KALBFUS SCORES UNFAIR GAME LAWS

HARRISBURG, July 5.—The State game commission held its semi-annual meeting at its new office in the new capitol today, for the purpose of hearing the semi-annual report of Secretary Kalbfus and the transaction of routine business.

A most encouraging condition of affairs regarding the increase of game in the State was presented by Secretary Kalbfus, which is mainly due to the enforcement of the laws and the great interest the public is taking in game protection.

Attention is called to the fact that the game laws in some respects are unfair, and their repeal is recommended. For instance a gunner in this State can only kill a certain number of migratory fowl, but in adjoining States to which they fly when leaving Pennsylvania the gunner can kill as many as they please.

Secretary Kalbfus strongly recommends that a law be passed making it a penal offense for any unlicensed foreign born resident to own a gun or any other kind of firearms. In the last six months five officers of the game commission in hunting offenders against the game laws, have been shot at and wounded by foreigners, and one man was brutally murdered by Italians in the western part of the State, and his body thrown into the river simply because he performed his duty and prosecuted foreign violators of the game laws.

The game wardens, by the way, are all doing good work, and have prosecuted many offenders, the fines from which go to the department. The department brought from Alabama for propagating purposes, 3,547 quail, and they are all said to be doing finely. A number died on the way here, but in bringing quail here next year Dr. Kalbfus will have them shipped in a patent box which will admit of their getting light, air, food and water. Three sets for game preserves have been selected, one in Clinton county, a second in Clearfield and a third in Franklin, all on forestry land owned by the State. The foreign quail have all been distributed throughout the State, and are reported to be exceptionally hardy. A brood of about twenty sickly ones, the poorest lot of the imported birds, were placed on an island in the Juniata river in Perry county, and every one of them is living and hardy, and the brood has increased to twice the original size.

It was impossible to get deer or wild turkeys for propagating purposes, but the commission is on the watch and ready to purchase when opportunity offers. There are plenty of deer in captivity, but the owners will not sell. There are no wild turkeys purchasable anywhere. Dr. Kalbfus recommends that a law be passed requiring all resident hunters to take out a license, as is done in other states, and in this way make the department self-sustaining. Applicants only unlicensed foreigners are required to take out a hunting license.

During the half year there were collected about \$1,500 in fines, of which \$600 went to informers. Dr. Kalbfus says that he has information to the effect that at a certain point in this State a flock of about 300 wild pigeons have been nesting for the past two years. The wild pigeon disappeared from this continent over twenty years ago, and Dr. Kalbfus is of the opinion that they may be coming back. If so, stringent laws will be passed for their protection.

Two Coal Diggers. Two coal diggers belonging to Northumberland parties are now employed daily, extracting coal near the bend of the river. The coal diggers are at work near the southern shore and they each scoop up a boat load of fine coal every day.

EVERYBODY TO GET FISH NOW

In his semi-annual report to the Fisheries Commission which has been approved by the commission and has been sent to the Governor, Fish Commissioner Meehan says that for the first time in the history of the Department all of the applications for fish will be filled this year. Up to June 1, the ending of the first half of the fiscal year of the department, the output by the department was 394,450,000 fish. This number is more than 1,000,000 in excess of the output for the years of 1903, 1904, 1905 combined, and is only 6,000,000 less than the output for the combined years of 1902, 1903, 1904 and 1905.

Of the enormous number of fish put out by the department, credit is given to the fry which are sold to the public. The fry were gathered by men sent to the lakes in Wayne and Pike counties, their efforts resulting in 250,000,000 young fish; the report states that ninety-five per cent. of these would have died in the natural state.

It is hoped to fill applications for black bass during the coming months. The several hatcheries of the department have produced 135,000 of this popular game fish and 65,000 have been procured in the field; the field work is expected to produce produce at least 10,000 more and it is hoped to have all of the fry ready to ship before August 1.

Applications have been made for fish in the number named as follows: Trout, 5,000; pickerel, yellow perch, brook black bass and wall eye pike, 500 each; catfish, 200. Frogs are treated as "fish" in making up these statistics. The aggregate number of fish represented in these applications, in round numbers, is 400,000,000.

