this morning Jacob Hauser, a miner, forced his way into the home of his wife's parents on Grove avenue, shp-ped into the room where Mis. Houser was aleeping and stabbed her to death. Was steeping and scabbed her to deally. Mrs. Mary Barringter was aroused by the sereams of her daughter and rash-ed to the seene, only to be met by her enraged son-in-law who plunged his knife into her ontil she fell dead, af-

ter stumbling down stairs into the kitchen. The youngest sister of Mrs. House

was also badly cut by the assassin but will live. Houser has been separated from his wife for a year and had threatened her life. Ho escaped in bare feet and has not yet been caught.

The Christmas Tree.

Just now there is an outery agains the destruction of prospective forest caused by the cutting of Christman trees. Hundreds of thousands of young spruce, balsam and hemlock trees an ually are sacrificed in the Christman trade, and it is alleged needlessly. A couple of days ago Professor Gifford Pinchot, the government forester, was asked how many trees were cut down every year to be trimmed and decorat

> el for young Americans. He replied 'No doubt many hundreds of thous ands of young trees are used for this purpose every Christmas. But don' you worry about the losses sustaine by our forests from this cause. That is not a drop in the bucket compare with the destruction of larger an more valuable trees for other purposes Au acre of laud will produce severa thousand sprace trees of the kind tha are used for Christmas decoration. Bu

the great dauger we must guard against, if the forests of the country are not to be totally wiped out, is the reckless cutting of timber for com-mercial purposes. For instarce, 120, 000,000 new railroad ties are laid dowr in the United States every year. That represents the destruction of at least 75,000,000 trees every 12 months for that purpose alone. More millions of trees are cut down annually to make

telegraph and telephone poles. Bu with proper care our forests can fur nish all this timber without being ex hausted. Everything depends on the adoption of systematic cutting plan by which certain trees may be saved
