DANVILLE A GOOD PLACE TO LIVE IN.

Danville has always been noted for the abundance and excellence of her food markets, but, perhaps, that fact was never more full in evidence than at the present time. It is true that this is the season of the year of greatest profusion.

We have everything commonly found during the winter season in markets in this latitude, and, in addition, all the summer products common to our climate. But that is not all. Pretty nearly everything offered for sale is to be found of a year superior quality.

be found of a very superior quality.

A walk through our curb-stone market, for example, at the present time will, we believe, clearly demonstrate what we have said. We are so accustomed to the abundance visiable on every hand that many of us, perhaps, are unable to fully realize what it really means. It is the visitor and stranger who comes here from a less-favored locality that more quickly discerns our advantages. We have always been accustomed to them so that they have lost somewhat of their sales in our age, but extraorers are more and to rote what of their value in our eyes, but strangers are more apt to note what cannot but appeal to them.

what cannot but appeal to them.

Montour county is an agricultural district; not exclusively
so, as her many kinds of industries demonstrate, but her rich and
firtile farms, on her comparatively limited area, are devoted to almost every cereal, vegetable and fruit known to this latitude. What insect every cereal, vegetable and truck known to this latitude. What is more, her farmers and truck-gardeners are an intelligent race. They read and they observe. Everything new in the fruit and vegetable line suited to this latitude is sought out and cultivated. They are content only with the best, for they have learned from experience that the best pays the greatest every time. Whether it be the berries, the peaches or the applies the recognized best are in the second of the suited by the recognized best are in the second of berries, the peaches or the apples, the recognized best varieties are grown. So, too, with vegetables. Whatever it may be, the superior kinds are always to be found, barring, of course, the occasional vicissitudes of the season.

Nowhere are the butchers' stalls more attractive. Be it beef, mutton or pork that is wanted, the purchaser can rely upon getting the best every time. In the matter of poultry and the products of dairy we stand in the front rank. Sometimes there may be a pot of butter that falls below the mark, but that even merely goes to prove the general excellence.

Even in the matter of foreign fruits, fish and other articles, our markets are up to the average anywhere. What we cannot produce on our home acres and in our own waters is brought here, and duce on our nome acres and in our own waters is brought here, and is to be had in season. The display of vegetables to be seen on every market day would do credit to any market in the land. The only drawback being the lack of a market house, but the handsome array along the curb of Mill street on Tuesday, Thursday and Saturday mornings could scarcely be better, except in extreme cold or rainy weather.

Lastly, Danville has always been considered a cheap market, Lastly, Danville has always been considered a cheap market, many persons coming down from Bloomsburg to do their marketing here. It is true that within the past year or two there has been an advance in the price of some products, such as butter, eggs and poultry, but in this particular our market has only followed the general trend observed all over the country.

In short, our excellent market should be, and is, no small

inducement to persons to come to us to establish new industries or to live lives of content amid our abundance.

OUR LOCAL AND STATE RULERS.

Every self-respecting citizen owes it to himself and to the munity to take an active interest in the present political situa-

tion.

Do the people of Danville and Montour county, the people of Pennsylvania, care to govern themselves, or are they willing to leave local and state government to those who make a profitable business of pocities? Within the last twelve months there have been many startling examples of the evils that grow from the abandonment of political control to those who make a selfish and unclean business of it. The success of our national self-government is a matter of just pride, but the people of this state and of the whole country have been aroused to a sense of the utter failure of local.

matter of just pride, but the people of this state and of the whole country have been aroused to a sense of the utter failure of local self-government as it is found in many parts of this republic.

The revolt against local and state misgovernment has begun and must be vigorously continued, if it is to be brought to anything like a successful issue in this generation. Secretary Taft tells the Cubans that the trouble with them is their disposition to regard politics as a matter to be left to "the political class," a separate profession, like law or medicine, which may be altogether neglected by those who are not professional politicians. "Your difficulty," said Secretary Taft to the Cubans, "was that you were brought up under the fifteenth and sixteenth century ideas of government, and were taught to look to others for the responsibility of government."

That is not our difficulty, for we have the priceless heritage of democratic principles, but our difficulty is that we have not applied these principles to local and state affairs.

CRIMINALS HOPE TO RULE STATE

Roll By and Find Them Restored to

Although the "Press Muzzler," enacted by the Philadelphia gangsters in the hope of perpetuating their power, has proved to be impotent, there is a general demand that among the many good things to be done by the coming legislature shall be the wiping of the obnoxious, tyrannical measure off the statute books. All of the Democratic legislators fought against it. In this, as in all other matters affecting the welfare of the commonwealth, those members who stood faithful to the people, having had no black sheer among them during the last several mong them during the last several of the legislature. The voters, therefore, find strong reason to trust the Democratic candidates, this year, for a continuing of the good work.

When the ill-fated Goehring "libelbill," a sort of supplement to the "muzzler," was pending in the last regular session, the Democratic senator from Berks, Mr. Herbst, said:

"I can see no reason why this bill should pass, Two years ago a bill was passed by this body to restain the freedom of the press, or said, to muzzle it. This was cone said, to muzzle it. This was cone said, to muzzle it. This was cone said, to muzzle it. This was pending in the last regulators and the suppression of the statute coming election they will stand a good chance of electing a majority of machine legislators also. Surely the voters of the strain the freedom of the press, or said to muzzle it. This was cone said, to muzzle it. This was cone said, to muzzle it. This was pending in the last regulators of making amends for the incalculable evils that they have done ried them. Now, this act may not be so severe; it may even be a lamb compared with the wolf of

to the commonealth. Proof is already seen in Philadelphia in the machine complaints against the workings of the personal registration law; that whenever they think that the clouds have rolled by they will undertake to club the legislature, if they can elec it, into repealing or emasculating the few partial reforms which they have been forced to grant to the people The roll-padders' audacious disr

As Representative John R. But there is the rule flatly contradicting that claim. The rule was not suspended in the case of Mr. Plummer Mr. Murphy or any of the other members whose names were fraudulently aused in the roll-padding, nor had any one jof them asked for its suspension. "In one of my voyages from Cape Town to England," writes a traveler, "I shared my cabin with a peculiar man, whose name was Lazaras. He made me promise that if he should die during the voyage I would prevent his burial at sea. He said that on a previous voyage he had fallen sick and was taken for dead and put into a sack for burial. A quartermaster had been put on to watch the body until it was time for the funeral. When the burial party arrived the quartermaster in-formed the captain that he thought the formed the captain that he thought the body had moved in the sack. The sack was opened, and Lazarus eventmelly came to life again. Such was the story Lazarus took me. Lazarus was a thin man with a sallow face. He had an enormous appetite and appeared at every meal, to which he devoted his whole energies. The good feeding only seemed to add to his corpselike appearance. One evening, sure enough, when we were about halfway to our voyage's end, he apparently died again. when we were about halfway to our voyage's end, he apparently died again. The doctors took him in charge this time, however, and he came out of his trance without any shotted sack episode. He was met at the London docks by a number of relatives and friends, all of whom looked as if they might be suffering from the same complaint."