THE REPORT STATES THAT THE SHAD WORK in the Delaware river during the spring carried on by the Pennsylvania department in connection with the Federal, New York and New Jersey departments, was very successful. The Pennsylvania men gathered 3,130,000 shad spawn to be hatched at Torresdale. Nearly all of the fry will remain in the Delaware. New York and New Jersey is each to get a proportionate share of the fry but of the amount credited to New York only 150,000 will be transferred to the Hudson river. The balance of New York's allotment will be placed in the Delaware, as will the entire shares of Pennsylvania and New Jersey. During the work among the shad, the Fishhawk, the Federal government's boat, gathered 338,000 shad eggs.

WHERE MOSQUITOES BREED. Mosquitoes are breeding by the million in the old canal and in a very short time the town no doubt will be infested as badly as last summer, when mosquitoes proved a greater pest than for many years past. This is only another way in which the abandoned canal proves a nuisance to Danville.

Some of the Pennsylvania towns that have stagnant water nearby in order to prevent the breeding of mosquitoes employ petroleum, which is poured upon the surface of the water. This of course would prove perfectly feasible in the canal, if any one could be found willing to meet the bill. The mosquito's bite is bad enough, but the insect is to be dreaded in other ways. It is now pretty well established that the mosquito is responsible for the spread of malaria as well as yellow fever. Perhaps the board of health will take the matter up with the borough council and recommend the use of petroleum in the old canal; also that council will see its way clear to adopt the recommendation of the board of health and do what it can to eliminate the mosquito nuisance.

SWIMMERS' PROTECTION. An example of the bravado and utter disregard for the law that is exhibited by certain of the juveniles of this community is shown by the rather unusual methods employed by a "gang" of watchmen to protect themselves from a watchman while swimming in forbidden waters. The ice pond on the Bennett estate possesses marked attractions for the youths as a swimming pool, more so probably because the pastime is prohibited at that spot. It is the custom of Watchman John Kreiger to keep a sharp lookout about the pond to prevent the boys from indulging their natural proclivities. A hard time he has of it too, for their ways are divers and dubious and difficult to circumvent.

On Tuesday, however, the climax was reached. Mr. Kreiger was informed that the "gang" was in possession of the pond, and he hastening to root the offenders, what was his surprise to hear the sharp command to "Halt!" and to find himself facing the business ends of two dangerous looking guns, behind which were two of the boys who were standing guard over the pool to protect their comrades from the depredations of the enemy.

Mr. Kreiger, naturally, was at a loss as to how to proceed, and thinking of no way to outwit the lads, beat a dignified retreat. After the first section had finished its bath, the members named the guns and did guard duty, while the others had their swim.

LOWERY BROS' SHOWS COMING. Lowery Brothers' circus shows are coming to Danville and will exhibit on the furnace lot near the Reading station, Monday and Tuesday, July 9 and 10.

Lowery Bros.' circus has been seen in Danville before and has always given good satisfaction. This year the circus has a number of interesting features which will be new to Danville people. Manager Lowery takes great pride in the show this year and says he considers it the best show he has ever carried.

CONGRESS FINISHES EVENTFUL SESSION

The first session of the fifty-ninth congress went into history Saturday. It has been a strenuous session from start to finish. The measure which caused the greatest debate is the railroad rate bill. Begun with the session its consideration continued through the end.

The pure food enactment and the meat inspection provision are also important changes in the federal attitude towards both the producer and consumer of the country.

A uniform and more strict method of naturalizing aliens was enacted. The immunity of witnesses from prosecution who give testimony before government tribunals was made the subject of an enactment which clearly states when such immunity obtains and when otherwise.

A bill removing the internal revenue tax on denatured alcohol was passed. LOCK-LEVEL CANAL SELECTED. The type of the Panama canal was fixed, thus settling a question which has perplexed both the professional and lay mind. The president is to build a lock-level canal, and was given a total of \$39,000,000 for the year for that purpose. It was required that the material for the canal should be of American manufacture unless the president shall find the price excessive in which case he is given authority to buy abroad.

The canal service was given a complete new legal status which will permit of an entire reorganization. When the appropriations for the sessions are totaled it will be found that their aggregate has reached nearly one hundred million dollars. This is a greater sum than has been made available since the war congress of 1865.

