trading Stamp Company quietly and mysteriously slipped from our midst, somehow or other, without even giving notice to their friendly and shamefully leaving her without word or giving her any previous notice to look for another position. This is the kind of people they are.

Their principles of doing business are wrong, and the unwarranted breach of confidence they left with our people, a city of between eight and ten thousand inhabitants, deserves to be exposed in order to forewarn the innocent victims of other sections. Not only did they leave a sore feeling with their customers by sneaking away, but the articles given by them were found to be of very inferior quality, in many instances, and frequent exchanges for better goods were demanded.

Many of their customers were left with whole books filled and some with them but partially filled. The concern claims to have combined this branch with their Bloomsburg store, and that their customers here should inform their customers that in order to have their books redeemed they must go to Bloomsburg. Think of it! Pay fifty cents to go, fifty cents for dinner, waste the time in going and then pay to have the goods sent here. Quite an inducement, isn't it?

Why didn't they give early notice of their intended departure, so that their customers could deal fairly by their customers, if they carry on an honest business?

This is another demonstration of the truth contained in Bartram's well known assertion, after learning the true nature of the American people: "You can fool some of the people all of the time, you can fool all of the people sometime, but you can't fool all of the people all of the time."

TO MEASURE THE EARTH.

The small school boy of years ago was taught the distance around the earth; you know it, or if you do not, your geography will tell the measurement in a manner that leaves no room for doubt.

Still, there is doubt, and not merely doubt, but an assurance that geographers are inaccurate in this important particular. Because of this certainty there has arisen a science, "geodesy," which means measurement of the earth.

Foremost in the movement for this most painstaking of all forms of surveying is the United States. The International Geodetic Association has its most enthusiastic members and contributors in this country, and the great invisible tape lines now spanning the globe in the interests of science are being spread most rapidly and skillfully by the long, strong fingers of your Uncle Samuel.

While it is not hoped to ascertain the size of the earth with mathematical accuracy, it is hoped to establish it within one-millionth of a statute mile, or about one-fiftieth of an inch. Scientists who are making geodesy the work of their life do not say that even this most painstaking measurement the world has ever known will be absolute accurate, but if they come within one-fiftieth of an inch of the true dimensions it will be close enough to suit all reasonable persons.

THEY WILL ROB YOU.

Danville seems to be an easy mark for fortune tellers. Our people can't be convinced that fortune telling is a fraud, and the support they tender to frequent visits of these various imposters to our city appears to be very encouraging to the fraternity. We admit that palmistry is a science, but have we ever had a scientific palmist with us? If any so-called palmist, or any other person attempts to read any of your future, whatsoever, consider it an insult upon your good common sense. While palmistry is an interesting study to some, you may find it quite different, and if a truly scientific palmist was to read your hand it would not be interesting to you, especially to so many who make it a practice to waste their fifty cent pieces on having these frauds tell them a lot of nonsensical trash which is detrimental to the minds of the weaker.

Take our advice and avoid these people who tramp around through the country posing as palmists and clairvoyants, they mean you harm and will rob you of your money.

HOW TO WALK.

There is no virtue in a dawdling saunter. The slow and languid dragging one foot after the other, which some people call walking, would tire an athlete; it utterly exhausts a weak person, and that is the reason why many delicate persons think they cannot walk. To derive any benefit from the exercise it is necessary to walk with a light, elastic step, which swings the weight of the body so easily from one leg to the other that its weight is not felt, and which produces a healthy glow, showing that the sluggish blood is stirred to action in the most remote veins.

HE DREAMED WELL.

From the shadowy land of dreams an idea has come to William A. Engle that promises to make him a millionaire. As the most popular feature of the dream-born invention will cover an avoidance of many long delays that have made railway traveling a nuisance.

In brief terms, the device permits an engine which has been disabled on one side to proceed to its destination by use of the mechanism on the uninjured side. This is accomplished without the disconnection which heretofore has been necessary of pipes, valves and other fittings on the damaged side.

