Decision in Famous Case.

The Supreme Court at Philadelphia last week handed down a decision reversing Northumberland County court of Common Pleas in the case of P. L. Johnston vs. William A. G. Ottell.

The opinion of the Court in full has not yet reached the local attorneys and great interest has been aroused.

The history of the case is an interesting one. In 1812 the plaintiff and defendant, with others, commenced the Bond Valley Colliery and continued mining coal there at Paul's colliery, as partners under different names and in different proportions until a sale to the P. & R. C. & I. Co. in 1817.

In 1809 the defendant used the partnership funds for the purchase of a half interest in the Monitor colliery which was operated until 1870 when it was sold at a profit.

The defendant paid to the plaintiff what he alleged was the one-half of the profits on the sale, subsequently contending that such payment was not an admission of partnership relation.

Notwithstanding that the business terminated in 1817 no profit had been made by the defendant.

In 1817 plaintiff filed his bill for an account which was resisted by the defendant and referred to a master who found in favor of the accounting.

Subsequently, the Court appointed three masters: H. M. Hinchey, C. G. Voris and Franklin Bonn.

In 1900 a majority of the masters filed their report, restating the account between the parties.

There is always children's clothes to trim, and a hundred other uses for these all over, appliques, insertions and laces.

QUEER ALMANACS.

Australian Shepherds Have Odd Ways of Marking Time. The boundary fences of the great Australian sheep-ranches have each a district to look after, in which one must keep the wire fences in repair and see that the sheep come to no harm.

Another man had tried and failed with every sheep that he hit on a new idea. He made a big damper (cake of flour and water) on Sunday night and marked it into seven sections, each section being a day's allowance, so that every time he picked up the damper the croaker would remind him of the day.