OF THIS AMOUNT \$25,000,000 WENT into new public buildings in various sections of the country. The legislation on appropriation bills has the characteristic throughout of being restrictive upon the government department heads in the matter of making their expenditures and submitting their estimates to congress. It has been the desire of congress to put an end, as far as possible to deficiency appropriations.

SET BACK FOR NAVAL INCREASE. The naval increase which has been going on annually, received somewhat of a set-back. The largest "hatchling effort" was authorized, but congress required that before bids for its construction could be submitted, the plans must be sent to congress at its next session.

The annual appropriation for the State militia was doubled and hereafter \$2,000,000 will be spent from the Federal treasury for the purpose of keeping the State military organizations in touch with the regular army.

Congress gave vent to the draft of a bill intended to preserve the scenic beauty of Niagara Falls, and the measure was passed. The tariff to be collected by the Philippine government on goods entering the island trade, was revised.

A measure of importance to railroad and other employees engaged in hazardous employments, known as the employers' liability bill, became a law. The government will participate in the Jamestown centennial exposition and \$1,355,000 was authorized expenditure of the federal treasury for that event.

Speedy appropriation for the San Francisco sufferers resulted from a request by the president. Two and a half million was donated directly and supplies from the stores of the government nearly equal that amount.

Private pension legislation for the benefit of the old soldiers who are unable to receive a pension under the statute laws kept up its usual heavy pace.

Installation of Officers. The installation of officers took place on Monday night at Montour castle, No. 186, Knights of the Golden Eagle. The installing officer was F. M. Herington, District Grand Chief, assisted by Grand Castle officers. The officers were installed as follows: Past chief, Francis Hartman; noble chief, Lafayette Foust; vice chief, Bradley McLean; high priest, Charles Wagner; venerable hermit, Albert Bookmiller; and other officers.

GUARD HUMAN LIVES. Some days ago an employee of the locomotive shops of the Reading Railway company, at Reading, was killed by the accidental fall of a steel hook from a traveling crane. His skull was fractured and his left arm torn off. The coroner's jury in its verdict suggested that if any modern device were in existence for more securely fastening steel hooks it ought to be adopted. That jury did the thing right. Human life is too precious a commodity to permit this reckless waste. It is the supreme duty of corporations employing large bodies of men, as well as of private employers, to spare no expense in guarding the lives of workmen.

To Clean Straw Hats. To clean a white straw hat mix a thick solution of powdered sulphur and lemon juice, and apply it to the hat with a toothbrush, then rinse in clean, cold water and wipe with a dry cloth. This treatment will not only clean, but will also whiten sunburned straw. Dry in the shade, and if it be a sailor hat, let it remain on a table or board, so that the brim may dry flat.

LITTLE COONS QUEER STUNTS

The three little coons, which for a couple of weeks past have been an attraction in the window of M. H. Schram's store, Mill street, have been removed to DeWitt's Park where they will remain the balance of the season. The little animals have been viewed by thousands of persons while at Mr. Schram's store. Frequently the sidewalk was nearly blocked by people, who were crowding around the window. The little animals seem to understand that a good deal is expected of them and they are just as amusing as they can be. Indeed, their antics at times surpassed all belief. They are natural little acrobats. To bring out their accomplishments Mr. Schram installed a small horizontal bar and a swing. The coons seemed to divine the use of each and while one mounted the bar the other took the swing and in a short time they were doing stunts that rivaled the performance of the most accomplished human actors. Every day they did something to their accomplishments. They reached the climax on Thursday evening, however, when they learned how to turn out the gas. Suddenly Mr. Schram became aware that the front part of the store was in darkness and upon investigating he found that one of the coons had managed to reach the Welsbach burner and turned out the light. The burner was relighted, but it was only a few minutes until one of the coons had climbed up the window and turned off the gas for the second time.

OF COURSE THE LOGICAL CONCLUSION WOULD be that the coons in their inquisitive and meddlesome way unconsciously manipulated the thumb screw which turned off the gas without knowing that there would be any effect, although many persons indulge the pleasing fancy that the young coons knew exactly what the button was and turned off the gas because at night they preferred darkness to artificial light.