This operation usually takes from fifteen minutes to more than an hour, depending upon the expertise of the engineer and the condition of the locomotive. Important parts of machinery are apt to be lost in the process of disconnection.

Mr. Engle, who lives in Pottsville, Pa., and has been connected with the motive power department of the Pennsylvania Railroad for sixteen years, had worked upon the problem of avoiding these delays for more than a year. It had simmered down to the one point of providing some device for throwing the whole side of the engine out of commission. With that before him he had worked until his brain was weary, and he was ready to acknowledge himself beaten.

Throwing himself upon his bed one night recently he set his mind to work in a last desperate effort to overcome the mathematical and mechanical obstacles that had kept him from his goal. Again he reviewed and threshed out the calculations of pressures, fittings and distances. Instead of unraveling, the maze became more tangled than ever. Finally, from sheer brain fag, he fell asleep.

Almost instantly the brain, left to its own direction, took up the thread of knowledge he had gathered in his year's study and meditation and wove them into a finished fabric. The idea, practicable, patentable, was clear before him.

He awoke immediately with the joy of discovery and set about reducing the dream to a thing of blue prints and formal figures. At first it eluded him, but he stuck at it until it had been reproduced just as he saw it in his sleep.

"Concisely stated," said Mr. Engle, my invention consists in providing any desired form of valve for cutting off the supply of steam from one or the other pipes leading to the steam chest. The advantages accruing from the employment of this invention, summed up, are that disconnections under all conditions are entirely avoided and defects in the steam chest and cylinders readily located. The usefulness of this valve as an aid to get away when running one sided and stopping on centre is apparent. The value of this valve in setting main valves is that it can readily be determined which side is out.

"The benefits derived from the use of the valve on locomotives are numerous. It will be only necessary to close the valve on the disabled side and proceed."

ITS ATTRACTIONS.

Hunter's Park, as always on a fair holiday, is a favorite place of popular resort. Labor Day found it in the acme of its good name. It was jammed to its fullest capacity—the greatest crowd ever known to be there, and notwithstanding the rush, jostle and push we found the gathering of a quiet, orderly nature. In order to accommodate the human traffic Liveryman Hunter had every available vehicle employed in transporting the tide of life in its incoming and outgoing. Hacks from a distance mingled in the turmoil, carrying visitors from nearby cities and towns. Games and sports were indulged in to the pleasure of the masses, and the labor unions did quite themselves nobly. The parade was a credit to the committee in charge and contained the various labor organizations of the city, with the exception of the miller's union, which, in due and proper respect, did not join the ranks through love and sadness at heart for a departed brother, Mr. Tierney, who had been called to join the great union of laborers in the far beyond.

Standing on the summit of this beautiful park, one cannot help but admire nature's productions, as they lie stretched before your gaze. The magnificent scenery presented by the high ridge of hills, just opposite is an attraction to the artist's eye and cannot help but draw friends to its side. The farmers of Montour county have opened their eyes to its splendor and will use it for their annual picnic, having selected it from among the many other groves and parks, on tomorrow, Saturday, Sept. 10. Another lively and sociable time can be expected. So, come.

TO COME OFF THIS MONTH.

Of the many novel features of the St. Louis Exposition—features representing every phase of Twentieth Century ingenuity—none will exceed in interest the competitive trials of airships, to be sailed this month.

While Santos-Dumont is largely responsible for the present interest felt in aerial navigation, and is regarded as the leading and most daring experimenter in this direction, he is by no means the only one devoting time and wealth to a solution of the problem of traveling through the air, a problem that engaged attention and stimulated invention long before the day of "Darius Green and his Flying Machine." A number of sanguine aeronauts will have airships of various degrees of dirigibility at St. Louis—just how many will probably not be known until the contest in the clouds actually begins—and the machines represent a wide range of inventive calculation.

