TOBACCO SECRETS.

How many people even among the most confirmed smokers know what is the difference between Turkish and

the difference between Turkish and Virginia tobaccos?

The smoker, of course, can tell you which is which at the first whiff, but if you ask him what the original distinction is between the two he will tell you that one comes from Turkey and the other from the States.

He is wrong. You could grow Turkish and Virginia tobaccos in the same field, for they are merely two different varieties of the same plant. Turkish is the leaf of Nicotiana rustica, whils is the leaf of Nicotiana rustica, whils is the leaf as Nicotiana augustipolia. Of course the two are often blended by to-bacconists.

pacconists.

Again, what constitutes the differ again, what constitutes the difference between "strong" and "mild" to-baccos? It is simple enough. The strong product is so manufactured that it burns slowly, the result being that the contained nicotine is distilled in an unaltered state. Mild tobaccos are those which burn well, and thus their contained nicotine is consumed or decomposed with the result that a leave again. posed, with the result that a less nar cotic smoke is formed.

cotic smoke is formed.

We often hear cheap eigars spoken of as "cabbage leaves," and doubtless many people believe that these are actually adulterated with other substances than tobacco. Often in such a weed the outside wrapper is noticed to be patched with pale green, and this fact is held proof of the cabbage leaf libel. The piece of greenish leaf is real tobacco which has been plucked unripe or not properly cured. It is only to be found in thin, poor leaf.—London Express.

USE OF FRENCH WORDS.

A Practice That Does Not Help the English Language.

A Practice That Does Not Help the English Language.

Why do people persist in using French words when there are good old English words to serve the purpose? It is a habit that is growing daily. For instance, at dinner people give you "menu" instead of "bill of fare," though the items are such English dishes as boiled cod, roast beef and apple tart. One is accommodated with a serviette instead of a napkin, an English word, but originally of French origin, as is the Soctch word napery, used for household linen. When you enter a shop you are served with corsets instead of stays, costumes by a costumiere listend of dresses by a dressmaker. "Blouses" take the place of shirts or waists, and hose are offered for stockings. The former word is, however, English. At the theater we have programmes instead of playbills and matinees in place of afternoon performances. Toques are adjusted with as much ease as hats, and we eat in a restaurant as cheerfully as in a dining roon. There are of course, unwith as much ease as hats, and we eat in a restaurant as cheerfully as in a dining room. There are, of course, untranslatable words which must be used, but our good old English language is rapidly becoming a hotchpotch of foreign words, while telegraphy is doing its best to oust all the crisp and racy Saxon speech. Whenever possible let us determine to use an English instead of a French word, both in literature and conversation.— London Graphic.