VICTORIA FALLS. Called "The Most Beautiful Gem of the Earth's Scenery." The Zambesi river, carrying a huge volume of water two miles in width, as it reaches the western borders of Rhodesia precipitates itself into a cavernous gorge and this traverses the northern edge of the continent.

This great drop in the river has produced "the most beautiful gem of the earth's scenery," the Victoria falls. Almost twice as broad as Niagara and two and a half times as high, an immense amount of water rolls over an edge to precipitate itself into a magnificent splendor 400 feet into the narrow canyon below.

Under the Rhodesian engineers, without detracting from the natural beauty of the surroundings, three acres of the canyon, a splendid 650 foot cantilever bridge and thus opened the way to Tanganyika, to Uganda, and to Cairo.

This bridge, the greatest railway engineering triumph of Africa, deserves not a passing notice. It consists of a central span, weighing approximately 1,000 tons, 500 feet in length and 30 feet wide. The steel work is of rolled steel weighing 400 pounds to the cubic foot. The end posts of the bridge are over 100 feet long. The pull on the anchors is about 400 tons.

The contract for the construction was obtained by an English firm of bridge builders—the contract time fifty-five weeks. The work of erection was carried on from both banks, the material being taken across the river by means of a cable car system. The electrical conveyor of this cable was capable of dealing with a ten ton load at a lifting speed of twenty feet per minute and a traversing speed of 200 feet a minute.

An initial difficulty in the construction of the bridge was the securing of a firm foundation, and owing to the crumbling nature of the bank a much greater quantity of concrete was necessary than estimated.

The construction was happily untroubled by accidents of a serious nature, though a few slight accidents to body work and the replacing from England of one piece of steel work were recorded. In spite of these delays the bridge was linked up at 7 a. m. on April 1, and the railway opened for traffic.

A JOCLAR MONARCH. Ivan the Terrible Had Cold Blooded Notions About Jesting. Ivan the Terrible forgot neither his devotions nor his diversions. His palace alternately resounded with praying and cursing. For his pastime bears were hunted from Novgorod. When from his window he perceived a group of citizens collected he let slip two or three of these ferocious animals, and his delight in beholding the flight of the terrified creatures, and especially on hearing the cries of the victims, was unbounded. Mr. Raver, of this city, conducted the morning and evening services at St. John's Lutheran church, Northumberland, last Sunday. Morning subject, "Real Experiences of the Riches of the Gospel." Evening subject, "How they are Employed in Hell." Both discourses were highly interesting and Mr. Raver received many compliments from the congregation of St. John's.

Little Boy's Good Luck. William F. Crawford, his little grandson and Miss Bessie Lewis of Riverside went fishing in the Susquehanna last week. They caught a nice lot of fish, the most of them being landed by Miss Lewis, but the nine-year old grandson caught the largest, a black bass 14 1/2 inches long.

Bought Homestead. Charles Cotner has sold the homestead farm near Strawberry Ridge to his son, George J. Cotner. The consideration was \$6000.

WIRE THIEF'S BAD FALL. Wire thieves have made their appearance in this vicinity. The Danville and Sunbury trolley line was first attacked. The thief, however, failed to get any wire, but instead came very near being caught by falling into his own trap.

The affair took place a couple days ago and although instantly discovered by the company nothing was said about the matter. The time was improved by quietly working along several lines in the hope of finding the guilty party, who according to indications was a novice, unaccustomed to climbing trolley wire.

The morning following the visit of the thieves the copper wire, about three-eighths of an inch thick, was found cut in two at a point about mid way between town and the hospital for the insane. It was plain that the thief had climbed the pole and oblivions of what might occur when the tightly drawn copper wire was severed had crawled out along the iron arm that carries the wire and with a stout nipper or other tool began work. A glance sufficed to show what had occurred.

When the wire snapped in two each portion relieved of the strain, under its weight, flew backward with terrific force. The arm to which the man was clinging was given a sudden jerk and carried around one section of the wire. Naturally he lost his hold and was precipitated to the roadway, and there in the mud was the imprint of his body where he fell. The height of the fall was quite sufficient to cause injury and that the man was more or less disabled would be inferred from the fact that no further attempt was made to secure the wire.

An examination of the wire showed the nature of the instrument used in cutting it. Had none of the plans failed the thief would have secured a couple of thousand feet of good copper wire.