An American builder of air yachts, Captain Thomas S. Baldwin, of California, is already at St. Louis with two manageable balloons—he does not call them airships—with which he hopes to win all or part of the \$100,000 prizes offered by the Exposition management for this feature of the big fair. On the Pacific slope these two flying machines have attracted considerable attention. They seem to be constructed on common-sense principles.

CONFIRMS THE INTELLIGENCER.

Hon. John Wanamaker, merchant king and ex-Postmaster General, in a speech to about 1200 members of the Bethany Brotherhood and Bible Union Monday, standing upon one of the benches of Fairmount Park, Phila., said, speaking of Labor Day, "that, even if it were true, as alleged, that the taking of 14,000,000 men from their daily tasks to keep a holiday should cost \$40,000,000, it was worth that amount to teach the arrogant rich, and the men who live in castles, and the men who control the trusts, that organized labor is a power which must be reckoned with, and that the workingman is able to make his voice heard."

He further stated, in words almost similar to those used by the Intelligencer just a week ago, that the working man had as much right to organize to assert his rights as the millionaire capitalist has to organize against the workingman.

Now if the muzzle actually would work and was in effect all over the country what a rip-shooting time Dave Hill could have with the newspapers on account of that lying Deposit, N. Y., reporter. Hill probably has Penny's sincerest sympathy.

"THE BIG STICK."

American Warships Cannot Be Allowed to Rust.

The introduction of the "big stick" in our national policy found its origin in a speech made by President Roosevelt in Chicago April 2, 1902. At this time the President felt it necessary to explain to the people why vast sums were expended annually in the building up of a naval force which surpassed the navies of foreign countries in time of war. He said: "There is a homely old adage which runs: 'Speak softly and carry a Big Stick; you will go far.'" This statement taken in conjunction with the fact that American warships were rushed all over the world soon caused European nations to regard the great republic as an overgrown bully. Later President Roosevelt at Hayterhill, Mass., said: "The good work of building up the navy must go on without ceasing. The modern warship cannot with advantage be allowed to rust in disuse. It must be used up in active service, even in time of peace."

Thinking men do not relish the idea of warships being sent on missions that might result in their rusting in disuse. Among them is Joseph Pulitzer, who says to President Roosevelt: "Was it to use them up in active service and preserve them from rusting that you kept the Machias, the Iowa, the Concord and the Philadelphia busy at Panama and Colon for the first six months of your term, and that you had the Iowa land marines at Panama two months after you took office? Was it for the same purpose that you sent the Philadelphia to Guayaquil, Ecuador, in March, 1902, when your keen scent detected a threatened revolution, and that soon afterward you despatched the battleship Wisconsin and the gunboat Ranger to Panama and the cruiser Cincinnati to Colon, ordered the Panther to the Isthmus with a battalion of marines, landed 2,000 men and took possession of the Panama Railroad, refusing to allow the

Colombian troops to ride without giving up their arms? Was it to keep the navy from rusting that you ordered the Machias and Cincinnati to land marines in Hayti in 1902, that you sent the Marietta to overawe Venezuela about the same time, that you had the Pacific squadron, to the West Coast of Honduras, and the entire Caribbean squadron to the East Coast of the outbreak of the regular spring revolution the next year; that you had the Atlanta, the San Francisco and the Detroit take turns in voyaging the Dominicans in the same season; that you simultaneously directed the gunboat Callao to patrol a Chinese river, and that you sent the Helena to stir up the Russians at Newchwang and the Vicksburg at Chemulpo?"

