Over-Work Weakens Your Kidneys.

Unhealthy Kidneys Make Impure Blood.

All the blood in your body passes through your kidneys once every three minutes.

The kidneys are your blood purifiers. They filter out the waste or impurities in the blood.

If they are sick or out of order, they fail to do their work.

Auto-acidemia, rheumatism come from excess of uric acid in the blood due to neglected kidney trouble.

Kidney trouble causes quick or unsteady heart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidney-poisoned blood through veins and arteries.

It used to be considered that only urinary troubles were to be traced to the kidneys, but modern science proves that nearly all constitutional diseases have their beginning in kidney trouble.

If you are sick you can make no mistake by first doctoring your kidneys. The mild and extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy, is soon realized. It stands the highest of all wonderful cures of the most distressing cases and is sold on its merits by all druggists in fifty-cent and one-dollar bottles.

Home of Swamp-Root. You may have a sample bottle by mail free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

Don't make any mistake, but remember the name Swamp-Root. Dr. Kilmer's Swamp-Root, and the address is Binghamton, N. Y., in every bottle.

The Stuart Kings. The family name of the Stuarts was originally, as Mr. Bayley observes, Fitzalan. The original Walter Fitzalan, brother of the ancestor of the dukes of Norfolk, was Lord High Steward of Scotland, and from this circumstance he has adopted the name of Stuart. When the change began is not certain, but it was probably not later than the time of Alexander, the great-grandson of Walter Fitzalan, for both his sons—James, the grandfather of Robert I., and all the Scottish Stewart kings, and John, the ancestor of Lord Darley—appear to have borne the name of Stewart.—Notes and Queries.

THE TOY INVENTOR. His Hardest Task Is to Catch the Fancy of the Public. The Sunday inventor is an important factor in the mechanism of toy business, and he carries all of the living he gets in thinking up devices. He is most concerned with the small mechanical toys, and, in addition to the prime requisite of putting forth something novel, he must get something which appeals as little as possible and which catches the fancy of the multitude. This last point is one which is most difficult to cover. No student of the subject has ever yet been able to discover or deduce the cycle in which the public taste moves, and it is still but a guess as to whether a figure which walks on its hands, an airship with wings or an aerobot who works by gravity will be the best seller. Then, when the invention has been achieved, the inventor has still the problem of finding the maker who will buy it and pay a fair price. The inventor and maker are in much the same position as the writer and publisher; both go through the same mental turmoil as to the timeliness of the output and both take the same risks.

The inventor who has been in the business long learns at last the best places at which to offer his wares and has more or less of an idea of what they ought to bring him, and once he has acquired this knowledge his entire energy is devoted to keeping up with the demand for novelties. Something absolutely different from anything else previously offered is in general better than an improvement of an old idea, and that is why in mechanical toys the same device is sought after two seasons in succession.—Philadelphia Record.

He Knew His Rules. Tommy—He called me a name again, so I just grabbed him round the neck and I let him get his own back. "What do you mean by that?" "Well, he didn't call me a name, but he was right in—" Mother—Oh, Tommy! Tommy! You mustn't fight like that. "It isn't right—" Tommy—Aw, what do you know about it, mom? "Hittin' in de clutches ain't barred—" Catherine Standard and Times.

Considerate. "He pretends to love music, but he never asks me to sing." "Perhaps that's his way of proving it."

Inmate Perseverance. The neighbors were discussing the peculiarities of an eccentric old resident. "I do think," remarked Mrs. Higgins, "that old Mr. Tighten is the contraryest man on the face of the earth."

"What's he doing now?" asked Mrs. Joggins. "Doing?" You remember he used to say that when he had accumulated \$50,000 he was going to quit saving money—the old kind!—and settle down to the enjoyment of it? "Yes."

"Well, he's actually doing it."

Nowadays big advertisers are apt to judge newspapers by the amount of classified business they carry. The reason for this is simple enough.