WIRE THIEF'S BAD FALL

WIRE THIEVES HAVE MADE THEIR appearance in this vicinity. The Danville and Sunbury trolley line was first attacked. The thief, however, failed to get any wire, but instead came very near being caught by falling into his own trap.

The affair took place a couple days ago and although instantly discovered by the company nothing was said about the matter. The time was improved by quietly working along several lines in the hope of finding the guilty party, who according to indications was a novice, unaccustomed to climbing trolley wire.

The morning following the visit of the thieves the copper wire, about three-eighths of an inch thick, was found cut in two at a point about mid way between town and the hospital for the insane. It was plain that the thief had climbed the pole and oblivions of what might occur when the tightly drawn copper wire was severed had crawled out along the iron arm that carries the wire and with a stout nipper or other tool began work. A glance sufficed to show what had occurred.

When the wire snapped in two each portion relieved of the strain, under its weight, flew backward with terrific force. The arm to which the man was clinging was given a sudden jerk and carried around one section of the wire. Naturally he lost his hold and was precipitated to the roadway, and there in the mud was the imprint of his body where he fell. The height of the fall was quite sufficient to cause injury and that the man was more or less disabled would be inferred from the fact that no further attempt was made to secure the wire.

An examination of the wire showed the nature of the instrument used in cutting it. Had none of the plans failed the thief would have secured a couple of thousand feet of good copper wire.

CONQUERS RATTLESNAKE. A live rattlesnake proved an attraction to a large crowd of people on Mill street Saturday night. The snake was three feet long and was brought up from the Ditzler farm about two miles below Cameron by Harvey Gardner, who is employed at the saw mill on the Ditzler tract. The snake was caught by a woman, Mr. Gardner's wife, who evidently does not share in the very common dread of snakes.

Mrs. Gardner Saturday was at some distance from her house when she encountered the rattlesnake. Seizing a club she entered into a combat with the serpent. With one well directed blow she quieted the snake and it lay as if dead. Catching rattlesnakes, which are wanted for skins, is something of an industry along the mountain. Stopping down Mrs. Gardner picked up the apparently dead snake and started toward the house.

The snake, however, was only stunned and before long it began to do some lively business. The woman, made a dash and managed to fling the rattler into a cage prepared for snakes before it got into a position to do any harm.

The cage was a plain box covered with a wire screen. As the rattler lay imprisoned Mr. Gardner's children crowded around and the serpent became very savage. In attempting to strike at the children the poisonous fangs of the snake became entangled in the screen. At this juncture Mrs. Gardner again distinguished herself and seizing a small pincer, by a clever bit of dentistry, succeeded in extracting one of the venomous fangs.

In this condition the big rattler was brought home Saturday night. It was still full of venom and showed that it only wanted the opportunity to inflict a mortal bite. It was taken back to the Ditzler farm.

Millions for Improvements. The result of the proposed merger of all the independent telephone lines in one gigantic combination, is waited with interest here, as the consummation of the deal now practically assured means the expenditure of several million dollars in improving the lines in this section. Of this money the local lines will receive their share.

An official of the local lines said Saturday that he felt sure that the deal would go through and that it would mean a vast improvement in telephone service here, especially in the long distance lines. New long distance lines will likely be put up and the local free radius lines thus relieved of long distance business. In addition to this, entire new equipment will be made, with all the latest improvements in the lines. At present the repair force is handicapped as they have to work with old-style apparatus, going as far back as 1892.

That the American eagle is a very lofty bird in the sight of the nations. A new trust has just been created in New Jersey, with a capital of \$20,000,000, of which \$15,000,000 is common stock, to control the sales of butter, eggs and poultry. J. P. Morgan, Flagler and other millionaires are at the head of the concern.

The political campaign will begin to warm up now. Figures have been compiled which show that the wage loss to miners in the anthracite field during the suspension of work from April 1 to May 15, amounted to \$12,000,000.

Rev. and Mrs. Harry Minsker have returned from a visit with friends in Harrisburg and Wells.

Peter Somerville, of Shamokin, while walking across his bedroom slipped and fell, bursting a blood vessel in his leg, dying from the loss of blood in ten minutes.