"Was it to use the ships up in time of peace and incidentally make more work for the contractors that you rushed a squadron to Beirut when you heard that the American Consul had been killed, and did not recall the orders when you learned the next day that the story was false; that you sent the Baltimore and Newport to Santo Domingo in the fall when the country was in the enjoyment of its normal state of revolution; that you started a whole fleet toward Panama on a telepathic impression that the Isthmus might secede from Columbia; that you sent Admiral Wile to Santo Domingo last February to oversee another revolution, despatched a fleet to Tangier to get Ferdinand alive or Raisul dead, ordered the European squadron to Smyrna to secure school privileges for American missionaries, sent the Detroit back to Santo Domingo last May, and have just hurried the Denver and Bancroft to the scene of the latest revolutionary eruption in Hayti, and why you have at this moment eight warships at Shanghai, against seven from all other nations combined?"

\$30,000 Blaze.

NORRISTOWN, Pa., Sept. 7.—The Coral Rug Manufacturing plant was destroyed by fire today, causing a loss of \$30,000. Fifty hands are rendered idle. The origin of the fire is unknown.

Do You Receive These Wireless Messages?
They Are About Your Health.
When your health goes the least bit wrong, a wireless message is sent to your brain.
It says something like this:
"You are not quite well—take a dose of BEECHAM'S PILLS at once and it will put you right."
Do you attend to these messages when you receive them? You should do so. BEECHAM'S PILLS often prevent a serious illness, and so prove themselves "WORTH A GUINEA A BOX."
Sold Everywhere in Boxes, 10c. and 25c.

ALTON B. PARKER SAYS:
"I Read the NEW YORK WORLD Every Day."
THE WORLD Elected Cleveland.
"It may be said without reservation that if the Democratic party in my first campaign had lacked the foresight and present agency of Democratic principles at that time by the NEW YORK WORLD the result might have been reversed."—GROVER CLEVELAND'S LETTER TO THE WORLD, MAY 10, 1903.
Bryan on THE WORLD.
"THE WORLD never during the last twenty years considered itself a party paper. It promised to spread truly Democratic principles and truly Democratic ideas, and it has done so, and will do so, with entire independence of bosses, machines and platforms, following only the dictates of its conscience."—QUOTED, WITH APPROVAL, BY WILLIAM J. BRYAN IN THE COMMONER, JULY 10, 1903.

New York World
Send us \$1 for THE WORLD and you will receive THE WORLD Every Weekday for FOUR MONTHS from the day your subscription is received, including every day of the Presidential Campaign, or take advantage of our club offer made below.

Both Sides of the Great Political Battle Fully and Fairly Given.
FIRST NEWS! BEST NEWS!

THE WORLD IN THIS PRESIDENTIAL CAMPAIGN.
"THE WORLD, as the 'Chief Champion in America of Democratic Ideas,' will be the most interesting newspaper in the country in this Presidential campaign.
It already has a much larger circulation than any other morning newspaper in America.
It will tell everything that is done or said to the public by both Presidential candidates every day until after the election.
Its editorial page will—as it always has—support Democratic platforms and Democratic leaders when they are right. It will not support—and it never has supported—them when they desert true Democratic principles and put themselves in the wrong.
Its news will be absolutely fair and impartial. It believes that the truth is always to be told.
The World believes that the triumph of the Democratic party on a truly Democratic platform means a return to sanity and purity, a return to those ideals which won for Americans the admiration of the world as a people who minded their own business, and were willing other people should mind theirs.
It is on these lines that the battle must be fought. The divergence is millions and yet more millions for army and navy, and a dangerous foreign policy. On the other side are equal opportunity for all, the free development of the individual, a just observance of the rights of others, and honesty and moderation in the public expenditures. The progress of the present campaign will always be told tersely, truthfully by THE WORLD. If you are interested, as you should be, in a vital contest, you will need it every day. No Democrat or Republican should be happy without it. The World never appeals to class prejudice.
To encourage the prompt formation of clubs for the campaign a special offer is made, as follows:
We will send the Danville Intelligencer and the MORNING WORLD every weekday for four months for \$1.00; Regular price, \$2.35.
This is a splendid clubbing offer. The New York World is America's greatest newspaper.
Sample copies of THE WORLD supplied free on application.
Every subscription will be for the DAILY Morning World for FOUR months from the date it begins.