Smallpox at Sunbury. The residents of Sunbury were considerably startled yesterday morning by the discovery of a case of smallpox in the town. The victim is 15-year-old Elizabeth Kaufman, of Newton, New Jersey, who is visiting at the home of her grandparents, Mr. and Mrs. John R. Kaufman, East Market street.

MONITOR'S NEWEST RURAL PHONE

The Farmer's Mutual Telephone company, the latest addition to Montour county's extensive phone system, is practically completed, and the subscribers are enjoying the many privileges of this great convenience.

The new line connects with the U. T. & T. company's wires just this side of Maudslade, where the Jerseytown road branches from the State road, and extends out Frosty valley past Kaseville to the farm of Joseph Crimm, a distance of 7 1/2 miles.

There are 13 'phones on the line, all in Valley and West Hemlock townships except one in Columbia county. The subscribers are C. F. Styer, Joseph Crimm, P. S. Brugler, George D. Kase, John Johnson, Raymond Purcell, John Hughes, Hiram Stettler, Charles Arwino, Franklin Crossley and Mrs. Augusta Mans three 'phones. The 'phones have now all been installed with the exception of two of Mrs. Mans'.

The line works admirably and is a credit to its constructors. In a conversation yesterday with C. F. Styer, we were able to judge of its excellence.

The officers of the Farmer's Mutual company are: President, C. F. Styer; secretary, P. S. Brugler; treasurer, John Crossley; board of directors, John Crossley, Hiram Stettler and Charles Arwino.

CONDENSED NEWS. In Danville it was a sane and sensible celebration. The wise politician never gets too angry to watch the movements and study the arguments of his antagonist.

Going to Pottstown after being away from there several years William Dwyer arrived an hour after his father's funeral.

The returns of the Schuylkill county assessors show that there are 28,434 in the county eligible for military duty.

The reports of the registry assessors in York county show that for the past six months there have been 1,062 births and 570 deaths.

It is entirely too early in the campaign to make any safe predictions. Pottsville's postoffice has been raised to the first class and the postmaster's salary will now be \$3,000 a year.

While attending the commencement exercises of the Chester high school William Pallen, an employe of the Delaware county bank dropped dead of heart disease. He was 65 years of age and had had an employe of the bank for 35 years.

Anthony Papine was drowned in a dam near Shenandoah, being seized with cramp while bathing. Passengers on a passing trolley car witnessed the drowning.

Frederick Hays, 85 years old, is dead at Carlisle. He was the last grandson of Molly McChulley, better known as "Mollie Pitcher," famed for the part she took in the battle of Monmouth, during the revolutionary war.

Abram H. Ebersole, 21 years old, a farmer of near Marietta, Lancaster county, was badly injured in a runaway that he died within an hour from internal hemorrhage.

The 150 weavers of the Allentown silk mill who recently struck against a 10 per cent. reduction and who later refused a cut of 5 per cent. have been discharged.

Temperance is the habit of the wise. Good temper prolongs life and sweetens it, too.

A telegram appeared in the papers a few days ago, that a Missouri court had rendered a decision that a man who had bought goods of a Trust, and had been treated for the same, and sued for payment, did not have to pay the bill.

CUBAN GIANTS 1 DANVILLE A. A. O.

The fans who remained away from DeWitt's park Friday afternoon missed a battle royal between the Danville A. A. and their worthy opponents the Cuban Giants. Hammer and McCloud were in the points for the locals and the balance of the team worked behind McCloud with the regularity of grandfather's clock, pulling down the high ones and scooping up the low ones in a way that made the spectators sorry they had not paid fifty cents instead of twenty-five to witness so fine an exhibition.

Up to the ninth inning Hertz was the only one man to reach the third corner and the hits up to this point were so few that it took a magnifying glass to locate them on the score sheet. Bradley and Abbott did the trick for the Giants and did it to perfection.

The locals had only one strike out while McCloud whiffed six of the visitors. The final score was 1 to 0 in favor of the Giants, the winning run being made in the ninth inning. The six last games played with the Cubans the total number of runs made by the two teams was only 16. It is to be regretted that the attendance was so small.

It is most lamentable that the attendance at Friday's game was not larger. The small number of persons present, the base ball management states, is due to the fact that the grand stand, which was blown over in a recent storm has not been replaced and a great many of the fans being averse to standing in the sun, were absent from the game.

For this reason the base ball management has cancelled all home games and also declined an offer made Friday to book the Cuban Giants for July 7th. The score:

CUBAN GIANTS. Table with columns for Satterfield, Wallace, Gordon, Williams, Jackson, Watkins, Bradley, Galloway, Abbott, Total and Danville players.

DANVILLE. Table with columns for Logan, Ross, Dean, Rhodomer, Hummer, Hertz, Ammerman, McCloud, Total and Danville players.

Loss in Storm. They have serious times in McKeesport also during heavy rain storms. The Times of that city tells how during a recent extremely heavy rain a street which is very steep and was but recently paved at a cost of over \$24,000, was badly damaged. For a considerable distance "the fine new pavement was bulged and rose up as though it were above a volcanic eruption; the paving undulated and the brick in some parts left the street, and debris came down the street, tearing and blocking it." It is a rather serious thing for the people of a city to sustain such losses during heavy storms, and there ought to be some method of getting rid of the surface water in some less harmful way.

G. SHOOP HUNT. PRESCRIPTION DRUGGIST, Opposite Opera House.

J. J. BROWN. THE EYE A SPECIALTY. Eyes tested, treated, fitted with glasses and artificial eyes supplied.

Charles V. Amerman. Attorney-at-Law, Notary Public, DANVILLE, PA.

DR. J. SWEISFORD. DENTIST. Uses OBTUNDUMER for the painless extraction of teeth. Dentistry in all its branches and all work guaranteed.

New Company Organized. T. J. Price, F. H. Vannan, Clarence Haupt, Leonard Foulk, Robert G. Purcell and Irvin Vannan form a new company of Danville men, who have purchased the foundry and machine shop on East Market street of the heirs of Daniel M. Curry. Although the bargain was closed Tuesday afternoon in possession of the plant. Next Monday, the 9th inst., is the date set for the transfer.

With the exception of T. J. Price and F. H. Vannan the members of the company are all a part of the organization under which the plant prospered so greatly when owned by the late Daniel M. Curry. Clarence Haupt is at the head of the moulding department and Leonard Foulk of the pattern shop. R. G. Purcell will have charge of the office and Irvin Vannan will be general manager.

Each member of the company is a practical man, who enjoys the confidence of all classes. That they will succeed hardly admits of a doubt. The plant under Curry and company employed 135 men. Among its specialties are the manufacture of architectural iron work and rolling mill machinery of all kinds.

Is Your Hair Sick? That's too bad! We had noticed it was looking pretty thin and rough of late, but naturally did not like to speak of it. By the way, Ayer's Hair Vigor is a regular hair grower, a perfect hair tonic. The hair stops coming out, grows faster, keeps soft and smooth. Ayer's Hair Vigor cures sick hair, makes it strong and healthy.

LACKAWANNA RAILROAD. DELAWARE, LACKAWANNA AND WESTERN RAILROAD. TRAINS LEAVE DANVILLE. EASTWARD. 7:07 a. m. daily for Bloomsburg, Kingston, Williamsport, etc.

BEST FOR THE BOWELS. CANDY CATHARTIC. THE WORK WHILE YOU SLEEP. W.M. KASE WEST. ATTORNEY-AT-LAW. No. 850 MILL STREET, DANVILLE.

CHARLES CHALFANT. ATTORNEY-AT-LAW. No. 110 MILL STREET, DANVILLE.

WILLIAM L. SIDLER. ATTORNEY-AT-LAW. COR. MILL AND MARKET STREETS, DANVILLE.

A. C. AMESBURY. Best Coal in Town. Take your prescriptions to ROSSMAN & SON'S PHARMACY. 345 MILL STREET, DANVILLE, PA.

THOMAS C. WELCH. ATTORNEY-AT-LAW. District Attorney of Montour County. No. 107 MILL STREET, DANVILLE.

CHICHESTER'S ENGLISH PENNYROYAL PILLS. Beware of Counterfeits. Always reliable. Ladies, ask Druggist for Chichester's English Pennyroyal Pills. Made of purest medicinal herbs, and is the best of all.