HILL DID NOT CALL ROOSEVELT A FRAUD

Associated Press Explains That They Were the Victims of an Imaginative Reporter.

New York, Sept. 2.—An investigation by the Associated Press discloses the fact that a number of serious errors were made in its report of Senator D. B. Hill's speech at Deposit, N. Y., on Thursday, August 25. It seems that a reporter of a local Democratic paper, upon whom the Associated Press depended for a report, failed to attend the meeting, but, instead, invented a speech for Senator Hill, which contained several statements wholly misrepresenting the Senator's views and quite at variance with his utterances. Among the phrases thus inserted as a part of the speech was one to the effect that Senator Hill had charged President Roosevelt with being a "fraud." Senator Hill said nothing of the kind. This correction is made without the knowledge of Mr. Hill or any of his friends, but in the interest of accuracy for the Associated Press service.

The Associated Press.

"Give me the money," says a recent speculative philosopher, "that has been spent in war and I will purchase every foot of land on the globe. I will clothe every man, woman and child in an attire of which kings and queens would be proud. I will build school houses on every hillside and in every valley over the whole earth; I will build an academy in every town and endow it, a college in every State and fill it with able professors; I will crown every hill with a place of worship consecrated to the promulgation of peace; I will support in every pulpit an able teacher of righteousness, so that on every Sabbath morning the chime on one hill shall answer another around the earth's wide circumference and the voice of prayer and the song of praise shall ascend like a universal holocaust to heaven."

The signs of waning summer are apparent. Flowers that link summer with autumn are appearing. The leaves are coloring and there is an indubitable something in the air, and steps that remind one that fall is not far away.

The Black Diamond COAL YARD
WILL SELL COAL CHEAPER than any other coal yard in Danville.
FIRST CLASS QUALITY.

344 MILL STREET

Latest Improved Sewing Machine.
We can furnish you with a \$50.00 Sewing Machine, new from the factory, at just half price. It is a Light-Running Champion Drop-Head, one of the very latest patterns, and made by the New Home Sewing Machine Co. Call on or address this office.

Easy and Quick! Soap-Making with BANNER LYE
To make the very best soap, simply dissolve a can of Banner Lye in cold water, melt 5 lb. of grease, pour the Lye water in the grease. Stir and put aside to set.

Latolia
FOR THE TOILET.
A Most Marvelous Preparation

Free Samples of Latolia may be obtained at the drug store of Mrs. J. D. GOSH & CO., DANVILLE, PA.

We Risk It
Druggists Who Sell Dr. Miles' Nervine Agree, If It Fails, To Refund Cost.

Dr. Miles' Nervine
Of course we reimburse the druggist. You know him, and trust him. Dr. Miles' Nervine is medicine for you.

It cures diseases of the internal organs, by giving tone to the nerves which make these organs work.

It is a novel theory—not of anatomy, but of treatment; first discovered by Dr. Miles, and since made use of by many wide-awake physicians, who appreciate its value in treating such cases as Neuritis, Headache, Loss of Memory, Sleeplessness, Spasms, Backache, St. Vitus' Dance, Epilepsy or Fits, Nervous Prostration, etc.

By toning up the nerves, Dr. Miles' Restorative Nervine cures those diseases of the internal organs due to a disordered nervous system.

Some of these are: Indigestion, Bilious Headache, Chronic Constipation, Constipation, Dropsy, Catarrh, Rheumatism, etc.

FREE Write us and we will mail you a Free Trial Package of Dr. Miles' Anti-Pain Pills, the New Scientific Remedy for Pain. You try them for five days. If you are not fully recovered, you remember I wrote you how it saved my life a few years ago, when I had nervous trouble. I can't say enough for Dr. Miles' Pills. M. D. MYERS, Correctionville, Iowa.
